SECTION 1:

Executive Summary

Executive Summary

Health and Safety Code, Division 2.5, Section 1797.254, requires the EMS Agency to submit an emergency medical services plan to the State EMS Authority. The Plan shall be used as both a workplan and a long-range plan. The 1994 Base Plan which meet the requirements of the initial five-year plan was submitted in August, 1995. In 1998, the State Authority called for the first annual update utilizing 1997 data. Updates provide information on the status of the system and the EMS Agency's progress in meeting its long-range plans. The plan meets all requirements set forth in the *EMS System Guidelines*, Part III, EMS System Planning Guidelines, EMSA #103.

The information provided in this Base Plan spans varying timeframes based on input from available sources and State requirements. In most cases, data are reported for the calendar year 1997. In some instances, based on reporting availability, data are reported for fiscal year 1997-98.

In general, several important internal and external issues are impacting the EMS System in Los Angeles County. As the largest local EMS system in the United States and one that accounts for a third of the EMS activity in the most populated state in the Country, our task is to plan for a future that is rapidly changing. There can be no doubt that our future EMS system will be much different from what we have today.

There are a number of global issues that are affecting EMS today. Among these issues are the movement of medical delivery to a managed care format, severe public funding restrictions, EMS system component interdependency, governance and medical control, and dependence on systemwide data for management and funding.

Significant progress has been made in some key areas since the submission of the 1994 Base Plan. These implementation issues included:

Quality Improvement Programs -- Policies defining the basis and structure of the County's QA/QI program have been established and have been implemented systemwide. Further efforts at expanding the sophistication of QI programs will be ongoing.

Medical Control Policies -- Various issues/policies related to medical control/direction have been addressed including a master plan for base hospital reconfiguration.

Disaster Medical Response -- The LEMSA has implemented the CCP designation plan and further designation will be ongoing. SEMS has been implemented and HEICS training has been provided countywide. DMAT CA-9 and NMRT teams are fully operational and will be developed on an ongoing basis. Emphasis on hospital readiness for hazardous materials and radiation emergencies as well as NBC situations have been emphasized in many activities including the annual drills.

Specialty System Design -- The long-established pediatric subsystem plan has undergone revision and hospital have been redesignated to ensure compliance with newly released State guidelines.

The remaining major needs identified in the Los Angeles County EMS system center around the following areas:

Written Agreements -- Written agreements are in place for base and trauma hospitals and EOAs. ALS provider agency agreements are in place for private providers and further negotiations for public agencies are progressing. Other needed agreements include those for EMS aircraft/rescue provider agencies and dispatchers, receiving hospitals and RDHMC operational areas, as well as specific disaster agreements with health facilities.

Communications -- The system needs to further evaluate and address methods of implementing broader communication capabilities for ambulance-to-ambulance and ambulance-to-hospital communications.

Medical Dispatch -- The LEMSA needs to review all aspects of medical dispatching (pending implementation of State regulations).

Specialty System Design -- Expansion of the systems ability to meet the needs of special populations should include neurosurgical center designation.

Data Collection/System Evaluation -- Several areas of the current data collection system (TEMIS) require expansion and refinement to better standardize data and enable use for the systemwide QA/QI program implementation.

Public Education -- In general, an expansion of public education efforts are sorely needed. As a part of celebrating thirty years of formal emergency medical services in Los Angeles County, several major efforts directed at public education will be implemented.

A collation of unmet standards and specific objectives necessary to meet the standards follow this summary.

Despite some unresolved issues and problems, the EMS system in Los Angeles works, perhaps due to the fact that when human lives are at stake, involved personnel and agencies work out informal patterns of cooperation. With continuous education, commitment and mutual cooperation of the entire EMS community, the EMS Agency will be able to successfully fulfill its responsibility as the lead agency in planning, implementing, and evaluating the emergency medical services system in Los Angeles County.

EMS PLAN**OBJECTIVES NECESSARY TO MEET MINIMUM STANDARDS**

Standard	Timeframe		Objective
	Short	Long	
1.11 System Participants		x	The LEMSA shall successfully negotiate advanced life support provider, SFTP and receiving hospital agreements to ensure participant's conformance with assigned EMS system roles and responsibilities.
1.19 Policies, Procedures, Protocols		x	In conjunction with system participants, the LEMSA shall develop medical dispatch protocols.
1.24 ALS System		x	The LEMSA shall successfully negotiate and implement ALS provider agreements with additional ALS providers.
1.25 On-Line Medical Direction		x	The LEMSA shall develop a medical control plan which determines the base hospital configuration for the system and a written policy that describes the process for selecting base hospitals, including a process for all eligible facilities to apply.
2.04 Dispatch Training		x	The LEMSA shall ensure medical orientation and training of PSAP personnel in accordance with the EMSA's Emergency Medical Dispatch Guidelines.
2.12 Early Defibrillation	x		The LEMSA shall approve and implement a policy for Public Safety Personnel AED program approval.
3.01 Communication Plan		x	The LEMSA shall require system participants to install the following: Installation of ReddiNet at all health care facilities Installation of HEAR radio on all EMS vehicles Installation of a ReddiNet terminal at each dispatch center
3.02 Radios		x	The LEMSA shall encourage provider agencies to establish a mechanism for communication between all transporting vehicles and receiving hospitals. This will most likely be met by the installation of a HEAR in each emergency medical transport vehicle and non-transporting ALS responder vehicles. The LEMSA in conjunction with system participants shall continue to explore alternative communication systems, e.g., satellite or cellular systems, to enhance capabilities, especially in disaster situations.
3.03 Interfacility Transfer		x	The LEMSA shall encourage provider agencies to establish a mechanism for communication between all transporting vehicles and receiving hospitals. Achievement of this objective will most likely be through installation of a HEAR in each emergency medical transport vehicle and non-transporting ALS responder vehicles. The LEMSA in conjunction with system participants, shall continue to explore alternative communication systems, e.g., satellite or cellular systems, to enhance capabilities, especially in disaster situations.
3.05 Hospitals		x	The LEMSA shall install the HEAR at all health care facilities and shall form a volunteer HAM radio organization targeted for back-up hospital communications.

Standard	Timeframe		Objective
	Short	Long	
3.06 MCI/Disasters		x	The LEMSA shall install the HEAR at all health care facilities, form a volunteer HAM radio organization targeted for back-up hospital communications, and schedule radio checks with neighboring counties.
3.08 9-1-1 Public Education		x	The LEMSA, in conjunction with other system participants, shall work to create an updated brochure describing 9-1-1 services and alternate non-emergency transportation (e.g., Metro Access, Dial-A-Ride, Medi-Trans, etc.).
3.09 Dispatch Triage		x	In conjunction with system participants, the LEMSA shall develop guidelines for dispatch triage.
4.02 Monitoring	x		The LEMSA shall monitor response time standards of ambulance providers serving independent cities.
4.05 Response Time Standards	x		The LEMSA shall evaluate the response time performance of primary provider agencies to determine whether the State standards are met.
4.09 Air Dispatch Center	x		The LEMSA shall designate dispatch centers (primary and back-up) for the coordination of air ambulances or rescue aircraft.
4.10 Aircraft Availability	x		The LEMSA shall develop the application process, negotiate and establish written agreements, and formally designate EMS aircraft/rescue provider agencies.
4.12 Disaster Response	x		The LEMSA shall develop agreements with the other operational areas in Region I for medical transportation services in a disaster.
4.18 Compliance		x	The LEMSA shall successfully negotiate ambulance provider agreements which shall include a transportation component incorporating applicable policies and procedures regarding system operations and clinical care.
5.01 Assessment of Capabilities		x	<ol style="list-style-type: none"> 1. Within the next year, the LEMSA shall develop agreements with paramedic receiving hospitals which have been given defined service areas. 2. Within the next three years, the LEMSA shall develop agreements with all paramedic receiving hospitals.
5.03 Transfer Guidelines		x	<ol style="list-style-type: none"> 1. The LEMSA shall establish guidelines to identify specific patients who should be considered for transfer to facilities of higher capabilities. 2. The LEMSA shall establish facility transfer agreements.
5.13 Speciality System Design		x	The LEMSA shall establish neurosurgical receiving centers based on the criteria which has been developed and was subsequently approved by the EMSC.
6.03 Prehospital Care Audits		x	The LEMSA shall create a data program to capture and integrate receiving hospital data into TEMIS.
6.04 Medical Dispatch		x	With system wide participation, the LEMSA shall establish a mechanism to ensure the review of medical dispatching for appropriate level of response and appropriateness of prearrival/post arrival dispatch directions.
6.05 Data Management System		x	The LEMSA shall create a data program to capture and integrate receiving hospital data into TEMIS and enter into Agreements with all paramedic receiving hospitals to participate in the TEMIS data system.

SECTION 2:

Assessment of System

TABLE 1: SUMMARY OF SYSTEM STATUS

Include the items from Table 1 that are followed by an asterisk on the System Assessment form. Describe on the form how resources and/or services are coordinated with other EMS agencies in meeting the standards. Table 1 is to be reported by agency.

A. SYSTEM ORGANIZATION AND MANAGEMENT

Agency Administration	Does not currently meet standard	Meet minimum standard	Meet recommended guideline	Short-range Plan	Long-range Plan

SYSTEM ASSESSMENT

SYSTEM ASSESSMENT -- SYSTEM ORGANIZATION AND MANAGEMENT

Agency Administration **1.01 LEMSA Structure**

STANDARD:

1.01 Each local EMS agency shall have a formal organizational structure which includes both agency staff and non-agency resources and which includes appropriate technical and clinical expertise.

CURRENT STATUS:

The Los Angeles County Department of Health Services (DHS) is the designated EMS Agency. Within DHS, the Emergency Medical Services Agency carries out the LEMSA's responsibilities to plan, monitor and evaluate EMS activities throughout the County. Exhibits 1.01-A and 1.01-B shows the DHS organizational chart and the EMS Agency organizational chart, respectively. The organization employs a multiplicity of clinical and technical experts including administrative managers, physicians, registered nurses, data systems analysts and a variety of administrative and technical assistants. Exhibit 1.01-C is an organizational chart depicting non-agency resources, primarily committees, which provide medical and operational advice and recommendations on all aspects of system planning and implementation.

COORDINATION WITH OTHER EMS AGENCIES:

Not applicable for this standard.

NEED(S):

Standard met.

OBJECTIVE:

No further objective needed to meet standard.

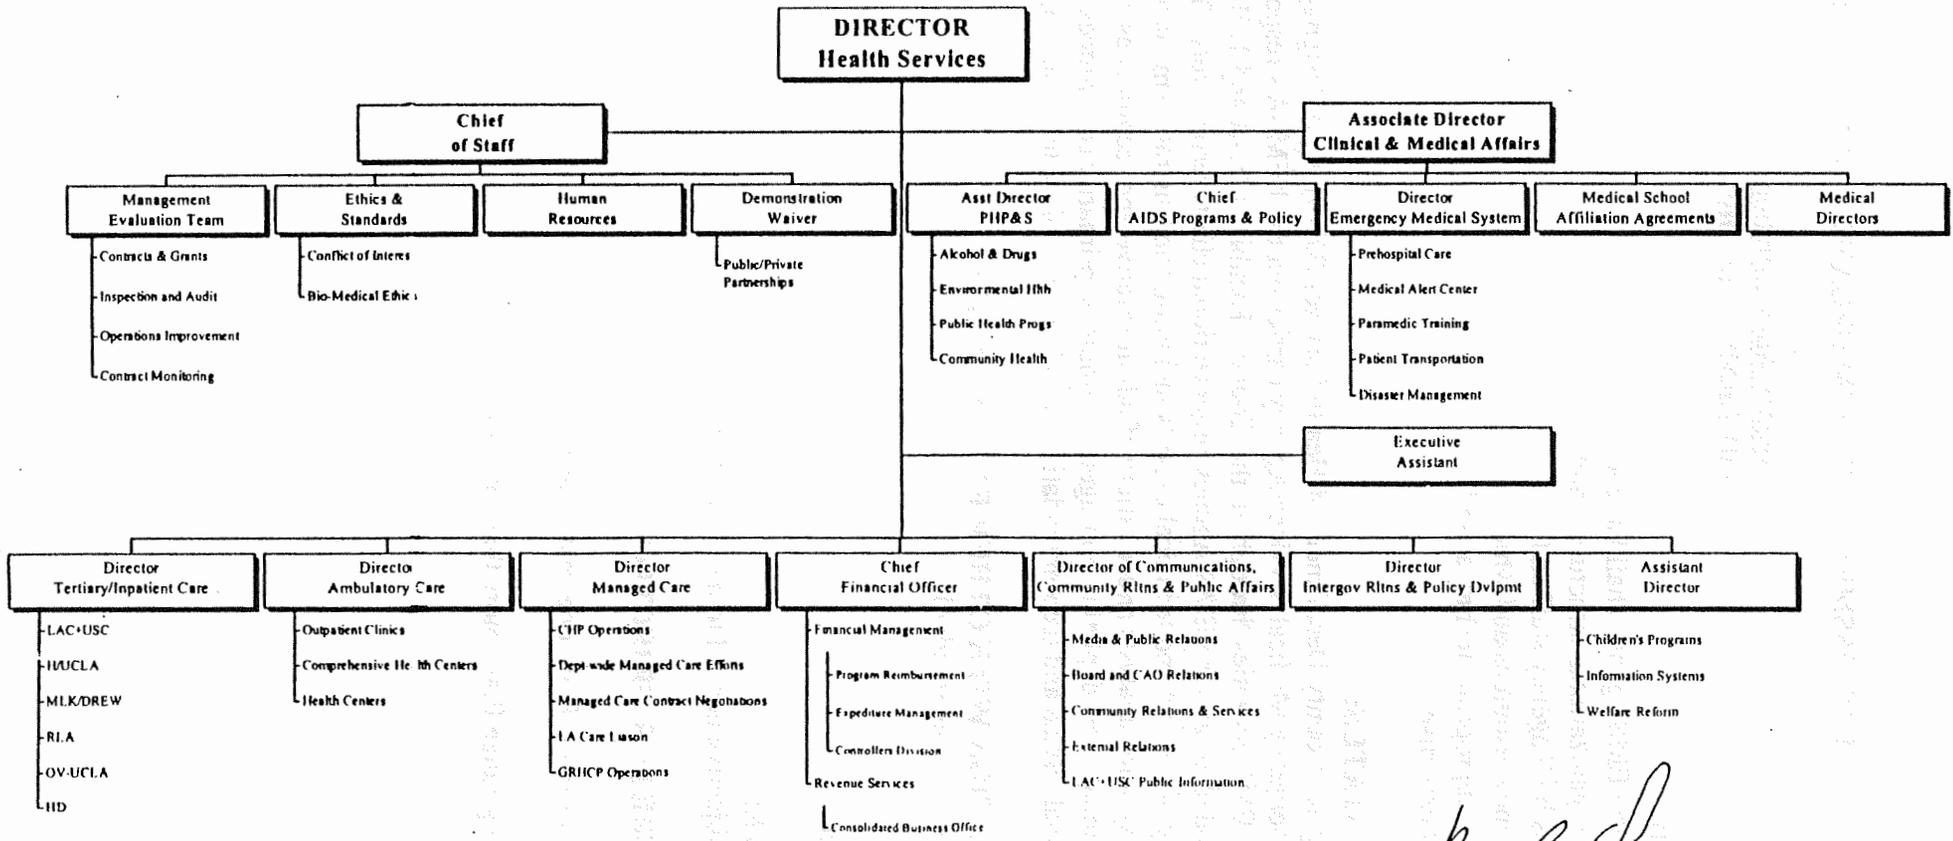

TIMEFRAME FOR OBJECTIVE:

- Short-range Plan (one year or less)
- Long-range Plan (more than one year)

2 - 17

SYSTEM ASSESSMENT -- SYSTEM ORGANIZATION AND MANAGEMENT

Agency Administration

1.02 LEMSA Mission

STANDARD:

1.02 Each local EMS agency shall plan, implement, and evaluate the EMS system. The agency shall use its quality assurance/quality improvement and evaluation processes to identify needed system changes.

CURRENT STATUS:

Dynamics of the system are such that its management requires an ongoing, organized approach to the identification and resolution of problems while balancing the needs of all system participants and keeping patient care at the forefront. The LEMSA has been effective at planning and implementing system changes to meet identified needs.

Since 1993 when the LEMSA began working to establish a systemwide QA/QI program, the development of program evaluation has progressively expanded. Reference No. 620, EMS Quality Improvement Program, and Reference No. 620.1, EMS Quality Improvement Program Guidelines are in place and monitored by the LEMSA Quality Improvement Coordinator. The EMS QI Committee, representing all base hospitals and provider agencies, meet on a quarterly basis and identifies QI indicators and definitions for systemwide evaluation.

All aspects of the LEMSA's QI policies are being applied internally and externally to evaluate the system in a variety of ways. The QA/QI processes are used to look at the impact of and compliance with policies to subsequently identify system changes.

COORDINATION WITH OTHER EMS AGENCIES:

Not applicable for this standard.

NEED(S):

Standard met.

OBJECTIVE:

No further objective needed to meet standard.

TIMEFRAME FOR OBJECTIVE:

- Short-range Plan (one year or less)
- Long-range Plan (more than one year)

SYSTEM ASSESSMENT -- SYSTEM ORGANIZATION AND MANAGEMENT

Agency Administration

1.03 Public Input

STANDARD:

1.03 Each local EMS agency shall have a mechanism (including the emergency medical care committee(s) and other sources) to seek and obtain appropriate consumer and health care provider input regarding the development of plans, policies, and procedures, as described throughout this document.

CURRENT STATUS:

At the systemwide level, a variety of advisory groups and committees provide input on EMS issues and policies. Each group/committee is appropriately composed of public and private provider representatives with a mix of prehospital care personnel levels (i.e., MICNs, EMT-Ps, EMT-Is, physicians and administrators). The input provided establishes a framework in which the EMS community and the LEMSA can develop common goals and objectives in order to achieve greater system effectiveness. Forums are conducted at the MICN, EMT-P and EMT-I levels to encourage a mutual sharing of information between field, hospital and management personnel. The Medical Council provides a forum for a similar interchange between the Medical Director, base hospital and provider agency physicians and other prehospital personnel.

The Emergency Medical Services Commission (EMSC) is the primary advisory group to the LEMSA and the Board of Supervisors on all EMS matters. There are 16 members appointed by the Board of Supervisors, five of which are public members, one nominated by each member of the Board of Supervisors. Composition is attached on Exhibit 1.03-A. There are five standing EMSC committees that review, evaluate and make recommendations on issues referred to them by the EMSC. The five standing committees are identified on Exhibit 1.03-B.

COORDINATION WITH OTHER EMS AGENCIES:

Not applicable for this standard.

NEED(S):

Standard met.

OBJECTIVE:

No further objective needed to meet standard.

TIMEFRAME FOR OBJECTIVE:

- Short-range Plan (one year or less)
- Long-range Plan (more than one year)

Exhibit 1.03-A

Emergency Medical Services Commission

The Emergency Medical Services Commission (EMSC) is the primary advisory group to the LEMSA, the Director and Medical Director of DHS, and the Board of Supervisors on all EMS matters. Sixteen members are appointed by the Board of Supervisors, each serving two-year terms. Composition of the EMSC, as required by the County Administrative Code is as follows:

- ▶ An emergency medical care physician in a paramedic base hospital, nominated by the California Chapter of the American College of Emergency Physicians.
- ▶ A cardiologist, nominated by the American Heart Association, Greater Los Angeles Affiliate.
- ▶ A mobile intensive care nurse nominated by the California Chapter of the Emergency Nurses Association.
- ▶ A hospital administrator nominated by the Healthcare Association of Southern California.
- ▶ A representative of a public provider agency nominated by the Los Angeles Chapter of the California Fire Chiefs Association.
- ▶ A representative of a private provider agency nominated by the Los Angeles County Ambulance Association.
- ▶ An orthopedic, general, or neurological surgeon nominated by the Los Angeles Surgical Society.
- ▶ A psychiatrist nominated by the Southern California Psychiatric Society.
- ▶ A physician nominated by the Los Angeles County Medical Association.
- ▶ A certified paramedic nominated by the California Rescue Paramedic Association.
- ▶ Five public members, one nominated by each member of the Board of Supervisors. No public member may be a medical professional or affiliated with any of the other nominating agencies.
- ▶ A law enforcement representative nominated by the Los Angeles County Peace Officers Association.

Exhibit 1.03-B

EMSC Standing Committees

There are five EMSC standing committees that review, evaluate, and make recommendations on issues relating to the emergency medical system as referred to them by the Commission, or on their own initiative. No action undertaken by these committees is official until it has been approved by the Commission. The five standing committees and their responsibilities are:

- ▶ **Provider Agency Advisory Committee** - This committee is responsible for all matters falling within the Commission's purview regarding prehospital licensure, certification and accreditation, and policy development pertinent to the practice, operations and administration of prehospital care.
- ▶ **Base Hospital Advisory Committee** - This committee is responsible for all matters falling within the Commission's purview regarding MICN certification and policy development pertinent to the practice, operations and administration of prehospital care.
- ▶ **Data Advisory Committee** - This committee is responsible for all matters regarding quality of prehospital data, report generation, prehospital research and policy development impacting TEMIS.
- ▶ **EMS Facilities Advisory Committee** - This committee is responsible for all matters regarding policy development and prehospital care issues impacting 9-1-1 receiving facilities.
- ▶ **Education Advisory Committee** - This committee is responsible for all matters regarding issues and policies pertinent to EMS curriculum development and program development, implementation and evaluation.

SYSTEM ASSESSMENT -- SYSTEM ORGANIZATION AND MANAGEMENT

Agency Administration

1.04 Medical Director

STANDARD:

1.04 Each local EMS agency shall appoint a medical director who is a licensed physician who has substantial experience in the practice of emergency medicine.

The local EMS agency medical director should have administrative experience in emergency medical services systems.

Each local EMS agency medical director should establish clinical specialty advisory groups composed on physicians with appropriate specialties and non-physician providers (including nurses and prehospital providers), and/or should appoint medical consultants with expertise in trauma care, pediatrics, and other areas, as needed.

CURRENT STATUS:

Samuel J. Stratton, M.D., has been the L.A. County EMS Agency Medical Director since April 15, 1993. He is board certified in Emergency Medicine and Internal Medicine. He has had substantial experience in emergency medicine, practicing for over 18 years. His administrative experience in EMS systems is extensive, including but is not limited to, functioning as base hospital medical director, EMT-P training program medical director, and L.A. County EMS Commission chairperson. As demonstrated in Exhibit 1.01-C, the medical director has a variety of committees composed of physicians, nurses, prehospital providers and other specialists to provide medical and operational input.

COORDINATION WITH OTHER EMS AGENCIES:

Not applicable for this standard.

NEED(S):

Standard met.

OBJECTIVE:

No further objective needed to meet standard.

TIMEFRAME FOR OBJECTIVE:

- Short-range Plan (one year or less)
- Long-range Plan (more than one year)

SYSTEM ASSESSMENT -- SYSTEM ORGANIZATION AND MANAGEMENT

Planning Activities

1.07 Trauma Planning*

STANDARD:

1.07 The local EMS agency shall plan for trauma care and shall determine the optimal system design for trauma care in its jurisdiction.

The local EMS agency should designate appropriate facilities or execute agreements with trauma facilities in other jurisdictions.

CURRENT STATUS:

The LEMSA has the largest organized trauma system in the country, including six Level I and seven Level II trauma hospitals. The County has Trauma Hospital Services Agreements with all private hospitals in the system and Memorandums of Understanding with the three County trauma hospitals. The Trauma Plan for Los Angeles County was approved by the EMS Authority in March 1994 and revisions are submitted as they occur. The LEMSA plans to submit a revised plan in accordance with revised Trauma Regulations when they are approved.

COORDINATION WITH OTHER EMS AGENCIES:

Policies governing trauma care coordination and mutual aid between jurisdictions are found in Paramedic Intercounty Agreements in place between Los Angeles County and the following jurisdictions:

- Orange County
- Riverside County
- San Bernardino county
- Kern County
- Ventura County
- Santa Barbara County

NEED(S):

Standard.

OBJECTIVE:

No further objective needed to meet standard.

TIMEFRAME FOR OBJECTIVE:

- Short-range Plan (one year or less)
- Long-range Plan (more than one year)

SYSTEM ASSESSMENT -- SYSTEM ORGANIZATION AND MANAGEMENT

Planning Activities

1.08 ALS Planning*

STANDARD:

1.08 Each local EMS agency shall plan for eventual provision of advanced life support services throughout its jurisdiction.

CURRENT STATUS:

Thirty-eight paramedic provider agencies provide ALS services for the majority of Los Angeles County. Only one city jurisdiction, Sierra Madre, does not have ALS provisions; however, Sierra Madre is approved to provide EMT-D and EMT-AA. Sierra Madre accounts for less than 1% of the population; therefore, ALS services are provided to nearly 100% of the Los Angeles County population.

COORDINATION WITH OTHER EMS AGENCIES:

The Paramedic Intercounty Agreements with surrounding counties addresses the provision of ALS services across county lines. Paramedic Intercounty Agreements are in place between Los Angeles County and the following jurisdictions:

Orange County
Riverside County
San Bernardino county
Kern County
Ventura County
Santa Barbara County

NEED(S):

This standard is met. Although we will continue to support any activities of Sierra Madre to provide ALS services, it is doubtful that such services will be considered in the near future. Sierra Madre has very short transport times to emergency departments and trauma centers.

OBJECTIVE:

No further objective needed to meet standard.

TIMEFRAME FOR OBJECTIVE:

- Short-range Plan (one year or less)
- Long-range Plan (more than one year)

SYSTEM ASSESSMENT -- SYSTEM ORGANIZATION AND MANAGEMENT

Planning Activities

1.09 Inventory of Resources

STANDARD:

1.09 Each local EMS agency shall develop a detailed inventory of EMS resources (e.g., personnel, vehicles, and facilities) within its area and, at least annually, shall update this inventory.

CURRENT STATUS:

Personnel

The LEMSAs maintain an ongoing inventory of EMT-Paramedics, MICNs, EMT-Ds and EMT-Is (those certified by the LEMSAs only) via the Prehospital Emergency Personnel System Inventory (PEPSI), a customized computer tracking application. Through the process of developing the EMS Plan, an inventory of all EMT-Is certified by public agencies approved to certify BLS personnel is conducted annually.

Vehicles and Facilities

The LEMSAs maintain an ongoing inventory of all BLS and ALS provider agencies and vehicles which is updated as vehicles or facilities are added to or subtracted from the system. This inventory is verified on an annual basis through the development of the EMS Plan. An accurate up to the minute inventory of all receiving, base and specialty hospitals is maintained to ensure appropriate transport destinations.

COORDINATION WITH OTHER EMS AGENCIES:

Not applicable.

NEED(S):

Standard met.

OBJECTIVE:

No further objective needed to meet standard.

TIMEFRAME FOR OBJECTIVE:

- Short-range Plan (one year or less)
- Long-range Plan (more than one year)

SYSTEM ASSESSMENT -- SYSTEM ORGANIZATION AND MANAGEMENT

Planning Activities

1.10 Special Populations

STANDARD:

1.10 Each local EMS agency shall identify population groups served by the EMS system which require specialized services (e.g., elderly, handicapped, children, non-English speakers).

Each local EMS agency should develop services, as appropriate, for special population groups served by the EMS system which require specialized services (e.g., elderly, handicapped, children, non-English speakers).

CURRENT STATUS:

The pediatric care program which was implemented April 1, 1985, includes hospitals confirmed to meet pediatric criteria at two levels: Emergency Department Approved for Pediatrics (EDAP) or Pediatric Critical Care Center (PCCC). Transport and destination policies for EDAPs, PCCCs and perinatal centers are in place.

Most dispatch centers employ multi-lingual (commonly Spanish-speaking) operators to deal with non-English speaking patients. Also, many dispatch centers access telephone language lines to enhance communication with non-English speaking callers. Receiving hospitals maintain rosters of bilingual personnel who can be called to the emergency departments as interpreters.

Specialized training in the areas of geriatric and handicapped patients is incorporated into basic and continuing education programs for EMT-Is, EMT-Ps and MICNs.

COORDINATION WITH OTHER EMS AGENCIES:

Not applicable for this standard.

NEED(S):

Standard met.

OBJECTIVE:

No further objective needed to meet standard.

TIMEFRAME FOR OBJECTIVE:

Short-range Plan (one year or less)

Long-range Plan (more than one year)

SYSTEM ASSESSMENT -- SYSTEM ORGANIZATION AND MANAGEMENT

Planning Activities

1.11 System Participants

STANDARD:

1.11 Each local EMS agency shall identify the optimal roles and responsibilities of system participants.

Each local EMS agency should ensure that system participants conform with their assigned EMS system roles and responsibilities, through mechanisms such as written agreements, facility designations, and exclusive operating areas.

CURRENT STATUS:

The LEMSA has identified the optimal roles and responsibilities of most system participants, including paramedic providers, base hospitals, trauma hospitals, pediatric hospitals, and basic life support companies providing coverage in exclusive operating areas. The LEMSA is currently developing the optimal role and responsibility for paramedic receiving hospitals.

Written agreements to ensure participant's conformance are currently in place for trauma hospitals, base hospitals and exclusive operating area providers. Pediatric facilities have been formally designated to participate in the EMS system.

Written agreements for the provision of ALS services have been implemented with all private paramedic providers, the City of San Gabriel and the Los Angeles County Sheriff's Department. Agreements to perform Standing Field Treatment Protocols (SFTPs) are in place with the following cities: Culver City, Los Angeles City, Burbank, Long Beach and San Marino.

Draft agreements for other paramedic and SFTP providers are currently being negotiated.

There is a need for development and implementation of agreements with paramedic receiving hospitals.

COORDINATION WITH OTHER EMS AGENCIES:

Not applicable for this standard.

NEED(S):

1. To complete negotiations and implement advanced life support provider and SFTP agreements.
2. To complete develop, negotiate and implement receiving hospital agreements.

OBJECTIVE:

The LEMSA shall successfully negotiate advanced life support provider, SFTP, and receiving hospital agreements to ensure participant's conformance with assigned EMS system roles and responsibilities.

TIMEFRAME FOR OBJECTIVE:

Short-range Plan (one year or less) (Objective 1)

Long-range Plan (more than one year) (Objective 2)

SYSTEM ASSESSMENT -- SYSTEM ORGANIZATION AND MANAGEMENT

Regulatory Activities
1.12 Review & Monitoring

STANDARD:

1.12 Each local EMS agency shall provide for review and monitoring of EMS system operations.

CURRENT STATUS:

Within the LEMSA, the Office of Prehospital Care Operations section plans, manages and evaluates BLS and ALS care provided by prehospital personnel, provider agencies and hospitals. This section is also responsible for managing pediatric and other specialized programs to ensure appropriate system operations. The section consists of a program manager and registered nurses assigned to specific prehospital care areas for overall review and monitoring.

The TEMIS, QI and Trauma Hospital section of the LEMCA plans, manages and evaluates the trauma care provided by the designated trauma hospitals.

COORDINATION WITH OTHER EMS AGENCIES:

Not applicable for this standard.

NEED(S):

Standard met.

OBJECTIVE:

No further objective needed to meet standard.

TIMEFRAME FOR OBJECTIVE:

- Short-range Plan (one year or less)
- Long-range Plan (more than one year)

SYSTEM ASSESSMENT -- SYSTEM ORGANIZATION AND MANAGEMENT

Regulatory Activities

1.13 Coordination

STANDARD:

1.13 Each local EMS agency shall coordinate EMS system operations.

CURRENT STATUS:

The coordination of EMS for over 9 million residents and 50 million annual visitors is performed in almost all activities on a daily basis. Coordination requires input and cooperation from a vast array of organizations, agencies and facilities. At the systemwide level, a variety of advisory groups and committees provide input to DHS on EMS matters. Each group/committee is appropriately composed of public and private provider representatives with a mix of prehospital care personnel levels (refer to committees in Exhibit 1.01-C). The input provided establishes a framework in which the EMS community and DHS can develop a common set of goals and objectives in order to achieve greater system effectiveness.

COORDINATION WITH OTHER EMS AGENCIES:

Not applicable for this standard.

NEED(S):

Standard met.

OBJECTIVE:

No further objective needed to meet standard.

TIMEFRAME FOR OBJECTIVE:

- Short-range Plan (one year or less)
- Long-range Plan (more than one year)

SYSTEM ASSESSMENT -- SYSTEM ORGANIZATION AND MANAGEMENT

Regulatory Activities

1.14 Policy & Procedures Manual

STANDARD:

1.14 Each local EMS agency shall develop a policy and procedures manual which includes all EMS agency policies and procedures. The agency shall ensure that the manual is available to all EMS system providers (including public safety agencies, ambulance services, and hospitals) within the system.

CURRENT STATUS:

The LEMSAs maintains the Los Angeles County Prehospital Care Policy Manual which addresses all aspects of the EMS system countywide. Content is broken down into the following main subject areas: State Law and Regulation, Local EMS Agency, Base Hospitals, Provider Agencies, Transportation/Patient Destination, Record Keeping/Audit, Equipment/Supplies/Vehicles, Field Protocols/Procedures, Training Programs, and Certification/Recertification Requirements. Each policy is assigned a Reference No. Any newly approved provider agency or hospital or any newly approved vehicle is provided with copies of the manual. Manuals are available to the public at County cost.

Policies and procedures are reviewed and revised at least every three (3) years or as needed.

COORDINATION WITH OTHER EMS AGENCIES:

Policies affecting other LEMSAs are coordinated with those agencies. Surrounding LEMSAs are provided with all updates and visa versa.

NEED(S):

Standard met.

OBJECTIVE:

No further objective needed to meet standard.

TIMEFRAME FOR OBJECTIVE:

Short-range Plan (one year or less)

Long-range Plan (more than one year)

SYSTEM ASSESSMENT -- SYSTEM ORGANIZATION AND MANAGEMENT

Regulatory Activities

1.15 Compliance with Policies

STANDARD:

1.15 Each local EMS agency shall have a mechanism to review, monitor, and enforce compliance with system policies.

CURRENT STATUS:

In addition to ongoing data collection and implementation of a quality improvement program within the LEMSA, the agency audits facilities and agencies either on a routine basis or by exception with regard to compliance with system policies. Determination of compliance of EMS personnel with system policies rests primarily on daily supervision of personnel by provider agencies and base hospitals as well as input to base hospitals by receiving facilities.

COORDINATION WITH OTHER EMS AGENCIES:

Not applicable for this standard.

NEED(S):

Standard met.

OBJECTIVE:

No further objective needed to meet standard.

TIMEFRAME FOR OBJECTIVE:

- Short-range Plan (one year or less)
- Long-range Plan (more than one year)

SYSTEM ASSESSMENT -- SYSTEM ORGANIZATION AND MANAGEMENT

System Finances

1.16 Funding Mechanism

STANDARD:

1.16 Each local EMS agency shall have a funding mechanism which is sufficient to ensure its continued operation and shall maximize use of its Emergency Medical Services Fund.

CURRENT STATUS:

The portion of the EMS Fund (SB612) which is not allocated to hospitals and physicians for indigent care (approximately 17% of the revenues and the 10% allowed fund administration cost) is utilized to cover a portion of the daily operations of the LEMSA. For FY1997-98, a portion of the County's surplus EMS Funds will be used to support County-operated trauma centers.

In addition, fees are implemented for certification/accreditation functions, paramedic training, and base and trauma hospital designation. Grant funds, both state and federal, offset specialized projects or evaluation and implementation of new system enhancements. The remaining costs of the LEMSA are covered by the County General Fund.

The LEMSA will evaluate services provided, determine if the establishment of additional fees for services are appropriate and politically feasible, and seek grant funding sources on an ongoing basis.

COORDINATION WITH OTHER EMS AGENCIES:

Not applicable for this standard.

NEED(S):

Standard met.

OBJECTIVE:

TIMEFRAME FOR OBJECTIVE:

- Short-range Plan (one year or less)
- Long-range Plan (more than one year)

SYSTEM ASSESSMENT -- SYSTEM ORGANIZATION AND MANAGEMENT

Medical Direction

1.17 Medical Direction*

STANDARD:

- 1.17 Each local EMS agency shall plan for medical direction within the EMS system. The plan shall identify the optimal number and role of base hospitals and alternative base stations and the roles, responsibilities, and relationships of prehospital and hospital providers.

CURRENT STATUS:

The LEMSA has medical direction provided by the LEMSA Medical Director. All medically related issues are reviewed and approved by the Medical Director prior to implementation. The Medical Director seeks input from the Los Angeles County EMS Commission, Medical Council, Field Advisory Committee, Base Advisory Committee, and local health organizations (i.e., Los Angeles County Medical Association, Healthcare Association of Southern California, American Heart Association, COPEM, American College of Surgeons, etc.). Currently, 23 base hospitals are active within the EMS system. The roles and responsibilities of the base hospitals are delineated in base hospital contracts which are contractual agreements between bases and the LEMSA. The roles, responsibilities, and relationships of prehospital and hospital providers are delineated in the Los Angeles County Prehospital Care Policy Manual.

Beginning in 1997, several ALS provider agencies have implemented Standing Field Treatment Protocols allowing for paramedics to provide ALS treatments without making base hospital contact and utilizing standardized medical protocols. The program is monitored very closely through provider agency and SFTP system QA/QI indicators/programs.

COORDINATION WITH OTHER EMS AGENCIES:

The LEMSA Medical Director is active as a member of the Emergency Medical Directors' Association of California (EMDAC) and the American College of Emergency Physicians' EMS Committee. Through this organization and direct communication with other local agencies, the Medical Director develops policies or actions to allow for smooth interfacing with other EMS agencies.

NEED(S):

Standard met.

OBJECTIVE:

Continued LEMSA medical direction and identification of optimal base hospital configuration. No further objective needed to meet standard.

TIMEFRAME FOR OBJECTIVE:

- Short-range Plan (one year or less)
- Long-range Plan (more than one year)

SYSTEM ASSESSMENT -- SYSTEM ORGANIZATION AND MANAGEMENT

Medical Direction

1.18 QA / QI

STANDARD:

1.18 Each local EMS agency shall establish a quality assurance/quality improvement program. This may include use of provider based programs which are approved by the local EMS agency and which are coordinated with other system participants.

Prehospital care providers should be encouraged to establish in-house procedures which identify methods of improving the quality of care provided.

CURRENT STATUS:

All paramedic base hospitals and provider agencies submitted Quality Improvement Programs to the LEMSA for approval by October 1995 and March 1996, respectively. Reference No. 620, EMS Quality Improvement Program, and Reference No. 620.1, EMS Quality Improvement Program Guidelines, established the LEMSA's Quality Improvement Program and provided guidelines to system participants for program development.

Site audits of all base hospital and provider agency QI programs are conducted at least every two years. Areas of strength and weakness are identified specific to each program.

COORDINATION WITH OTHER EMS AGENCIES:

Not applicable to this standard.

NEED(S):

Standard met.

OBJECTIVE:

No further objective needed to meet standard.

TIMEFRAME FOR OBJECTIVE:

Short-range Plan (one year or less)

Long-range Plan (more than one year)

SYSTEM ASSESSMENT -- SYSTEM ORGANIZATION AND MANAGEMENT

Medical Direction

1.19 Policies, Procedures, Protocols

STANDARD:

1.19 Each local EMS agency shall develop written policies, procedures, and/or protocols including, but not limited to:

- a) triage,
- b) treatment,
- c) medical dispatch protocols,
- d) transport,
- e) on-scene treatment times
- f) transfer of emergency patients,
- g) standing orders,
- h) base hospital contact,
- i) on-scene physicians and other medical personnel, and
- j) local scope of practice for prehospital personnel.

Each local EMS agency should develop (or encourage the development of) prearrival/post dispatch instructions.

CURRENT STATUS:

The LEMSA has developed and implemented policies, procedures, and/or protocols as follows:

- a) triage: Reference No. 506, Trauma Triage
Reference No. 510, Pediatric Patient Destination
Reference No. 511, Perinatal Patient Destination
Reference No. 519, Management of Multiple Victim Incidents
- b) treatment: Base Hospital Treatment Guidelines
Reference No. 806, Procedures Prior to Base Contact
Reference No. 810, Communication Failure Protocols
Reference No. 814, Withholding or Discontinuing Resuscitative Intervention
Reference No. 815, Honoring Prehospital DNR Orders
- c) medical dispatch protocols: Not developed
- d) transport: Reference No. 502, Patient Destination
Reference No. 512, Burn Patient Destination
Reference No. 514, Prehospital EMS Aircraft Operations Protocol
Reference No. 515, Air Ambulance Trauma Transport Program
Reference No. 517, Interfacility Transfer by Ambulance
Reference No. 518, Decompression Emergencies/Patient Destination
Reference No. 520, Transport of Patients from Catalina Island
- e) on-scene treatment times: Base Hospital Treatment Guidelines
Standing Field Treatment Protocols
Addressed in transport policies listed in (d) above.
- f) transfer of emergency patients: Reference No. 507, Guidelines for Secondary Transfer of Trauma Patients to Trauma Centers
1992 DHS Patient Transfer Guidelines

SYSTEM ASSESSMENT -- SYSTEM ORGANIZATION AND MANAGEMENT

Medical Direction

1.19 Policies, Procedures, Protocols

(continued)

- g) standing orders: Reference No. 806, Procedures Prior to Base Contact
Reference No. 810, Communication Failure Protocols
Standing Field Treatment Protocols--limited pilot project 1992-present
- h) base hospital contact: Reference No. 808, Base Hospital Contact
Reference No. 809, Altered Level of Consciousness
- i) on-scene physician/other medical personnel: Reference No. 816, Physician at Scene
Reference No. 817, Hospital Emergency Response Team
- j) local scope of practice for prehospital personnel: Reference No. 517.5 Interfacility Transfer EMT Scope of Practice
Reference No. 802, EMT-I Scope of Practice
Reference No. 804, EMT-P Scope of Practice

COORDINATION WITH OTHER EMS AGENCIES:

Not applicable for this standard.

NEED(S):

To assist local provider agencies in development of medical dispatch protocols.

OBJECTIVE:

In conjunction with system participants, the LEMSA shall develop medical dispatch protocols.

TIMEFRAME FOR OBJECTIVE:

Short-range Plan (one year or less)

Long-range Plan (more than one year)

SYSTEM ASSESSMENT -- SYSTEM ORGANIZATION AND MANAGEMENT

Medical Direction

1.20 DNR Policy

STANDARD:

1.20 Each local EMS agency shall have a policy regarding "Do Not Resuscitate (DNR)" situations in the prehospital setting, in accordance with the EMS Authority's DNR guidelines.

CURRENT STATUS:

Reference No. 815, Honoring Prehospital Do-Not-Resuscitate (DNR) Orders, is in compliance with the EMS Authority's DNR Guidelines and permits prehospital personnel to use supportive measures in these circumstances.

COORDINATION WITH OTHER EMS AGENCIES:

Not applicable.

NEED(S):

Standard met.

OBJECTIVE:

No further objective needed to meet standard.

TIMEFRAME FOR OBJECTIVE:

- Short-range Plan (one year or less)
- Long-range Plan (more than one year)

SYSTEM ASSESSMENT -- SYSTEM ORGANIZATION AND MANAGEMENT

Medical Direction

1.21 Determination of Death

STANDARD:

1.21 Each local EMS agency, in conjunction with the county coroner(s) shall develop a policy regarding determination of death, including deaths at the scene of apparent crimes.

CURRENT STATUS:

Reference No. 814, Determination/Pronouncement of Death in the Field, addresses issues regarding determination of death by prehospital care personnel and how prehospital care personnel deal with deaths at the scene of apparent crimes.

COORDINATION WITH OTHER EMS AGENCIES:

Not applicable.

NEED(S):

Standard met.

OBJECTIVE:

No further objective needed to meet standard.

TIMEFRAME FOR OBJECTIVE:

- Short-range Plan (one year or less)
- Long-range Plan (more than one year)

SYSTEM ASSESSMENT -- SYSTEM ORGANIZATION AND MANAGEMENT

Medical Direction

1.22 Reporting of Abuse

STANDARD:

1.22 Each local EMS agency, shall ensure that providers have a mechanism for reporting child abuse, elder abuse, and suspected SIDS deaths.

CURRENT STATUS:

The following policies address mechanisms for reporting child abuse, elder abuse, and dependent abuse:

Reference No. 822, Suspected Child Abuse Reporting Guidelines

Reference No. 824, Suspected Child Abuse Report Instructions

Reference No. 826, Suspected Child Abuse Report SS-8572

Reference No. 828, Elder Abuse Reporting Guidelines

Reference No. 829, Dependent Adult Abuse Reporting Guidelines

COORDINATION WITH OTHER EMS AGENCIES:

Not applicable for this standard.

NEED(S):

Standard met.

OBJECTIVE:

No further objective needed to meet standard.

TIMEFRAME FOR OBJECTIVE:

Short-range Plan (one year or less)

Long-range Plan (more than one year)

SYSTEM ASSESSMENT -- SYSTEM ORGANIZATION AND MANAGEMENT

Medical Direction **1.23 Interfacility Transfer**

STANDARD:

1.23 The local EMS medical director shall establish policies and protocols for scope of practice of prehospital medical personnel during interfacility transfers.

CURRENT STATUS:

Reference No. 517, Interfacility Transfer by Ambulance, provides guidelines for ambulance transport between health facilities. It describes the types of ambulance services available for interfacility transfers as well as the role of a base hospital in these transfers. Reference No. 517.1 specifically defines the scope of practice of the EMT-I and the EMT-P as they relate to the interfacility transfer of patients. Reference No. 414, Nurse Staffed Advanced Life Support Provider, defines the role and scope of practice of Nurse Staffed Ambulances for interfacility transfers.

COORDINATION WITH OTHER EMS AGENCIES:

As defined in regulations, in the event of an interfacility transfer over county lines, the medical personnel shall follow the scope of practice defined by the originating county.

NEED(S):

Standard met.

OBJECTIVE:

No further objective needed to meet standard.

TIMEFRAME FOR OBJECTIVE:

- Short-range Plan (one year or less)
- Long-range Plan (more than one year)

SYSTEM ASSESSMENT -- SYSTEM ORGANIZATION AND MANAGEMENT

Enhanced Level: Advanced Life Support

1.24 ALS System

STANDARD:

1.24 Advanced life support services shall be provided only as an approved part of a local EMS system and all ALS providers shall have written agreements with the local EMS agency.

Each local EMS agency, based on state approval, should, when appropriate, develop exclusive operating areas for ALS providers.

CURRENT STATUS:

All 38 advanced life support providers have been approved by the LEMSA; however, some ALS providers do not have written agreements with the LEMSA. These agreements are currently under negotiation.

In Los Angeles County, we do not believe it is appropriate or necessary to establish exclusive operating areas for ALS providers.

Written agreements for the provision of ALS services have been implemented with all private paramedic providers, the City of San Gabriel and the Los Angeles County Sheriff's Department. Agreements to perform Standing Field Treatment Protocols (SFTPs) are in place with the following cities: Culver City, Los Angeles City, Burbank, Long Beach and San Marino. Draft agreements for other paramedic and SFTP providers are currently being negotiated.

COORDINATION WITH OTHER EMS AGENCIES:

Not applicable to this standard.

NEED(S):

To successfully negotiate and implement additional ALS provider agreements.

OBJECTIVE:

The LEMSA shall successfully negotiate and implement ALS provider agreements with additional ALS providers.

TIMEFRAME FOR OBJECTIVE:

Short-range Plan (one year or less)

Long-range Plan (more than one year)

SYSTEM ASSESSMENT -- SYSTEM ORGANIZATION AND MANAGEMENT

Enhanced Level: Advanced Life Support **1.25 On-Line Medical Direction**

STANDARD:

1.25 Each EMS system shall have on-line medical direction, provided by a base hospital (or alternative base station) physician or authorized registered nurse/mobile intensive care nurse.

Each EMS system should develop a medical control plan which determines:

- a) the base hospital configuration for the system,
- b) the process for selecting base hospitals, including a process for designation which allows all eligible facilities to apply, and
- c) the process for determining the need for in-house medical direction for provider agencies.

CURRENT STATUS:

The base hospitals provide on-line medical direction for all jurisdictions using locally certified mobile intensive care nurses and base hospital physicians. Quality of on-line medical direction is reviewed regularly by the LEMSA during base hospital surveys. Current base hospital configuration was determined by past actions of the local EMS Commission and County Board of Supervisors. Over the past ten years, nearly half of the original base hospitals have chosen to drop base hospital status for various economical and merger reasons. The role of the base hospital is defined by Reference No. 304. Hospitals are free to apply to the LEMSA for base hospital status at any time. Base hospital designation disputes are settled by the Board of Supervisors after public hearings by the Los Angeles County EMS Commission. For three years beginning in 1996, the EMS Agency and the Healthcare Association of Southern California formed and conducted a Base Hospital Configuration Task Force to evaluate and develop a control plan.

All provider agencies are encouraged to establish in-house medical consultation/direction. The role and responsibilities of the provider medical director are delineated in Reference No. 411, Provider Agency Medical Director.

COORDINATION WITH OTHER EMS AGENCIES:

Not applicable for this standard.

NEED(S):

Standard met.

OBJECTIVE:

No further objective needed to meet standard.

TIMEFRAME FOR OBJECTIVE:

- Short-range Plan (one year or less)
- Long-range Plan (more than one year)

SYSTEM ASSESSMENT -- SYSTEM ORGANIZATION AND MANAGEMENT

Enhanced Level: Trauma Care System

1.26 Trauma System Plan

STANDARD:

- 1.26 The local EMS agency shall develop a trauma care system plan, based on community needs and utilization of appropriate resources, which determines:
- a) the optimal system design for trauma care in the EMS area, and
 - b) the process for assigning roles to system participants, including a process which allows all eligible facilities to apply.

CURRENT STATUS:

The LEMSA has an organized trauma care system which is integrated with the emergency care system. There are currently six Level I and seven Level II trauma hospitals in the County. This number of trauma facilities is significantly reduced from the original ten Level I, seven Level II and three Rural trauma facilities originally designated in 1984. The primary reason for this reduction of facilities is due to economic issues and minimal indigent medical care funding. However, in 1996, a Level II facility entered the system, St. Francis Medical Center. Approximately 25% of the County does not have a designated trauma hospital. Among the steps taken to offset this problem, an Air Ambulance Trauma Transport Program has been established to serve these areas providing access to a trauma hospital. In addition, Priority I transfer status has been given to all trauma hospitals to facilitate transfer of indigent patients to County hospitals.

Trauma hospital designation criteria in Los Angeles County were developed by consensus of local experts in trauma care and recommendations by the American College of Surgeons (ACS). The criteria contained in the County's Trauma Hospital Services Agreement meet the trauma hospital designation requirements specified in the California Code of Regulations, Title 22. The Emergency Medical Services Trauma Plan for Los Angeles County was approved by the EMS Authority in March, 1994 and describes all aspects of the system in detail. The LEMSA plans to submit a revised plan in accordance with revised Trauma Regulations when they are approved.

COORDINATION WITH OTHER EMS AGENCIES:

Not applicable for this standard.

NEED(S):

Standard met.

OBJECTIVE:

No further objective needed to meet standard.

TIMEFRAME FOR OBJECTIVE:

Short-range Plan (one year or less)

Long-range Plan (more than one year)

SYSTEM ASSESSMENT -- SYSTEM ORGANIZATION AND MANAGEMENT

Enhanced Level: Pediatric Emergency Medical and Critical Care System

1.27 Pediatric System Plan

STANDARD:

- 1.27 The local EMS agency shall develop a pediatric emergency medical and critical care system plan, based on community needs and utilization of appropriate resources, which determines:
- a) the optimal system design for pediatric emergency medical and critical care in the EMS area, and
 - b) the process for assigning roles to system participants, including a process which allows all eligible facilities to apply.

CURRENT STATUS:

The LEMSA has an organized system for pediatric emergency medical and critical care centers which include the designation of Emergency Departments Approved for Pediatrics (EDAPs) and Pediatric Critical Care Centers (PCCCs). The guidelines for insuring that pediatric patients are transported to the most accessible medical facility appropriate to their needs are defined in Reference No. 510, Pediatric Patient Destination.

The process of designation as an EDAP or PCCC was developed in conjunction with the American Academy of Pediatrics, California Chapter 2, the Los Angeles Pediatric Society, the Hospital Council of Southern California, and the Los Angeles County Department of Health Services in the early 1980s. This process includes application by interested facilities and a survey of each facility based on the established standards. The EDAP standards were updated in 1996. By the end of 1998 all EDAPs in Los Angeles County will have been surveyed based on the 1996 standards. Currently, the PCCC standards are being revised and are near completion. The PCCC survey process will begin in 1999.

COORDINATION WITH OTHER EMS AGENCIES:

Not applicable for this standard.

NEED(S):

Standard met.

OBJECTIVE:

No further objective needed to meet standard.

TIMEFRAME FOR OBJECTIVE:

- Short-range Plan (one year or less)
- Long-range Plan (more than one year)

SYSTEM ASSESSMENT -- SYSTEM ORGANIZATION AND MANAGEMENT

Enhanced Level: Exclusive Operating Area

1.28 EOA Plan

STANDARD:

1.28 The local EMS agency shall develop, and submit for state approval, a plan, based on community needs and utilization of appropriate resources, for granting of exclusive operating areas which determines:

- a) the optimal system design for ambulance service and advanced life support services in the EMS area, and
- b) the process for assigning roles to system participants, including a competitive process for implementation of exclusive operating areas.

CURRENT STATUS:

The LEMSA has developed and implemented a plan for the granting of exclusive operating areas for basic life support transportation throughout the County. The plan provided for a competitive bidding process for 12 exclusive operating areas. In addition to these areas, 33 cities have separate exclusive operating area agreements with the County. The plan was approved by the State EMSA on March 21, 1994. Under this plan, basic life support providers must respond to ninety percent of responses within the following maximum time frames: Metro/urban areas--8 minutes or less; Suburban/rural areas--20 minutes or less; and Wilderness areas--as quickly as possible.

Advanced life support is provided by a combination of public and private provider agencies which either provide transportation services, or contract with the private ambulance sector to provide basic life support transportation services.

COORDINATION WITH OTHER EMS AGENCIES:

Not applicable for these standards.

NEED(S):

Standards met.

OBJECTIVE:

No further objective needed to meet standard.

TIMEFRAME FOR OBJECTIVE:

Short-range Plan (one year or less)

Long-range Plan (more than one year)

SYSTEM ASSESSMENT -- STAFFING/TRAINING

Local EMS Agency 2.01 Assessment of Needs

STANDARD:

2.01 The local EMS agency shall routinely assess personnel and training needs.

CURRENT STATUS:

In Los Angeles County, manpower needs are assessed on an ongoing basis by individual BLS and ALS provider agencies. Identified problems are brought to the attention of the LEMSA. Countywide training needs are assessed by the County's Paramedic Training Institute (PTI) and other LEMSA staff with input from various committees including the Field Advisory, Base Advisory and Education Advisory Committees as well as the EMS Commission itself. A yearly EMS update is developed by the PTI. All MICNs and accredited EMT-Ps are required to attend applicable portions of these update sessions. Although not required, many EMT-Is also attend these updates. In 1997, the EMT-I Expanded Scope of Practice was implemented. Training of all personnel will be completed no later than July 1, 1999.

COORDINATION WITH OTHER EMS AGENCIES:

Not applicable for this standard.

NEED(S):

Standard met.

OBJECTIVE:

No further objective needed to meet standard.

TIMEFRAME FOR OBJECTIVE:

Short-range Plan (one year or less)

Long-range Plan (more than one year)

SYSTEM ASSESSMENT -- STAFFING/TRAINING

Local EMS Agency **2.02 Approval of Training**

STANDARD:

2.02 The EMS Authority and/or local EMS agencies shall have a mechanism to approve EMS education programs which require approval (according to regulations) and shall monitor them to ensure that they comply with state regulations.

CURRENT STATUS:

The LEMSA is responsible for review and approval of EMT-I and EMT-P education programs as well as EMT-ID and MICN training courses. EMT-I training programs are approved by the LEMSA for a four year period upon successful demonstration of compliance with regulations; 54 EMT-I programs are currently approved. Of those, 19 programs are conducted by public safety agencies who are authorized to certify EMT-Is.

Three EMT-P training programs are currently approved. Programs are reviewed every two years. The LEMSA directly reviews and approves two of the three programs, Daniel Freeman Paramedic School and Mount San Antonio College Paramedic Program. The LEMSA's own training program, Paramedic Training Institute, is reviewed for approval by another local EMS agency.

MICN training programs are approved by the LEMSA according to LEMSA policy. There are currently six approved MICN training programs.

EMT-ID programs are approved by the LEMSA on a provider agency basis and are audited initially in one year and every 1-2 years thereafter. There are currently 18 approved EMT-ID provider agencies and one police department certified in AED.

The LEMSA has the following policies in place regarding training program approvals:

- Reference No. 901, Criteria for Approval/Expansion of EMT-P Training Programs
- Reference No. 906, Criteria for Approval of EMT-I Training Programs

COORDINATION WITH OTHER EMS AGENCIES:

Not applicable to this standard.

NEED(S):

Standard met.

OBJECTIVE:

No further objective needed to meet standard.

TIMEFRAME FOR OBJECTIVE:

Short-range Plan (one year or less)

Long-range Plan (more than one year)

SYSTEM ASSESSMENT -- STAFFING/TRAINING

Local EMS Agency

2.03 Personnel

STANDARD:

2.03 The local EMS agency shall have mechanisms to accredit, authorize, and certify prehospital medical personnel and conduct certification reviews, in accordance with state regulations. This shall include a process for prehospital providers to identify and notify the local EMS agency of unusual occurrences which could impact EMS personnel certification.

CURRENT STATUS:

The LEMSA has the following policies in place for accreditation, authorization and certification of prehospital personnel:

- Reference No. 1004, Emergency Medical Technician Paramedic (EMT- P) Licensure and Continuous Licensure
- Reference No. 1006, EMT-P Accreditation and Continuous Accreditation (under review)
- Reference No. 1010, Mobil Intensive Care Nurse (MICN) Certification
- Reference No. 1011, Mobil Intensive Care Nurse (MICN) Field Observation
- Reference No. 1012, Mobil Intensive Care Nurse (MICN) Recertification
- Reference No. 1014, Requirements for EMT-I Certification/Recertification/Challenge Procedures
- Reference No. 1022, EMT-I Defibrillation (EMT-ID) Accreditation

Reference No. 214, Base Hospital and Provider Agency Responsibilities for Reporting Infractions or Performance Deficiencies, provides guidelines for reporting possible violations of H & S Code 1798.200, subsections (a) through (c).

Reference No. 216, EMS Personnel Certification Review Process, provides policies and procedures for implementation of the State Emergency Medical Services Personnel Certification Review Process Guidelines.

Reference No. 220, Denial of Prehospital Care Certification, establishes policies for the denial at the time of application of initial certification or the denial of certification renewal for prehospital care personnel.

COORDINATION WITH OTHER EMS AGENCIES:

Not applicable for this standard.

NEED(S):

Standard met.

OBJECTIVE:

No further objective needed to meet standard.

SYSTEM ASSESSMENT -- STAFFING/TRAINING

Local EMS Agency

2.03 Personnel

(continued)

TIMEFRAME FOR OBJECTIVE:

- Short-range Plan (one year or less)
- Long-range Plan (more than one year)

SYSTEM ASSESSMENT -- STAFFING/TRAINING

Dispatchers

2.04 Dispatch Training

STANDARD:

2.04 Public safety answering point (PSAP) operators with medical responsibility shall have emergency medical orientation and all medical dispatch personnel (both public and private) shall receive emergency medical dispatch training in accordance with the EMS Authority's Emergency Medical Dispatch Guidelines.

Public safety answering point (PSAP) operators with medical dispatch responsibilities and all medical dispatch personnel (both public and private) should be trained and tested in accordance with the EMS Authority's Emergency Medical Dispatch Guidelines.

CURRENT STATUS:

There are over 100 PSAPs within the local EMS system. These PSAPs are maintained by local public safety agencies and not directly by the LEMSA. Some of the PSAPs handle the medical dispatch directly but the majority forward the calls to a dispatch center, i.e., Los Angeles County Fire Department Dispatch Center handles medical dispatch for up to 74 PSAPs.

The LEMSA Medical Director has informally reviewed the PSAP Medical Dispatch Guidelines of the three largest provider agencies.

COORDINATION WITH OTHER EMS AGENCIES:

There is currently no known coordination of PSAPs with other EMS agencies.

NEED(S):

To determine what level of medical responsibility existing PSAPs have, if any. If medical responsibility exists, to identify and ensure medical orientation and training of PSAP personnel in accordance with the EMSA's Emergency Medical Dispatch Guidelines and pending Dispatch Regulations.

OBJECTIVE:

The LEMSA shall ensure medical orientation and training of PSAP personnel in accordance with the EMSA's Emergency Medical Dispatch Guidelines and pending Dispatch Regulations.

TIMEFRAME FOR OBJECTIVE:

Short-range Plan (one year or less)

Long-range Plan (more than one year)

SYSTEM ASSESSMENT -- STAFFING/TRAINING

First Responders (non-transporting)

2.05 First Responder Training

STANDARD:

2.05 At least one person on each non-transporting EMS first response unit shall have been trained to administer first aid and CPR within the previous three years.

At least one person on each non-transporting EMS first response unit should be currently certified to provide defibrillation and have available equipment commensurate with such scope of practice, when such a program is justified by the response times for other ALS providers.

At least one person on each non-transporting EMS first response unit should be currently certified at the EMT-I level and have available equipment commensurate with such scope of practice.

CURRENT STATUS:

The vast majority of public safety agencies in the County have a minimum certification requirement of EMT-I and through this certification and recertification process are initially trained beyond the level of first aid and CPR. Retraining is completed as part of the continuing education/refresher course process. As specified in 1797.182, all other public provider agencies are required to train their personnel to the minimum level. The majority of EMT-I programs are approved by the LEMSA, while a small number of fire agencies obtain program approval through the State Fire Marshall's Office. Monitoring of the training at the level of first aid and CPR is delegated to the individual agencies.

COORDINATION WITH OTHER EMS AGENCIES:

Not applicable for this standard.

NEED(S):

Standard met.

OBJECTIVE:

No further objective needed to meet standard.

TIMEFRAME FOR OBJECTIVE:

Short-range Plan (one year or less)

Long-range Plan (more than one year)

SYSTEM ASSESSMENT -- STAFFING/TRAINING

First Responders (non-transporting)

2.06 Response

STANDARD:

2.06 Public safety agencies and industrial first aid teams shall be encouraged to respond to medical emergencies and shall be utilized in accordance with local EMS agency policies.

CURRENT STATUS:

In Los Angeles County, those agencies that seek to participate in assigned jurisdictions are incorporated to the degree possible and desirable. A great deal of time and effort is spent on coordination of various entities to ensure maximal cooperation.

One police department has incorporated an AED program and trained personnel for skill use. Many law enforcement agencies with personnel trained to the level of Public Safety are inquiring about incorporating AED.

COORDINATION WITH OTHER EMS AGENCIES:

Not applicable for this standard.

NEED(S):

Standard met.

OBJECTIVE:

No further objective needed to meet standard.

TIMEFRAME FOR OBJECTIVE:

Short-range Plan (one year or less)

Long-range Plan (more than one year)

SYSTEM ASSESSMENT -- STAFFING/TRAINING

First Responders (non-transporting)
2.07 Medical Control

STANDARD:

2.07 Non-transporting EMS first responders shall operate under medical direction policies, as specified by the local EMS agency medical director.

CURRENT STATUS:

Non-transporting EMS first responders operate under medical direction policies, as specified by the Los Angeles County Prehospital Care Policy Manual.

COORDINATION WITH OTHER EMS AGENCIES:

Not applicable for this standard.

NEED(S):

Standard met.

OBJECTIVE:

No further objective needed to meet standard.

TIMEFRAME FOR OBJECTIVE:

- Short-range Plan (one year or less)
- Long-range Plan (more than one year)

SYSTEM ASSESSMENT -- STAFFING/TRAINING

Transporting Personnel

2.08 EMT-I Training

STANDARD:

2.08 All emergency medical transport vehicle personnel shall be currently certified at least at the EMT-I level.

If advanced life support personnel are not available, at least one person on each emergency medical transport vehicle should be trained to provide defibrillation.

CURRENT STATUS:

According to Los Angeles County Code, Chapter 7.16, which applies to private emergency medical transport vehicles (ambulances), both driver and attendant are required to be EMT-I certified. In the County, all public providers with transport capabilities have a minimum requirement of EMT-I level certification and in fact, the majority of transporting vehicles within the public sector are staffed with two EMT-Paramedics.

In the one city where ALS services are not provided by the jurisdictional agency, an EMT-I Defibrillation program is in place.

COORDINATION WITH OTHER EMS AGENCIES:

Not applicable for this standard.

NEED(S):

Standard met.

OBJECTIVE:

No further objective needed to meet standard.

TIMEFRAME FOR OBJECTIVE:

Short-range Plan (one year or less)

Long-range Plan (more than one year)

SYSTEM ASSESSMENT -- STAFFING/TRAINING

Hospital
2.09 CPR Training

STANDARD:

2.09 All allied health personnel who provide direct emergency patient care shall be trained in CPR.

CURRENT STATUS:

All hospitals with Basic and Comprehensive Emergency Medical Services permits are approved as 9-1-1 receiving hospitals. Monitoring of this permit status is conducted through the DHS Licensing & Certification Division. It is the experience of the auditors that all hospitals with these permits require allied health personnel to be trained in CPR.

COORDINATION WITH OTHER EMS AGENCIES:

Not applicable for this standard.

NEED(S):

Standard met.

OBJECTIVE:

No further objective needed to meet standard.

TIMEFRAME FOR OBJECTIVE:

- Short-range Plan (one year or less)
- Long-range Plan (more than one year)

SYSTEM ASSESSMENT -- STAFFING/TRAINING

Hospital

2.10 Advanced Life Support

STANDARD:

2.10 All emergency department physicians and registered nurses who provide direct emergency patient care shall be trained in advanced life support.

All emergency department physicians should be certified by the American Board of Emergency Medicine.

CURRENT STATUS:

As specified in the Paramedic Base Hospital Agreements, all MICNs are required to maintain current ACLS certification and all base hospital physicians are required to have Board certification or have satisfied the requirements to take the emergency medical board and/or ACLS certification. All hospitals with Basic Emergency Medical Services permits are approved as 9-1-1 receiving hospitals and are JCAHO approved. JCAHO requirements ensures compliance with this standard for ACLS training. Monitoring for compliance is conducted as a component of base hospital surveys conducted, at a minimum, every 3 years.

All hospitals with Basic and Comprehensive Emergency Medical Services permits are approved as 9-1-1 receiving hospitals. Monitoring of this permit status is conducted through the DHS Health Facilities Division, Acute Ancillary Services Section. It is the experience of the auditors that all hospitals with these permits require physicians and nurses to be trained in ACLS.

COORDINATION WITH OTHER EMS AGENCIES:

Not applicable for this standard.

NEED(S):

Standard met.

OBJECTIVE:

No further objective needed to meet standard.

TIMEFRAME FOR OBJECTIVE:

- Short-range Plan (one year or less)
- Long-range Plan (more than one year)

SYSTEM ASSESSMENT -- STAFFING/TRAINING

Enhanced Level: Advanced Life Support

2.11 Accreditation Process

STANDARD:

2.11 The local EMS agency shall establish a procedure for accreditation of advanced life support personnel which includes orientation to system policies and procedures, orientation to the roles and responsibilities of providers within the local EMS system, testing in any optional scope of practice, and enrollment into the local EMS agency's quality assurance/quality improvement process.

CURRENT STATUS:

The LEMSA has in place a procedure for Los Angeles County accreditation of EMT-Paramedics. The procedure includes an orientation to the local system and testing in optional scope of practice. Accreditation and employment with an approved paramedic provider agency automatically enrolls the ALS provider in the EMS System Quality Improvement Program. Reference No. 1006, EMT-Paramedic Accreditation and Continuing Accreditation, is currently under review by committees.

COORDINATION WITH OTHER EMS AGENCIES:

Not applicable for this standard.

NEED(S):

Standard met.

OBJECTIVE:

No further objective needed to meet standard.

TIMEFRAME FOR OBJECTIVE:

- Short-range Plan (one year or less)
- Long-range Plan (more than one year)

SYSTEM ASSESSMENT -- STAFFING/TRAINING

Enhanced Level: Advanced Life Support

2.12 Early Defibrillation

STANDARD:

2.12 The local EMS agency shall establish policies for local accreditation of public safety and other basic life support personnel in early defibrillation.

CURRENT STATUS:

Reference No. 412, EMT-I Defibrillation (EMT-ID) Program Approval, defines the approval process for providers of EMT-ID. Currently, 15 public safety agencies and 3 private agencies employing EMT-Is are approved as EMT-ID providers. Since most fire departments in Los Angeles County require EMT-I as the minimum certification level, all EMT-ID programs utilize EMT-I level providers.

Reference No. 1022, EMT-I Defibrillation (EMT-ID) Accreditation defines the process for EMT-I's to become accredited in the optional skill of defibrillation.

One police department, Glendora Police Department, has implemented an AED program based on the County's EMT-D program. A policy specifically for AED program approval for Public Safety Personnel is under development.

COORDINATION WITH OTHER EMS AGENCIES:

Not applicable to this standard.

NEED(S):

To complete and approve a policy for Public Safety Personnel AED programs.

OBJECTIVE:

The LEMSA shall approve and implement policy for Public Safety Personnel AED program approval.

TIMEFRAME FOR OBJECTIVE:

Short-range Plan (one year or less)

Long-range Plan (more than one year)

SYSTEM ASSESSMENT -- STAFFING/TRAINING

Enhanced Level: Advanced Life Support
2.13 Base Hospital Personnel

STANDARD:

2.13 All base hospital/alternative base station personnel who provide medical direction to prehospital personnel shall be knowledgeable about local EMS agency policies and procedures and have training in radio communications techniques.

CURRENT STATUS:

Reference No.1010 outlines the LEMSA requirements for certification as a Mobil Intensive Care Nurse (MICN). The LEMSA also approves MICN Development Courses. MICN Development Courses are required to include an orientation to the EMS system, an orientation and testing on LEMSA policies, procedures and protocols, and an introduction to radio procedures. Reference No. 904, Criteria for Approval of MICN Development Courses was recently developed.

As specified in Reference No. 304, Role of the Base Hospital and in the Base Hospital Agreement , base hospitals are required to ensure that each base hospital physician who directs a paramedic in advanced life support has completed a prehospital care course.

COORDINATION WITH OTHER EMS AGENCIES:

Not applicable for this standard.

NEED(S):

Standard met.

OBJECTIVE:

No further objective needed to meet standard.

TIMEFRAME FOR OBJECTIVE:

- Short-range Plan (one year or less)
- Long-range Plan (more than one year)

SYSTEM ASSESSMENT -- COMMUNICATIONS

Communications Equipment

3.01 Communication Plan*

STANDARD:

3.01 The local EMS agency shall plan for EMS communications. The plan shall specify the medical communications capabilities of emergency medical transport vehicles, non-transporting advanced life support responders, and acute care facilities and shall coordinate the use of frequencies with other users.

The local EMS agency's communications plan should consider the availability and use of satellites and cellular telephones.

CURRENT STATUS:

Twenty three base stations and 38 paramedic provider agencies, which account for 263 paramedic units (including 3 special event agencies), have access to 9 medical channels. Medical channels are assigned to the hospital base station. Communication assignments have been developed and implemented. Hospital base stations are assigned a primary channel and, in most cases, a back-up frequency. LEMSA communication standards dictate that EMS provide ninety percent coverage, ninety percent of the time. The standard is maintained by the installation of local base stations at the hospital site and remote base stations at strategically placed sites to overcome communication problems caused by terrain. LEMSA has installed and maintains 11 remote base stations on the mainland and three remote base stations on Catalina Island. The Hospital Emergency Administrative Radio (HEAR) is installed in 79% of the ALS vehicles (combination transport and non-transport) and 25% of the BLS vehicles, the majority of which are privately owned ambulances which respond as a secondary transporter. 95% of the health care facilities (excluding clinics and skilled nursing facilities) have a HEAR. The Rapid Emergency Digital Data Interface Network is installed in 80 acute care hospitals (911 receiving hospitals). A terminal is also installed at Operations Control Division for Los Angeles City Fire Department allowing access to all ALS field units. The County Wide Integrated Radio System (CWIRS) is installed at all Los Angeles County operated hospitals, comprehensive health centers and clinics. Cellular telephone communication is available and listed as a back-up communication tool if other forms of medical communication fails.

COORDINATION WITH OTHER EMS AGENCIES:

Los Angeles County shares the HEAR primary frequency (155.340 MHz) with San Bernardino, Ventura and Riverside Counties and would be used to interface with those counties. The secondary HEAR frequency (155.280 MHz) used exclusively by Orange County is monitored and available for coordination with Orange County.

NEED(S):

To install ReddiNet at remaining acute health care facilities, the HEAR on all EMS vehicles, and ReddiNet terminals at each dispatch center.

OBJECTIVE:

The LEMSA shall require system participants to install the following:

- Installation of ReddiNet at all health care facilities
- Installation of HEAR on all EMS vehicles
- Installation of a ReddiNet terminal at each dispatch center

SYSTEM ASSESSMENT -- COMMUNICATIONS

Communications Equipment

3.01 Communication Plan

(continued)

TIMEFRAME FOR OBJECTIVE:

Short-range Plan (one year or less)

Long-range Plan (more than one year)

SYSTEM ASSESSMENT -- COMMUNICATIONS

Communications Equipment

3.02 Radios

STANDARD:

3.02 Emergency medical transport vehicles and non-transporting advanced life support responders shall have two-way radio communications equipment which complies with the local EMS communications plan and which provides for dispatch and ambulance-to-hospital communication.

Emergency medical transport vehicles should have two-way radio communications equipment which complies with the local EMS communications plan and which provides for vehicle-to-vehicle (including both ambulance and non-transporting first responder units) communication.

CURRENT STATUS:

All emergency medical transport vehicles and non-transporting ALS responders are equipped with two way radios to assist in dispatching. Dispatch radios are under the control of the operating agency. The Hospital Emergency Administrative Radio (HEAR) is installed in 79% of the emergency medical transport vehicles and non-transporting ALS responders and 25% of the BLS vehicles which allow for ambulance to hospital communications.

The LEMSA is currently involved in a pilot satellite system project.

COORDINATION WITH OTHER EMS AGENCIES:

Not applicable for this standard.

NEED(S):

To implement a mechanism of communication between all transporting units and receiving hospitals.

OBJECTIVE:

The LEMSA shall encourage provider agencies to establish a mechanism for communication between all transporting vehicles and receiving hospitals. This will most likely be met by the installation of a HEAR in each emergency medical transport vehicle and non-transporting ALS responder vehicles. The LEMSA, in conjunction with system participants, shall continue to explore alternative communication systems, e.g., satellite or cellular systems, to enhance capabilities, especially in disaster situations.

TIMEFRAME FOR OBJECTIVE:

Short-range Plan (one year or less)

Long-range Plan (more than one year)

SYSTEM ASSESSMENT -- COMMUNICATIONS

Communications Equipment

3.03 Interfacility Transfer*

STANDARD:

3.03 Emergency medical transport vehicles used for interfacility transfers shall have the ability to communicate with both the sending and receiving facilities. This could be accomplished by cellular telephone.

CURRENT STATUS:

All ALS equipped vehicles have med channel capabilities. 22% of all ambulances performing interfacility transfers have the ability to communicate with the sending and receiving facilities using the Hospital Emergency Administrative Radio (HEAR). On board cellular telephones are currently not a requirement for interfacility transports although a small number do have them.

COORDINATION WITH OTHER EMS AGENCIES:

HEAR (155.340 MHz) is shared with Ventura, San Bernardino and Riverside Counties. Emergency medical transport vehicles performing an interfacility transfer may communicate with the receiving facility (depending on distance) directly. If distance is a problem, they may use the Medical Alert Center to relay information. Vehicles based in Orange County using the local HEAR frequency (155.280 MHz) may relay through the Medical Alert Center to the receiving facility pending purchased equipment installation.

NEED(S):

To implement a mechanism of communication between all transporting units and receiving hospitals.

OBJECTIVE:

The LEMSA shall encourage provider agencies to establish a mechanism for communication between all transporting vehicles and receiving hospitals. Achievement of this objective will most likely be through installation of a HEAR in each emergency medical transport vehicle and non-transporting ALS responder vehicles. The LEMSA in conjunction with system participants shall continue to explore alternative communication systems, e.g., satellite or cellular systems, to enhance capabilities, especially in disaster situations.

TIMEFRAME FOR OBJECTIVE:

Short-range Plan (one year or less)

Long-range Plan (more than one year)

SYSTEM ASSESSMENT -- COMMUNICATIONS

Communications Equipment

3.04 Dispatch Center

STANDARD:

3.04 All emergency medical transport vehicles where physically possible, (based on geography and technology), shall have the ability to communicate with a single dispatch center or disaster communications command post.

CURRENT STATUS:

Because of multi-provider (ALS/BLS) agencies, a single dispatch center is not feasible in a system this large. All emergency transport vehicles are equipped with a two-way radio system that is designed, maintained and owned by the individual provider to communicate with their dispatch centers. Except for limited access permitted by Los Angeles County Fire to individual transport vendors, there is no common interface or single dispatch center.

The Hospital Emergency Administrative Radio System (HEAR) 155.340 MHz is the primary voice frequency utilized by the Department of Health Services' Emergency Operations Center and is installed in 79% of emergency transport vehicles. The County Wide Integrated Radio System (CWIRS) 800 MHz trunked radio system is installed on all DHS emergency transport vehicles. An interface exist between CWIRS and Los Angeles County Fire radio frequencies.

COORDINATION WITH OTHER EMS AGENCIES:

The HEAR is shared with neighboring counties (except Orange County who is on 155.280 MHz). Emergency transport vehicles within these counties can access Los Angeles County using this frequency.

NEED(S):

To the degree possible in this large system, this standard is met. As addressed in Standards 3.02 through 3.03, there is a need to install HEARs on the remaining 21% of emergency transport vehicles.

OBJECTIVE:

No further objective needed to meet standard.

TIMEFRAME FOR OBJECTIVE:

Short-range Plan (one year or less)

Long-range Plan (more than one year)

SYSTEM ASSESSMENT -- COMMUNICATIONS

Communications Equipment

3.05 Hospitals

STANDARD:

3.05 All hospitals within the local EMS system shall (where physically possible) have the ability to communicate with each other by two-way radio.

All hospitals should have direct communications access to relevant services in other hospitals within the system (e.g., poison information, pediatric and trauma consultation).

CURRENT STATUS:

There are over 140 health care facilities (hospitals) in Los Angeles County; 82 are classified as paramedic receiving hospitals (basic receiving hospitals). All paramedic receiving hospitals are equipped with the Hospital Emergency Administrative Radio (HEAR) 155.340 MHz. Of the remaining 54 non-receiving facilities, 45 facilities have the HEAR installed and 17 clinics have had HEARs installed over the past two years.

Hospitals have access to specialized services (e.g., burns, trauma, neonatology) through the Medical Alert Center (MAC) via telephone.

Hospitals have begun to organize internal communications by pooling employees who are licensed HAM radio operators. A few facilities have expanded HAM communications to include sister hospitals and local agencies. There is currently no systemwide organization or protocols to utilize HAM radio frequencies.

COORDINATION WITH OTHER EMS AGENCIES:

Hospitals have the ability to communicate with hospitals in Ventura, San Bernardino and Riverside Counties through the HEAR on 155.340 Mhz. Hospitals needing to access Orange County would require a separate transceiver tuned to 155.280 MHz.

NEED(S):

1. To expand installation of the HEAR to all health care facilities.
2. To further develop and organize a hospital emergency radio system utilizing volunteer HAM radio operators.

OBJECTIVE:

The LEMSA shall install the HEAR at additional health care facilities and shall form a volunteer HAM radio organization targeted for back-up hospital communications.

TIMEFRAME FOR OBJECTIVE:

- Short-range Plan (one year or less)
- Long-range Plan (more than one year)

SYSTEM ASSESSMENT -- COMMUNICATIONS

Communications Equipment

3.06 MCI/Disasters

STANDARD:

3.06 The local EMS agency shall review communications linkages among providers (prehospital and hospital) in its jurisdiction for their capability to provide service in the event of multi-casualty incidents and disasters.

CURRENT STATUS:

The LEMSA through the Medical Alert Center conducts daily radio checks at eight hour intervals to verify the hardware status of the Hospital Emergency Administrative Radio (HEAR) 155.340 MHz. The audio transmissions of selected hospitals verify both receiving and transmitting capabilities of the LEMSA, remote transmitters and hospitals. Hospitals not actively polled are aware of the scheduled roll calls and are able to monitor the transmissions; absence of the hospitals ability to hear the roll call indicates a problem with that individual hospital.

The Rapid Emergency Digital Data Interface Network (ReddiNet) is designed as a constant polling system. Hospitals equipped with ReddiNet (currently 80 hospitals) are electronically polled on an average of three times per minute. Failing to respond to the electronic poll alerts the system control point at the Medical Alert Center (MAC) of the hospitals loss of their ReddiNet communications link. Coordinators at the MAC will attempt to communicate with the affected hospital(s) through other methods (e.g., telephone, HEAR).

The LEMSA conducts a yearly base station communication survey. The communication survey is reviewed by LEMSA, County radio engineering and private communication vendors to identify and correct any communication problems. In addition, an ongoing process is in place where hospitals and providers can notify the EMS communication representative of any communication difficulties.

DHS facilities utilize the County Wide Integrated Radio System (CWIRS) as an interdepartmental communication modality. LEMSA conducts monthly polls of all departmental users to determine access, coverage and problems.

The LEMSA is researching the potential of developing policies, procedures and training in the organization of HAM radio operators for a systemwide contingent radio tool.

COORDINATION WITH OTHER EMS AGENCIES:

Hospitals have the ability to communicate with hospitals in Ventura, San Bernardino and Riverside Counties through the HEAR on 155.340 MHz. Hospitals needing to access Orange County would require a separate transceiver tuned to 155.280 MHz. The Department of Health Services Emergency Operations Center (DHS EOC) has the ability to communicate with all neighboring counties including Orange.

SYSTEM ASSESSMENT -- COMMUNICATIONS

Communications Equipment

3.06 MCI/Disasters

(continued)

NEED(S):

1. To install the HEAR at additional health care facilities.
2. To develop and organize a hospital emergency radio system utilizing volunteer HAM radio operators.
3. To establish scheduled radio checks with neighboring counties.

OBJECTIVE:

The LEMSA shall install the HEAR at additional health care facilities, form a volunteer HAM radio organization targeted for back-up hospital communications, and schedule radio checks with neighboring counties.

TIMEFRAME FOR OBJECTIVE:

Short-range Plan (one year or less)

Long-range Plan (more than one year)

SYSTEM ASSESSMENT -- COMMUNICATIONS

Public Access

3.07 9-1-1 Planning/Coordination

STANDARD:

3.07 The local EMS agency shall participate in ongoing planning and coordination of the 9-1-1 telephone service.

The local EMS agency should promote the development of enhanced 9-1-1 systems.

CURRENT STATUS:

9-1-1 calls are received at a public safety answering point (PSAP) and routed to the responsible agency (police, fire or medical aid). In the case of medical aid, some jurisdictions have dispatchers determine the gravity of the caller's complaint and the level of response required. Most jurisdictions however, are not set up for tiered dispatch and therefore, respond to all requests for medical aid at the ALS level. Public telephone access is free and information on obtaining emergency help is provided in English and Spanish on call boxes. Difficulties with other languages are handled by the dispatcher who has access to translation assistance. Provision is made for those who are deaf or mute via TTY and TDD services.

COORDINATION WITH OTHER EMS AGENCIES:

Not applicable for this standard.

NEED(S):

Standard met.

OBJECTIVE:

No further objective needed to meet standard.

TIMEFRAME FOR OBJECTIVE:

- Short-range Plan (one year or less)
- Long-range Plan (more than one year)

SYSTEM ASSESSMENT -- COMMUNICATIONS

Public Access

3.08 9-1-1 Public Education

STANDARD:

3.08 The local EMS agency shall be involved in public education regarding the 9-1-1 telephone service as it impacts system access.

CURRENT STATUS:

Brochures are available that describe the services which 9-1-1 provides. Bumper stickers are affixed to public safety vehicles (police, fire, rescue) instructing the public on the 911 emergency system. Telephone directories provide information in the common languages spoken in the area on what to do in emergencies. Signs in buildings such as restaurants, airports and malls are posted in public areas instructing on the use of the 9-1-1 system. Television (including cable services) radio, newspapers and billboards provide public service announcements to educate and inform the public.

COORDINATION WITH OTHER EMS AGENCIES:

Not applicable for this standard.

NEED(S):

To expand education for the public on what constitutes a true emergency and what non-emergency services are available in the community.

OBJECTIVE:

The LEMSA, in conjunction with other system participants, shall work to create an updated brochure describing 9-1-1 services and alternate non-emergency transportation (e.g., Metro Access, Dial-A-Ride, Medi-Trans, etc.) as well as other forms of public information.

TIMEFRAME FOR OBJECTIVE:

- Short-range Plan (one year or less)
- Long-range Plan (more than one year) (ongoing)

SYSTEM ASSESSMENT -- COMMUNICATIONS

Resource Management

3.09 Dispatch Triage

STANDARD:

3.09 The local EMS agency shall establish guidelines for proper dispatch triage which identifies appropriate medical response.

The local EMS agency should establish an emergency medical dispatch priority reference system, including systemized caller interrogation, dispatch triage policies, and pre-arrival instructions.

CURRENT STATUS:

Reference No. 808, Base Hospital Contact, defines the guidelines for determining when a response by ALS personnel is required. Chief complaints identified in Reference No. 808 require an ALS dispatch response. The LEMSA has informally reviewed the Medical Dispatch Guidelines of the three largest provider agencies to ensure medical appropriateness.

COORDINATION WITH OTHER EMS AGENCIES:

Not applicable for this standard.

NEED(S):

To establish LEMSA guidelines for proper dispatch triage which identifies appropriate medical response based on current practice and community standards.

OBJECTIVE:

In conjunction with system participants, the LEMSA shall develop guidelines for dispatch triage.

TIMEFRAME FOR OBJECTIVE:

Short-range Plan (one year or less)

Long-range Plan (more than one year)

SYSTEM ASSESSMENT -- COMMUNICATIONS

Resource Management **3.10 Integrated Dispatch**

STANDARD:

3.10 The local EMS system shall have a functionally integrated dispatch with systemwide emergency services coordination, using standardized communications frequencies.

The local EMS agency should develop a mechanism to ensure appropriate systemwide ambulance coverage during periods of peak demand.

CURRENT STATUS:

The local EMS system uses a computer gated 9-1-1 system which routes all emergency medical calls to the appropriate local PSAP. Systemwide emergency coordination is provided by the LEMSA's Medical Alert Center (MAC) which uses standardized communication frequencies to ensure appropriate system ambulance coverage at all times.

COORDINATION WITH OTHER EMS AGENCIES:

Local communication frequency allocation and communication systems are developed in coordination with surrounding EMS agencies to decrease the potential for communication interference.

NEED(S):

Standard met.

OBJECTIVE:

No further objective needed to meet standard.

TIMEFRAME FOR OBJECTIVE:

- Short-range Plan (one year or less)
- Long-range Plan (more than one year)

SYSTEM ASSESSMENT -- RESPONSE/TRANSPORTATION

Universal Level

4.01 Service Area Boundaries*

STANDARD:

4.01 The local EMS agency shall determine the boundaries of emergency medical transportation service areas.

The local EMS agency should secure a county ordinance or similar mechanism for establishing emergency medical transport service areas (e.g., ambulance response zones).

CURRENT STATUS:

The LEMSA has developed and implemented a plan for exclusive operating areas for basic life support transportation services throughout the County. Emergency medical transportation service area boundaries for the unincorporated area of the County and 55 cities were determined by population, area to be served, number of emergency responses, and payer mix. Service areas are defined by individual ambulance service agreements with private ambulance operators or cities. Emergency medical transportation service area boundaries for the remaining 33 cities were determined by each city's corporate boundary.

COORDINATION WITH OTHER EMS AGENCIES:

Ambulances licensed in Los Angeles County are permitted to transport patients from locations within Los Angeles County to points both within and outside of the County borders. They are not permitted to pick up patients outside of the County border and transport them into Los Angeles County. However, ambulances may respond to mutual aid requests from other counties.

NEED(S):

Standards met.

OBJECTIVE:

No further objective needed to meet standard.

TIMEFRAME FOR OBJECTIVE:

- Short-range Plan (one year or less)
- Long-range Plan (more than one year)

SYSTEM ASSESSMENT -- RESPONSE/TRANSPORTATION

Universal Level

4.02 Monitoring

STANDARD:

4.02 The local EMS agency shall monitor emergency medical transportation services to ensure compliance with appropriate statutes, regulations, policies, and procedures.

The local EMS agency should secure a county ordinance or similar mechanism for licensure of emergency medical transport services. These should be intended to promote compliance with overall system management and should, wherever possible, replace any other local ambulance regulatory programs within the EMS area.

CURRENT STATUS:

Los Angeles County has developed an ordinance that defines minimum standards for licensure of emergency medical transport service operators. Standards include response time parameters, licensure and certification of ambulance personnel, inspection and licensure of ambulance vehicles, service requirements, billing rates, and required insurance coverage. In addition, the LEMSA has agreements with exclusive operating area ambulance providers that reinforce ordinance standards and further define ambulance service requirements. Monitoring of emergency medical transportation services is conducted on at least a quarterly basis, and includes review of response time records, fiscal records, and administrative responsibilities including review of personnel licensure and certifications, vehicle records, etc.

City exclusive operating area agreements require a cities to prepare, retain, and make available to Director for inspection, review, and photocopying, if necessary, such ambulance and emergency medical services records as are required of ambulance and prehospital emergency care operators by the California Highway Patrol, Division 2.5 of the Health & Safety Code, the California Code of Regulations, and the Los Angeles County Prehospital Care Policy Manual.

COORDINATION WITH OTHER EMS AGENCIES:

Not applicable for these standards.

NEED(S):

To monitor ambulance providers serving independent cities for compliance with response time standards. This will require regulatory revisions.

OBJECTIVE:

The LEMSA shall monitor response time standards of ambulance providers serving independent cities.

TIMEFRAME FOR OBJECTIVE:

Short-range Plan (one year or less)

Long-range Plan (more than one year)

SYSTEM ASSESSMENT -- RESPONSE/TRANSPORTATION

Universal Level

4.03 Classifying Medical Requests

STANDARD:

4.03 The local EMS agency shall determine criteria for classifying medical requests (e.g., emergent, urgent, and non-emergent) and shall determine the appropriate level of medical response to each.

CURRENT STATUS:

Reference No. 808, Base Contact Criteria, is the basis for classifying emergency medical requests. Those chief complaints or patient circumstances described in this policy are essentially considered "emergent or urgent" for purposes of determining need for ALS response. Those chief complaints or patient circumstances not identified in this policy are considered "non-emergent" and may be responded to by BLS level personnel. This is considered the basis for tiered level dispatch application. Recently "Crush Injury/Syndrome" was added to Reference 808 as required base contact.

COORDINATION WITH OTHER EMS AGENCIES:

Not required for this standard.

NEED(S):

Standard met.

OBJECTIVE:

No further objective needed to meet standard.

TIMEFRAME FOR OBJECTIVE:

- Short-range Plan (one year or less)
- Long-range Plan (more than one year)

SYSTEM ASSESSMENT -- RESPONSE/TRANSPORTATION

Universal Level

4.04 Pre-scheduled Responses

STANDARD:

4.04 Service by emergency medical transport vehicles which can be pre-scheduled without negative medical impact shall be provided only at levels which permit compliance with local EMS agency policy.

CURRENT STATUS:

Pre-scheduled emergency medical transport is provided by private ALS and BLS ambulance companies in Los Angeles County. Reference No. 517, Interfacility Transfer by Ambulance, outlines the parameters that must be followed for interfacility transports. EMT-Is and EMT-Ps may not exceed their scope of practice as outlined in Reference No. 517.1, Interfacility Transfer: EMT-I/EMT-P Scope of Practice.

COORDINATION WITH OTHER EMS AGENCIES:

Not applicable for this standard.

NEED(S):

Standard met.

OBJECTIVE:

No further objective needed to meet this standard.

TIMEFRAME FOR OBJECTIVE:

- Short-range Plan (one year or less)
- Long-range Plan (more than one year)

SYSTEM ASSESSMENT -- RESPONSE/TRANSPORTATION

Universal Level

4.05 Response Time Standards*

STANDARD:

4.05 Each local EMS agency shall develop response time standards for medical responses. These standards shall take into account the total time from receipt of the call at the primary public safety answering point (PSAP) to arrival of the responding unit at the scene, including all dispatch intervals and driving time.

Emergency medical service areas (response zones) shall be designated so that, for ninety percent of emergent responses,:

- a) the response time for a basic life support and CPR capable first responder does not exceed:
Metro/urban--5 minutes
Suburban/rural--15 minutes
Wilderness--as quickly as possible
- b) the response time for an early defibrillation-capable responder does not exceed:
Metro/urban--5 minutes
Suburban/rural--as quickly as possible
Wilderness--as quickly as possible
- c) the response time for an advanced life support capable responder (not functioning as the first responder) does not exceed:
Metro/urban--8 minutes
Suburban/rural--20 minutes
Wilderness--as quickly as possible
- d) the response time for an EMS transportation unit (not functioning as the first responder) does not exceed:
Metro/urban--8 minutes
Suburban/rural--20 minutes
Wilderness--as quickly as possible.

CURRENT STATUS:

BLS ambulance providers providing emergency transportation services in any of the twelve exclusive operating areas are required to meet the Metro/urban--8 minute, Suburban/rural--20 minute and Wilderness--as quickly as possible, standards. The agreements between the County and the independent cities not included in the twelve exclusive operating areas, do not specify response times. This is negotiated between the individual cities and the ambulance provider.

The LEMSA has not required the primary responder, whether ALS or BLS, to meet the State standards. Response time data is collected on response times from all primary providers, but has not been analyzed to determine whether provider agencies are meeting these standards.

SYSTEM ASSESSMENT -- RESPONSE/TRANSPORTATION

Universal Level

4.05 Response Time Standards*

(continued)

COORDINATION WITH OTHER EMS AGENCIES:

Unless requested to provide mutual aid to one of the surrounding counties, provider agencies do not routinely respond to other counties. Therefore, it has been unnecessary to establish response time standards across county borders.

NEED(S):

To evaluate the response time performance of all primary provider agencies as well as BLS transportation providers serving cities outside of the twelve exclusive operating areas to determine whether the State standards are met.

OBJECTIVE:

The LEMSA shall evaluate the response time performance of primary provider agencies to determine whether the State standards are met.

TIMEFRAME FOR OBJECTIVE:

Short-range Plan (one year or less)

Long-range Plan (more than one year)

SYSTEM ASSESSMENT -- RESPONSE/TRANSPORTATION

Universal Level

4.06 Staffing

STANDARD:

4.06 All emergency medical transport vehicles shall be staffed and equipped according to current state and local EMS agency regulations and appropriately equipped for the level of service provided.

CURRENT STATUS:

Reference 400 series of the Los Angeles County Prehospital Care Policy Manual addresses Provider Agencies (designation/staffing) for all emergency medical transport vehicles as follows:

- Reference No. 406, Authorization for Paramedic Provider Status
- Reference No. 408, MICU Staffing
- Reference No. 409, MICU Staffing Exceptions
- Reference No. 412, EMT-I Defibrillation Program Approval
- Reference No. 414, Nurse Staffed ALS Provider
- Reference No. 415, ALS Unit Extension Personnel
- Reference No. 416, Assessment Units

The Reference 700 series of the Los Angeles of the Los Angeles County Prehospital Care Policy Manual addresses Equipment/Supplies/Vehicles for all emergency medical transport vehicles are as follows:

- Reference No. 702, ALS Unit Inventory
- Reference No. 703, Assessment Unit Inventory
- Reference No. 704, Supply and Resupply of Designated EMS Provider Units/Vehicles
- Reference No. 705, ALS Unit Extension Unit Inventory
- Reference No. 706, Narcotics Carried on ALS Units
- Reference No. 710, Ambulance Equipment Requirements, CCR, Title 13, Section 1103
- Reference No. 712, Resuscitator Requirements for Ambulance, California Vehicle Code
- Reference No. 714, Recommended Ambulance Equipment, Highway Patrol Handbook 82.4

COORDINATION WITH OTHER EMS AGENCIES:

Not applicable for this standard.

NEED(S):

Standard met.

OBJECTIVE:

No further objective needed to meet standard.

TIMEFRAME FOR OBJECTIVE:

Short-range Plan (one year or less)

Long-range Plan (more than one year)

SYSTEM ASSESSMENT -- RESPONSE/TRANSPORTATION

Universal Level

4.07 First Responder Agencies

STANDARD:

4.07 The local EMS agency shall integrate qualified EMS first responder agencies (including public safety agencies and industrial first aid teams) into the system.

CURRENT STATUS:

In Los Angeles County, all first responder agencies assigned specific jurisdictions are incorporated into the system to the degree possible and desirable. A great deal of time and effort is spent on coordination of various entities to ensure maximal cooperation.

COORDINATION WITH OTHER EMS AGENCIES:

Not applicable for this standard.

NEED(S):

Standard met.

OBJECTIVE:

No further objective needed to meet standard.

TIMEFRAME FOR OBJECTIVE:

Short-range Plan (one year or less)

Long-range Plan (more than one year)

SYSTEM ASSESSMENT -- RESPONSE/TRANSPORTATION

Universal Level

4.08 Medical & Rescue Aircraft*

STANDARD:

4.08 The local EMS agency shall have a process for categorizing medical and rescue aircraft and shall develop policies and procedures regarding:

- a) authorization of aircraft to be utilized in prehospital patient care,
- b) requesting of EMS aircraft,
- c) dispatching of EMS aircraft,
- d) determination of EMS aircraft patient destination,
- e) orientation of pilots and medical flight crews to the local EMS system, and
- f) addressing and resolving formal complaints regarding EMS aircraft.

CURRENT STATUS:

The LEMSA has implemented Reference No. 514, Prehospital EMS Aircraft Operations Protocol, which describes the policies and procedures for EMS aircraft operations in the County. This protocol encompasses aircraft classification, including definitions of medical and rescue aircraft, type of personnel aboard the aircraft and their training requirements, as well as the EMS provider agencies, and back-up provider agencies. Patient destination is determined by the initial base hospital directing the patient's care and is consistent with Reference No. 502, Patient Destination, provided the receiving facility has a licensed heliport or designated landing site. The pilot in command approves all patient destinations with respect to safety factors.

Reference No. 514 also describes the general provisions for EMS Aircraft operations in the County and establishes the minimum standards for the integration of EMS aircraft and personnel into the LEMSA's prehospital patient transport system. This includes the designation of EMS Aircraft providers within the jurisdiction of the LEMSA. Record keeping and quality assurance requirements are also covered.

Requirements for communication equipment, aircraft compartment space and patient supplies are specified in the protocol. Dispatch criteria and a mechanism for addressing and resolving formal complaints regarding EMS aircraft are discussed in the protocol as well.

Reference 514 is currently under revision with the joint cooperation of aircraft provider agencies.

COORDINATION WITH OTHER EMS AGENCIES:

As identified in Reference No. 514, aeromedical prehospital response may be requested from outside of Los Angeles County "provided that medical control is maintained by the jurisdiction of origin, and an intercounty agreement exists".

SYSTEM ASSESSMENT -- RESPONSE/TRANSPORTATION

Universal Level

4.08 Medical & Rescue Aircraft*

(continued)

COORDINATION WITH OTHER EMS AGENCIES (cont.):

Intercounty agreements currently exist between Los Angeles county and the following jurisdictions:

Orange County
Riverside County
San Bernardino County

Kern County
Ventura County
Santa Barbara County

NEED(S):

Standard met.

OBJECTIVE:

No further objective needed to meet standard.

TIMEFRAME FOR OBJECTIVE:

Short-range Plan (one year or less)

Long-range Plan (more than one year)

SYSTEM ASSESSMENT -- RESPONSE/TRANSPORTATION

Universal Level

4.09 Air Dispatch Center

STANDARD:

4.09 The local EMS agency shall designate a dispatch center to coordinate the use of air ambulances or rescue aircraft.

CURRENT STATUS:

The LEMSA has defined the criteria and the process for designated dispatch centers for the coordination of air ambulances and rescue aircraft in Reference No. 514, Prehospital EMS Aircraft Operations Protocol. Within this policy, the dispatch agencies are classified as primary and back-up dispatch centers. The actual application and designation of designated dispatch centers is pending.

COORDINATION WITH OTHER EMS AGENCIES:

Not applicable for this standard.

NEED(S):

To complete the air ambulance and rescue aircraft dispatch center application and designation process.

OBJECTIVE:

The LEMSA shall designate dispatch centers (primary and back-up) for the coordination of air ambulances or rescue aircraft.

TIMEFRAME FOR OBJECTIVE:

- Short-range Plan (one year or less)
- Long-range Plan (more than one year)

SYSTEM ASSESSMENT -- RESPONSE/TRANSPORTATION

Universal Level

4.10 Aircraft Availability*

STANDARD:

4.10 The local EMS agency shall identify the availability and staffing of medical and rescue aircraft for emergency patient transportation and shall maintain written agreements with aeromedical services operating within the EMS area.

CURRENT STATUS:

The designation process for medical and rescue aircraft for emergency patient transport is specified in Reference No. 514, Prehospital EMS Aircraft Operations Protocol. This policy specifies that EMS Aircraft providers will have a contractual agreement and are classified by the name of the agency, level of care provided, the number and type of aircraft, and patient capacity. At the present time, there are three public safety agencies in Los Angeles County which provide medical and rescue aircraft services. The application process and establishment of formal written agreements with these agencies is pending.

COORDINATION WITH OTHER EMS AGENCIES:

As identified in Reference No. 514, aeromedical prehospital response may be requested from outside of Los Angeles County "provided that medical control is maintained by the jurisdiction of origin, and an intercounty agreement exists". Intercounty agreements currently exist between Los Angeles County and the following jurisdictions:

- Orange County
- Riverside County
- San Bernardino County
- Kern County
- Ventura County
- Santa Barbara County

NEED(S):

To formalize the designation of medical and rescue aircraft for emergency patient transportation.

OBJECTIVE:

The LEMSA shall develop the application process, negotiate and establish written agreements, and formally designate EMS aircraft/rescue provider agencies.

TIMEFRAME FOR OBJECTIVE:

- Short-range Plan (one year or less)
- Long-range Plan (more than one year)

SYSTEM ASSESSMENT -- RESPONSE/TRANSPORTATION

Universal Level 4.11 Specialty Vehicles*

STANDARD:

4.11 Where applicable, the local EMS agency shall identify the availability and staffing of all-terrain vehicles, snow mobiles, and water rescue and transportation vehicles.

The local EMS agency should plan for response by and use of all-terrain vehicles, snow mobiles, and water rescue vehicles in areas where applicable. This plan should consider existing EMS resources, population density, environmental factors, dispatch procedures and catchment area.

CURRENT STATUS:

The Los Angeles EMS system does not require specialized snow vehicles. However, several of the larger agencies do utilize water vehicles and/or all-terrain vehicles in those areas where specifically needed, i.e., the beach and port areas and the rural and mountainous terrains. These agencies include Los Angeles City, Long Beach, Redondo Beach and Los Angeles County Fire Departments (including Lifeguard division), and the Los Angeles Sheriff's Department.

COORDINATION WITH OTHER EMS AGENCIES:

Intercounty agreements currently exist between Los Angeles County and the following jurisdictions:

- Orange County
- Riverside County
- San Bernardino County
- Kern County
- Ventura County
- Santa Barbara County

The vehicles described would be used as any other approved vehicles in these bordering counties.

NEED(S):

No further objective needed to meet standard.

OBJECTIVE:

Standard met.

TIMEFRAME FOR OBJECTIVE:

- Short-range Plan (one year or less)
- Long-range Plan (more than one year)

SYSTEM ASSESSMENT -- RESPONSE/TRANSPORTATION

Universal Level

4.12 Disaster Response

STANDARD:

4.12 The local EMS agency, in cooperation with the local office of emergency services (OES), shall plan for mobilizing response and transport vehicles for disaster.

CURRENT STATUS:

Primary provider agencies are prepared for mobilizing response and transport vehicles in a disaster and have Mutual Aid plans in place. Should additional transport vehicles be required, the Department of Health Services Emergency Operations Center is prepared to provide vehicles the LEMSAs own fleet, from private contractors with whom contracts are in place, and from other operational areas in the Regional Disaster Medical/Health (RDMH) Region I.

COORDINATION WITH OTHER EMS AGENCIES:

The LEMSAs is designated as the RDMHC for Region I and agreements are in place within Region I.

NEED(S):

To maintain agreements with other operational areas in Region I through the RDMH Coordinator.

OBJECTIVE:

The LEMSAs shall maintain agreements with the other operational areas in Region I for medical transportation services in a disaster.

TIMEFRAME FOR OBJECTIVE:

Short-range Plan (one year or less)

Long-range Plan (more than one year)

SYSTEM ASSESSMENT -- RESPONSE/TRANSPORTATION

Universal Level

4.13 Intercounty Response*

STANDARD:

4.13 The local EMS agency shall develop agreements permitting intercounty response of emergency medical transport vehicles and EMS personnel.

The local EMS agency should encourage and coordinate development of mutual aid agreements which identify financial responsibility for mutual aid responses.

CURRENT STATUS:

Paramedic Intercounty Agreements permitting response of emergency medical transport vehicles and EMS personnel are in place with Kern, Orange, San Bernardino, Riverside, Ventura and Santa Barbara Counties.

COORDINATION WITH OTHER EMS AGENCIES:

Agreements are automatically renewed. No further coordination with other EMS agencies has been required.

NEED(S):

Standard met.

OBJECTIVE:

No further objective needed to meet this standard.

TIMEFRAME FOR OBJECTIVE:

Short-range Plan (one year or less)

Long-range Plan (more than one year)

SYSTEM ASSESSMENT -- RESPONSE/TRANSPORTATION

Universal Level

4.14 Incident Command System

STANDARD:

4.14 The local EMS agency shall develop multi-casualty response plans and procedures which include provisions for on-scene medical management, using the Incident Command System.

CURRENT STATUS:

Primary provider agencies throughout Los Angeles County have adopted the Incident Command System for responding to multi-casualty incidents.

COORDINATION WITH OTHER EMS AGENCIES:

Not applicable for this standard.

NEED(S):

Standard met.

OBJECTIVE:

No further objective needed to meet this standard.

TIMEFRAME FOR OBJECTIVE:

Short-range Plan (one year or less)

Long-range Plan (more than one year)

SYSTEM ASSESSMENT -- RESPONSE/TRANSPORTATION

Universal Level

4.15 MCI Plans

STANDARD:

4.15 Multi-casualty response plans and procedures shall utilize state standards and guidelines.

CURRENT STATUS:

Primary provider agencies have adopted the Incident Command System (FIRESCOPE) which utilizes state standards and guidelines for responding to multi-casualty incidents.

COORDINATION WITH OTHER EMS AGENCIES:

Not applicable for this standard.

NEED(S):

Standard met.

OBJECTIVE:

No further objective needed to meet this standard.

TIMEFRAME FOR OBJECTIVE:

Short-range Plan (one year or less)

Long-range Plan (more than one year)

SYSTEM ASSESSMENT -- RESPONSE/TRANSPORTATION

Enhanced Level: Advanced Life Support

4.16 ALS Staffing

STANDARD:

4.16 All ALS ambulances shall be staffed with at least one person certified at the advanced life support level and one person staffed at the EMT-I level.

The local EMS agency should determine whether advanced life support units should be staffed with two ALS crew members or with one ALS and one BLS crew members.

On any emergency ALS unit which is not staffed with two ALS crew members, the second crew member should be trained to provide defibrillation, using available defibrillators.

CURRENT STATUS:

Currently, the LEMSA's Reference No. 408 defines Mobile Intensive Care Unit Staffing as staffed with at least two certified mobile intensive care paramedics. Allowable exceptions may be made on a temporary basis under specific circumstances as specified in Reference No. 409, Reporting MICU Staffing Exceptions.

Consideration of staffing options other than the two paramedic system (i.e., one paramedic and one EMT-ID with advanced training) has been an ongoing area of discussion for the past several years.

COORDINATION WITH OTHER EMS AGENCIES:

Not applicable for this standard.

NEED(S):

Standard met.

OBJECTIVE:

No further objective needed to meet standard.

TIMEFRAME FOR OBJECTIVE:

Short-range Plan (one year or less)

Long-range Plan (more than one year)

TABLE 7: SYSTEM RESOURCES AND OPERATIONS -- Disaster Medical

EMS System: Los Angeles County

County: Los Angeles County

Reporting Year: 1998

SYSTEM RESOURCES

1. Casualty Collections Points (CCP)
 - a. Where are your CCPs located? See attached listing (Attachment #1)
 - b. How are they staffed? Initially staffed by hospital personnel and relieved by DMATs
 - c. Do you have a supply system for supporting them for 72 hours? yes [x] no []
(integrated with DMAT)
2. CISD
Do you have a CISD provider with 24 hour capability? yes [x] no []
(Mental Health Department)
3. Medical Response Team
 - a. Do you have any team medical response capability? yes [x] no []
(DMAT-CA9)
 - b. For each team, are they incorporated into your local response plan? yes [x] no []
 - c. Are they available for statewide response? yes [x] no []
 - d. Are they part of a formal out-of-state response system? yes [x] no []
4. Hazardous Materials
 - a. Do you have any HazMat trained medical response teams? yes [x] no []
 - b. At what HazMat level are they trained? (under development)
 - c. Do you have the ability to do decontamination in an emergency room? yes [x] no []
 - d. Do you have the ability to do decontamination in the field? yes [x] no []

OPERATIONS

1. Are you using a Standardized Emergency Management System (SEMS) that incorporates a form of Incident Command System (ICS) structure? yes [x] no []
2. What is the maximum number of local jurisdiction EOCs you will need to interact with in a disaster? The DHS DOC interacts with the Los Angeles County EOC and the Regional Disaster Medical/Health Coordinator.

TABLE 7:
DISASTER MEDICAL

TABLE 6: SYSTEM RESOURCES AND OPERATIONS
Facilities/Critical Care

EMS System: Los Angeles County

Reporting Year: 1997

NOTE: Table 6 is to be reported by agency.

Trauma care system

1. Trauma patients:
 - a) Number of patients meeting trauma triage criteria 11,793
 - b) Number of major trauma victims transported directly to a trauma center by ambulance 9,630
 - c) Number of major trauma patients transferred to a trauma center 539*

*from other trauma hospital	244	
from non-trauma hospital	229	
unknown	66	
 - d) Number of patients meeting triage criteria who weren't treated at a trauma center 2,163

Emergency departments:

2. Total number of emergency departments
 - a) Number of referral emergency services 26
 - b) Number of standby emergency services 14
 - c) Number of basic emergency services 82
 - d) Number of comprehensive emergency services 3*

* VA Hospital/Long Beach is not a paramedic receiving center
3. Number of receiving hospitals with agreements 23

TABLE 6:
FACILITIES/CRITICAL CARE

TABLE 5: SYSTEM RESOURCES AND OPERATIONS -- Response/Transportation (cont)

SYSTEM STANDARD RESPONSE TIMES (90TH PERCENTILE)

Enter the response times in the appropriate boxes.	METRO/URBAN	SUBURBAN/RURAL	WILDERNESS	SYSTEMWIDE
1. BLS and CPR capable first responder.	4.15 minutes*	5.62 minutes*	8 - 30 minutes*	4.15 - 30 minutes*
2. Early defibrillation capable responder.	3.60 minutes*	5.00 minutes*	8 - 30 minutes*	3.6 - 30 minutes*
3. Advanced life capable responder.	4.65 minutes*	6.57 minutes*	8 - 30 minutes*	4.65 - 30 minutes*
4. Transport Ambulance	4.08 minutes*	5.00 minutes*	8 - 30 minutes*	4.08 - 30 minutes*

*This is a compiled average system standard response time based on averages reported by provider agencies.

3-10

TABLE 5: SYSTEM RESOURCES AND OPERATIONS
Response/Transportation

EMS System: Los Angeles County

Reporting Year: 1997

TRANSPORTING AGENCIES

1.	Number of exclusive operating areas		45
2.	Percentage of population covered by Exclusive Operating Areas (EOA)		100%
3.	Total number responses		397,641*
	a) Number of emergency responses (Code 2: expedient, Code 3: lights and siren)		(patient exists)
	b) Number non-emergency responses (Code 1: normal)		
4.	Total number of transports		324,155*
	a) Number of emergency transports (Code 2: expedient, Code 3: lights and siren)		Code 3=16,312
	b) Number non-emergency transports (Code 1: normal)		

*unable to breakdown emergent vs non-emergent

Early Defibrillation Programs

5.	Number of public safety defibrillation providers		0
	a) Automated		0
	b) Manual		0
6.	Number of EMT-Defibrillation providers		21
	a) Automated		20
	b) Manual		1

Air Ambulance Services

7.	Total number of responses (dispatch)		
	a) Number of emergency responses		unavailable
	b) Number of non-emergency responses		unavailable
8.	Total number of transports		
	a) Number of emergency (scene) responses		742*
	b) Number of non-emergency responses		

* unable to differentiate from scene and non-emergency; in LA, the majority are considered "scene" responses (excludes L.A. City Fire responses--data navailable)

NOTE: Totals do not include L.A. City Fire non-billable patients

TABLE 5:
RESPONSE/TRANSPORTATION

TABLE 4: SYSTEM RESOURCES AND OPERATIONS -- Communications

EMS System: Los Angeles County

Reporting Year: 1997

Note: Table 4 is to be answered for each county.

- 1. Number of primary Public Service Answering Points (PSAP) 100+
- 2. Number of secondary PSAPs 41
- 3. Number of dispatch centers directly dispatching ambulances 30
- 4. Number of designated dispatch centers for EMS Aircraft 3 (unofficial--see System Assessment 4.09)
- 5. Do you have an operational area disaster communication system? yes no
 - a. Radio primary frequency 800 MHz trunked--County Wide Integrated Radio System (CWIRS)
 - b. Other methods: ReddiNet and HEAR
 - c. Can all medical response units communicate on the same disaster communications system?
 yes no
 - d. Do you participate in OASIS? yes no
 - e. Do you have a plan to utilize RACES as a back-up communication system?
 yes no (Disaster Communications System--DCS)
 - 1) Within the operational area? yes no
 - 2) Between the operational area and the region and/or state? yes no

TABLE 4:
COMMUNICATIONS

TABLE 3: SYSTEM RESOURCES AND OPERATIONS -- Personnel/Training

EMS System: Los Angeles County

Reporting Year: 1997

NOTE: Table 3 is to be reported by agency.

	EMT - Is	EMT - IIs	EMT - Ps	MICN	EMS Dispatchers
Total certified	4,308	N/A		635	---
Number of newly certified this year	1,014	N/A		82	---
Number of recertified this year	577	N/A		267	---
Total number of accredited personnel on July 1			2,262		
Number of certificate reviews resulting in:			(with EMSA)		---
a) formal investigations	1	N/A	6	0	---
b) probation	8	N/A	1	1	---
c) suspensions	0	N/A	0	0	---

TABLE 2: SYSTEM RESOURCES AND OPERATIONS
System Organization and Management

EMS System: Los Angeles County

Reporting Year: 1997

NOTE: Number (1) below is to be completed for each county. The balance of Table 2 refers to each agency.

1. Percentage of population served by each level of care by county:
 (Identify for the maximum level of service offered; the total of a, b, and c should equal 100%.)
 County:
 - a. Basic Life Support (BLS) 1%
 - b. Limited Advanced Life Support (LALS) 0%
 - c. Advanced Life Support (ALS) 99%

2. Type of agency
 - a - Public Health Department
 - b - County Health Services Agency
 - c - Other (non-health) County Department
 - d - Joint Powers Agency
 - e - Private Non-profit Entity
 - f - Other:

3. The person responsible for day-to-day activities of EMS agency reports to
 - a - Public Health Officer
 - b - Health Services Agency Director/Administrator
 - c - Board of Directors
 - d - Other: Associate Director of Health Services, Clinical & Medical Affairs

4. Indicate the non-required functions which are performed by the agency:

Implementation of exclusive operating areas (ambulance franchising)	X
Designation of trauma centers/trauma care system planning	X
Designation/approval of pediatric facilities	X
Designation of other critical care centers	X
Development of transfer agreements	X
Enforcement of local ambulance ordinance	X
Enforcement of ambulance service contracts	X
Operation of ambulance service	X

TABLE 2:
SYSTEM ORGANIZATION & MANAGEMENT

SECTION 3:
System Resources

SYSTEM ASSESSMENT -- DISASTER MEDICAL RESPONSE

Enhanced Level: Exclusive Operating Areas/Ambulance Regulations

8.19 Waiving Exclusivity

STANDARD:

8.19 Local EMS agencies which grant exclusive operating permits shall ensure that a process exists to waive the exclusivity in the event of a significant medical incident.

CURRENT STATUS:

The LEMSA's exclusive operating program agreements permit emergency ambulance transportation services by Federal, State, or County operated ambulance vehicles, or to a city government operated ambulance vehicle if authorized to transport by an authorized County agency or by another lawful authority, or to air ambulances if authorized to transport by an authorized County agency or by another lawful authority. Additionally, during periods of major emergency or disaster within an exclusive operating area, the County, by agreement, may require and use the services of other providers.

Public agencies may develop mutual aid agreements between the city and other public agencies and/or separate back-up service agreements between city and private ambulance operators.

COORDINATION WITH OTHER EMS AGENCIES:

Not applicable for these standards.

NEED(S):

Standards met.

OBJECTIVE:

No further objective needed to meet standard.

TIMEFRAME FOR OBJECTIVE:

Short-range Plan (one year or less)

Long-range Plan (more than one year)

SYSTEM ASSESSMENT -- DISASTER MEDICAL RESPONSE

Enhanced Level: Specialty Care Systems

8.18 Specialty Center Roles

STANDARD:

8.18 Local EMS agencies developing trauma or other specialty care systems shall determine the role of identified specialty centers during a significant medical incidents and the impact of such incidents on day-to-day triage procedures.

CURRENT STATUS:

Depending on the size of a major medical emergency or disaster, specialty centers, including trauma centers, may or may not function under the normal policies governing triage. The smaller the event, the greater the likelihood that the specialty centers will function as they normally do (assuming they are not directly impacted by the disaster).

COORDINATION WITH OTHER EMS AGENCIES:

Not applicable for this standard.

NEED(S):

Standard met.

OBJECTIVE:

No further objective needed to meet standard.

TIMEFRAME FOR OBJECTIVE:

- Short-range Plan (one year or less)
- Long-range Plan (more than one year)

SYSTEM ASSESSMENT -- DISASTER MEDICAL RESPONSE

Enhanced Level: Advanced Life Support

8.17 ALS Policies

STANDARD:

8.17 The local EMS agency shall ensure that policies and procedures allow advanced life support personnel and mutual aid responders from other EMS systems to respond and function during significant medical incidents.

CURRENT STATUS:

The LEMSA adheres to the California Code of Regulations, Title 22, Section 100143 (c) which permits EMT-Ps not certified in California to temporarily perform his/her scope of practice in California on a mutual aid response or during a special event, when approved by the medical director of the local EMS agency. The intercounty agreement covers prehospital personnel from surrounding counties.

COORDINATION WITH OTHER EMS AGENCIES:

An intercounty agreement between this County and surrounding counties are in place to cover mutual aid responses.

NEED(S):

Standard met.

OBJECTIVES:

No further objective needed to meet standard.

TIMEFRAME FOR OBJECTIVE:

- Short-range Plan (one year or less)
- Long-range Plan (more than one year)

SYSTEM ASSESSMENT -- DISASTER MEDICAL RESPONSE

Universal Level

8.16 Prehospital Agency Plans

STANDARD:

8.16 The local EMS agency shall ensure that all prehospital medical response agencies and acute-care hospitals in its service area, in cooperation with other local disaster medical response agencies, have developed guidelines for the management of significant medical incidents and have trained their staffs in their use.

The local EMS agency should ensure the availability of training in management of significant medical incidents for all prehospital medical response agencies and acute-care hospital staffs in its service area.

CURRENT STATUS:

All prehospital providers and acute care 9-1-1 receiving hospitals have developed guidelines for the management of significant medical incidents. The LEMSA provides annual disaster conferences to facilitate preparedness.

Primary provider agencies have adopted the Incident Command System and most hospitals have adopted the Hospital Emergency Incident Command System (HEICS).

COORDINATION WITH OTHER EMS AGENCIES:

Not applicable for this standard.

NEED(S):

To survey hospitals to assess their readiness for handling hazardous materials and radiation emergencies and to provide opportunities for hospitals to receive HEICS training.

OBJECTIVE:

1. The LEMSA shall assess hospitals readiness for handling hazardous materials and radiation emergencies. We have been offering multiple classes to handle HazMat exposure particularly as it relates to terrorism. Follow-up courses for decontamination procedures will be offered in 1999.
2. The LEMSA shall provide opportunities for hospitals to be trained in HEICS.

TIMEFRAME FOR OBJECTIVE:

Short-range Plan (one year or less)

Long-range Plan (more than one year)

SYSTEM ASSESSMENT -- DISASTER MEDICAL RESPONSE

Universal Level

8.15 Interhospital Communications

STANDARD:

8.15 The local EMS agency shall ensure that there is an emergency system for interhospital communications, including operational procedures.

CURRENT STATUS:

The HEAR and ReddiNet communication systems are available to all hospitals throughout Los Angeles County. These systems are coordinated by the Healthcare Association of Southern California and are operated by the LEMSA. Operational procedures are in place.

The HEAR system provides a mechanism for hospitals to communicate with each other and to the Medical Alert Center operated by the LEMSA. The ReddiNet system provides a mechanism for hospitals to communicate via computer with the LEMSA. Communications between hospitals is facilitated indirectly through the control point at the Medical Alert Center.

NEED(S):

Standard met.

OBJECTIVE:

No further objective needed to meet standard.

TIMEFRAME FOR OBJECTIVE:

Short-range Plan (one year or less)

Long-range Plan (more than one year)

SYSTEM ASSESSMENT -- DISASTER MEDICAL RESPONSE

Universal Level

8.14 Hospital Plans

STANDARD:

8.14 The local EMS agency shall encourage all hospitals to ensure that their plans for internal and external disasters are fully integrated with the county's medical response plan(s).

At least one disaster drill per year conducted by each hospital should involve other hospitals, the local EMS agency, and prehospital medical care agencies.

CURRENT STATUS:

All hospitals in Los Angeles County, both 9-1-1 receiving hospitals and standby or specialty hospitals, are given the opportunity to participate in an annual disaster exercise. Communications systems are in place with most hospitals and standardized data forms have been implemented.

Participation of 9-1-1 provider agencies is very limited at the present time, except when the exercise is developed by the County Office of Emergency Management.

COORDINATION WITH OTHER EMS AGENCIES:

The annual disaster exercise is targeted for hospitals located within Los Angeles County. However, the LEMSA participates in State exercises upon request.

NEED(S):

Standard met.

OBJECTIVE:

No further objective needed to meet standard.

TIMEFRAME FOR OBJECTIVE:

Short-range Plan (one year or less)

Long-range Plan (more than one year)

SYSTEM ASSESSMENT -- DISASTER MEDICAL RESPONSE

Universal Level

8.13 Disaster Medical Training

STANDARD:

8.13 The local EMS agency shall review the disaster medical training of EMS responders in its service area, including the proper management of casualties exposed to and/or contaminated by toxic or radioactive substances.

The local EMS agency should ensure that EMS responders are appropriately trained in disaster response, including the proper management of casualties exposed to or contaminated by toxic or radioactive substances.

CURRENT STATUS:

Primary providers utilize the Incident Command System (FIRESCOPE) when responding to multi-casualty incidents. When casualties are exposed to and/or contaminated by toxic or radioactive substances, providers are required to follow the procedures outlined in Reference No. 807, Medical Control During Hazardous Materials Exposure.

Trainers from public safety, law, fire and health as well as trainers from private EMS providers, 300 in all, have received DOD Train the Trainer Training For nuclear, biological, chemical incidents. Los Angeles County and Los Angeles City Firefighters personnel have all received the NFA awareness module. Five hundred hospital personnel have received the DOD hospital provider module.

COORDINATION WITH OTHER EMS AGENCIES:

Not applicable to this standard.

NEED(S):

Standard met.

OBJECTIVE:

No further objective needed to meet standard.

TIMEFRAME FOR OBJECTIVE:

Short-range Plan (one year or less)

Long-range Plan (more than one year)

SYSTEM ASSESSMENT -- DISASTER MEDICAL RESPONSE

Universal Level

8.12 Establishment of CCPs

STANDARD:

8.12 The local EMS agency, in coordination with the local OES, shall develop plans for establishing CCPs and a means for communicating with them.

CURRENT STATUS:

The LEMSA has identified 12 casualty collection points at hospital sites.

Communication with a CCP site will be accomplished through one of the following mechanisms, depending on what remains functional: HEAR, ReddiNet, telephone or the Countywide Integrated Radio System.

COORDINATION WITH OTHER EMS AGENCIES:

Not applicable to this standard.

NEED(S):

To identify mechanisms to equip CCPs. Most hospitals have the ability to provide initial supplies, but could not sustain a CCP for very long without governmental assistance, considering the large numbers of injured patients projected to converge on CCP sites.

OBJECTIVE:

The LEMSA shall explore ways and means of providing equipment for CCP sites.

TIMEFRAME FOR OBJECTIVE:

Short-range Plan (one year or less)

Long-range Plan (more than one year)

SYSTEM ASSESSMENT -- DISASTER MEDICAL RESPONSE

Universal Level **8.11 CCP Designation***

STANDARD:

8.11 The local EMS agency, in coordination with the local OES and county health officer(s), and using state guidelines, shall designate casualty collection points (CCPs).

CURRENT STATUS:

The LEMSA has met with and surveyed 12 hospitals, a casualty collection point site. The Los Angeles City Fire Department has also designated about 165 potential casualty staging sites that could be designated as CCPs if the hospital-based sites are inoperable. This would be considered a last resort since it would be extremely time and labor intensive to set up a medical site in a non-medical area.

New CCPs will be designated as hospital demonstrate interest and capabilities.

COORDINATION WITH OTHER EMS AGENCIES:

The LEMSA has concentrated its efforts on selecting CCP sites within Los Angeles County only. If sites outside of Los Angeles County were needed, this coordination would be accomplished through the Regional Disaster Medical/Health Coordinator.

NEED(S):

The major problem which needs to be addressed is that of supplies. Hospitals are generally interested in providing space for a CCP, but have expressed concern over the expense of equipping the sites. The LEMSA must explore all available sources for assisting hospitals in obtaining disaster supplies.

OBJECTIVE:

The LEMSA shall, within its capability, assist hospitals in obtaining disaster related supplies and equipment.

TIMEFRAME FOR OBJECTIVE:

- Short-range Plan (one year or less)
- Long-range Plan (more than one year)

SYSTEM ASSESSMENT -- DISASTER MEDICAL RESPONSE

Universal Level

8.10 Mutual Aid Agreements*

STANDARD:

8.10 The local EMS agency shall ensure the existence of medical mutual aid agreements with other counties in its OES region and elsewhere, as needed, which ensure that sufficient emergency medical response and transport vehicles, and other relevant resources will be made available during significant medical incidents and during periods of extraordinary system demand.

CURRENT STATUS:

Under the California Master Mutual Aid Agreement, all public resources shall be shared within and among Mutual Aid Regions. Private resources that are requested across operational areas of Regions I and VI shall be reimbursed in accordance to the Southern Region Cooperative Medical Assistance Agreement.

COORDINATION WITH OTHER EMS AGENCIES:

The LEMSA currently serves as the RDMHC for Region I.

NEED(S):

Standard met.

OBJECTIVE:

No further objective needed to meet standard.

TIMEFRAME FOR OBJECTIVE:

- Short-range Plan (one year or less)
- Long-range Plan (more than one year)

SYSTEM ASSESSMENT -- DISASTER MEDICAL RESPONSE

Universal Level

8.09 DMAT Teams

STANDARD:

8.09 The local EMS agency shall establish and maintain relationships with DMAT teams in its area.

The local EMS agency should support the development and maintenance of DMAT teams in its area.

CURRENT STATUS:

The LEMSA established DMAT, CA 9, effective February, 1995. It is sponsored by the County of Los Angeles through the Department of Health Services. Agreements have been signed with the EMS Authority and the Public Health Service. CA 9 became a Level 1 DMAT in June 1998. The team is equipped and training is on-going.

CA 9 will continue to receive equipment from the Federal government in order to be field ready and deployable. CA 9 will continue to participate in DMAT exercises and to recruit, train and provision team members.

COORDINATION WITH OTHER EMS AGENCIES:

The LEMSA is coordinating efforts to establish CA 9 with the EMS Authority and other DMATs to establish a Southern California network of DMATs.

NEED(S):

Standard met.

OBJECTIVE:

No further objective needed to meet objective. The LEMSA will continue to recruit, train and provision team members on an ongoing basis.

TIMEFRAME FOR OBJECTIVE:

- Short-range Plan (one year or less)
- Long-range Plan (more than one year)

SYSTEM ASSESSMENT -- DISASTER MEDICAL RESPONSE

Universal Level

8.08 Inventory of Resources

STANDARD:

8.08 The local EMS agency, in cooperation with the local OES, shall develop an inventory of appropriate disaster medical resources to respond to multi-casualty incidents and disasters likely to occur in its service area.

The local EMS agency should ensure that emergency medical providers and health care facilities have written agreements with anticipated providers of disaster medical resources.

CURRENT STATUS:

The LEMSA maintains a current status of all hospitals with basic emergency department capabilities. During a disaster, these hospitals are polled for operational status. The same system is used for standby and other specialty hospitals. The LEMSA has worked closely with community clinics in Los Angeles County to better incorporate them into the disaster plan. HEAR radios have been offered to clinics; thus far, 17 have been installed.

A list of ambulance companies throughout Los Angeles County is maintained and contracts are in place with 10 companies. Ambulance companies are polled during disasters to identify the number of vehicles staffed and available.

A list of home health agencies is maintained and a disaster clause is in each contract that home health agencies have with the County. The home health agencies are considered a staffing resource for shelters.

A list of dialysis units is also maintained.

COORDINATION WITH OTHER EMS AGENCIES:

Los Angeles County has participated in developing standardized procedures for resource identification with the other counties in Region I, and with EMSA. These procedures are routinely evaluated through SEM-Annual Regional Exercises.

NEED(S):

To finalize its agreement with hospitals and clinics and continue to evaluate the standardized procedures for Region I.

OBJECTIVE:

1. The LEMSA shall increase the number of clinics with HEAR capability.
2. The LEMSA shall participate in the process and evaluation of standardized procedures for resource procurement and allocation among Region I counties.

TIMEFRAME FOR OBJECTIVE:

Short-range Plan (one year or less)

Long-range Plan (more than one year)

SYSTEM ASSESSMENT -- DISASTER MEDICAL RESPONSE

Universal Level

8.07 Disaster Communications*

STANDARD:

8.07 A specific frequency (e.g., CALCORD) or frequencies shall be identified for interagency communication and coordination during a disaster.

CURRENT STATUS:

The HEAR "frequency" 155.280 MHz is available for administrative use between Los Angeles and Orange Counties. We expect equipment for this communication to be installed within the next few months. The HEAR "frequency" 155.340 MHz is available for coordination between Los Angeles, Riverside, Ventura and San Bernardino Counties. To our knowledge, the problem that exists is that this frequency is not routinely monitored by disaster staff of these counties, nor is there certainty that the EOCs of these other EMS Agencies is equipped with the HEAR.

OASIS provides one interagency frequency available for the operational area to communicate with other operational areas. Other communicator systems include transportable satellite telephones and the Statewide Response Information Management System (RIMS).

The LEMSA shall maintain a redundant and reliable communication system among the operational areas within Region I, and routinely test the Statewide Rims System.

COORDINATION WITH OTHER EMS AGENCIES:

Operational areas within Region I and EMSA are equipped with transportable satellite communications. In addition, LEMSAs within Regional I & VI are being equipped with the Statewide Response Information Management System (RIMS).

NEED(S):

Standard met.

OBJECTIVE:

No further objective needed to meet standard.

TIMEFRAME FOR OBJECTIVE:

- Short-range Plan (one year or less)
- Long-range Plan (more than one year)

SYSTEM ASSESSMENT -- DISASTER MEDICAL RESPONSE

Universal Level

8.06 Needs Assessment

STANDARD:

8.06 The local EMS agency, using state guidelines, shall establish written procedures for early assessment of needs and shall establish a means for communicating emergency requests to the state and other jurisdictions.

The local EMS agency's procedures for determining necessary outside assistance should be exercised yearly.

CURRENT STATUS:

The LEMSA utilizes the HEAR and ReddiNet systems as primary communication tools to ascertain the needs of health facilities. Regional assets are requested through the RDMHC system using the Southern Regional Response Plan as our template. The LEMSA conducts annual exercises with health facilities in Los Angeles County and numerous regional exercises are conducted throughout the year.

COORDINATION WITH OTHER EMS AGENCIES:

The RDMHC coordinates resource activities with OES Region I counties and the State.

NEED(S):

Standard met.

OBJECTIVE:

No further objective needed to meet objective.

TIMEFRAME FOR OBJECTIVE:

Short-range Plan (one year or less)

Long-range Plan (more than one year)

SYSTEM ASSESSMENT -- DISASTER MEDICAL RESPONSE

Universal Level

8.05 Distribution of Casualties*

STANDARD:

8.05 The local EMS agency, using state guidelines, shall establish written procedures for distributing disaster casualties to the medically most appropriate facilities in its service area.

The local EMS agency, using state guidelines, and in consultation with Regional Poison Centers, should identify hospitals with special facilities and capabilities for receipt and treatment of patients with radiation and chemical contamination and injuries.

CURRENT STATUS:

The LEMSA's disaster response plan requires hospitals to notify the DHS Emergency Operations Center (EOC) of the number of ambulatory and non-ambulatory patients that must be evacuated to other facilities. Facilities are also required to identify the number of critical and non-critical beds available to treat in-coming patients. The DHS DOC arranges the transfer of evacuated patients to appropriate facilities.

All hospitals with a basic emergency department permit are expected to be capable of receiving and treating patients with radiation and chemical contamination and injuries. LEMSA has undertaken a massive education program to improve response of health care providers to hazmat incidences.

COORDINATION WITH OTHER EMS AGENCIES:

A cooperative agreement between the counties in Region I has been developed through the RDMHC.

NEED(S)

To ensure 9-1-1 receiving hospitals are equipped to handle contaminated patients.

OBJECTIVE:

The LEMSA shall continue to work with hospital personnel to ensure that hospitals are aware of equipment requirements for haz/mat response.

TIMEFRAME FOR OBJECTIVE:

Short-range Plan (one year or less) - Objectives 2 and 3

Long-range Plan (more than one year) - Objective 1

SYSTEM ASSESSMENT -- DISASTER MEDICAL RESPONSE

Universal Level

8.04 Incident Command System

STANDARD:

8.04 Medical response plans and procedures for catastrophic disasters shall use the Incident Command System (ICS) as the basis for field management.

The local EMS agency should ensure that ICS training is provided for all medical providers.

CURRENT STATUS:

All public provider agencies and most private providers in Los Angeles County have adopted the Incident Command System. The Standardized Emergency Management System (SEMS) has been implemented with all medical facilities. The Introductory Course to SEMS, combined with the Hospital Emergency Incident Command System, form the foundation of ICS for hospitals.

COORDINATION WITH OTHER EMS AGENCIES:

Los Angeles County has implemented SEMS with other Operational Areas in Region I and Region IV as well as with other Regional Disaster Medical Health Coordinators within the State.

NEED(S)

Standard met.

OBJECTIVE:

No further objective needed to meet standard. Maintenance of SEMS with all medical facilities will be ongoing.

TIMEFRAME FOR OBJECTIVE:

Short-range Plan (one year or less)

Long-range Plan (more than one year)

SYSTEM ASSESSMENT -- DISASTER MEDICAL RESPONSE

Universal Level 8.03 HazMat Training

STANDARD:

8.03 All EMS providers shall be properly trained and equipped for response to hazardous materials incidents, as determined by their system role and responsibilities.

CURRENT STATUS:

Nearly all public safety providers (except for lifeguards and sheriff's) have received a HazMat training in at least the "First Responder Awareness" level. Many providers have all firefighter personnel trained to the "First Responder Operational" level. A small number of private ambulance providers have integrated the "First Responder Awareness" training in their agencies. The hours of training vary as follows:

<u>Level</u>	<u>Hour Range</u>	<u>Average</u>
First Responder Awareness	4 - 40	8
First Responder Operational	8 - 40	24
Hazardous Materials IC	8 - 80	40

The Los Angeles City, Burbank, Glendale, Santa Fe Springs and Los Angeles County Fire Departments have specially designated HazMat units/teams comprised of individuals highly trained to the CSTI/OES technician level, consisting of 160 - 240 hours of training.

First responder units make the scene safe and isolate the problem area and begin to contain victims. The HazMat units mitigate the incident and decontaminate victims. Health HazMat teams, a division of the Los Angeles County Fire or other city public health services, give official clearance of a HazMat incident.

COORDINATION WITH OTHER EMS AGENCIES:

Not applicable for this standard.

NEED(S):

Standard met.

OBJECTIVE:

No further objective needed to meet standard.

TIMEFRAME FOR OBJECTIVE:

- Short-range Plan (one year or less)
- Long-range Plan (more than one year)

SYSTEM ASSESSMENT -- DISASTER MEDICAL RESPONSE

Universal Level

8.02 Response Plans

STANDARD:

8.02 Medical response plans and procedures for catastrophic disasters shall be applicable to incidents caused by a variety of hazards, including toxic substances.

The California Office of Emergency Services' multi-hazard functional plan should serve as the model for the development of medical response plans for catastrophic disasters.

CURRENT STATUS:

LEMSA has plans and procedures in place for responding to disasters, including hazmat incidences. SEMS has been incorporated into our disaster plan.

COORDINATION WITH OTHER EMS AGENCIES:

Los Angeles County serves as Region I coordinator..

NEED(S):

Standard met.

OBJECTIVE:

No further objective needed to meet standard. Disaster plan is revised on an ongoing basis.

TIMEFRAME FOR OBJECTIVE:

- Short-range Plan (one year or less)
- Long-range Plan (more than one year)

SYSTEM ASSESSMENT - DISASTER MEDICAL RESPONSE

Universal Level

8.01 Disaster Medical Planning

(continued)

OBJECTIVE:

No further objective needed to meet standard.

TIMEFRAME FOR OBJECTIVE:

Short-range Plan (one year or less)

Long-range Plan (more than one year)

SYSTEM ASSESSMENT -- DISASTER MEDICAL RESPONSE

Universal Level

8.01 Disaster Medical Planning*

STANDARD:

8.01 In coordination with the local office of emergency services (OES), the local EMS agency shall participate in the development of medical response plans for catastrophic disasters, including those involving toxic substances.

CURRENT STATUS:

The disaster plan for the Los Angeles County Department of Health Services has been established to provide for the organization, mobilization, coordination and direction of medical and health services, both public and private, during a disaster. The plan delineates the authority, responsibility, functions and operations of all public and private agencies whose resources must be utilized if medical and health care are to be provided during a disaster. The LEMSA under the auspices of the Los Angeles County Department of Health Services, is responsible for the Department's disaster plan.

Because the successful management of any major emergency or disaster is contingent upon communications, Los Angeles County has placed an emphasis on various communications linkages. The LEMSA maintains the Hospital Emergency Administrative Radio (HEAR) system with 109 hospitals, 17 clinics and the ReddiNet system with 80 hospitals. Many hospitals have both systems. In addition to these systems, the DHS EOC is equipped with 2 meter HAM radio as a back-up communication system for hospitals and a potential primary disaster communication system for clinics. The DHS DOC is also equipped with an 800 MHz system known as County Wide Integrated Radio System (CWIRS). This is the primary radio system that supports the County infrastructure. A satellite phone is also available.

The local EMS Agency conducts at least one countywide disaster exercise each year for Los Angeles County hospitals and multiple exercises with Region I counties.

The Los Angeles County Fire Department is responsible for public health issues related to hazardous material releases throughout the County. However, the cities of Pasadena, Vernon, and Long Beach respond their own internal health department units within their respective jurisdictions. In addition, we are designed as the Western National Medical Response Team for terrorism response and we are in the process of completing our Metropolitan Medical Strike Team System.

COORDINATION WITH OTHER EMS AGENCIES:

Los Angeles County is the RDMHC for Region I.

NEEDS:

Standard met.

SYSTEM ASSESSMENT -- PUBLIC INFORMATION AND EDUCATION

Universal Level
7.04 First Aid & CPR Training

STANDARD:

7.04 The local EMS agency shall promote the availability of first aid and CPR training for the general public.

The local EMS agency should adopt a goal for training of an appropriate percentage of the general public in first aid and CPR. A higher percentage should be achieved in high risk groups.

CURRENT STATUS:

The LEMSA supports all efforts countywide to make first aid and CPR training available to the general public. There is no centralized clearing house for the development, distribution or provision of public information and education materials and/or training programs related to prehospital care.

Both public and private provider agencies are often involved in local community education programs to promote injury prevention and citizen preparedness. Fire department sponsor fire safety programs, information on EMS system access, nature of paramedic services and some CPR training for citizens on a community by community basis.

COORDINATION WITH OTHER EMS AGENCIES:

Not applicable for this standard.

NEED(S):

Standard met.

OBJECTIVE:

No further objective needed to meet standard.

TIMEFRAME FOR OBJECTIVE:

Short-range Plan (one year or less)

Long-range Plan (more than one year)

SYSTEM ASSESSMENT -- PUBLIC INFORMATION AND EDUCATION

Universal Level

7.03 Disaster Preparedness

STANDARD:

7.03 The local EMS agency, in conjunction with the local office of emergency services, shall promote citizen disaster preparedness activities.

The local EMS agency, in conjunction with the local office of emergency services (OES), should produce and disseminate information on disaster medical preparedness.

CURRENT STATUS:

The LEMSA participates in the County's disaster preparedness program through the Office of Emergency Management. This office coordinates citizen disaster preparedness activities for the County. The LEMSA has participated by arranging displays at County buildings and hospitals, arranging for vendors to display and sell disaster preparedness kits, by demonstrating the capabilities of the Department's mobile Emergency Operations Center and by arranging for "Shaky Quaky", an earthquake simulator owned by the County Fire Department for school-age children.

COORDINATION WITH OTHER EMS AGENCIES:

Not applicable for this standard.

NEED(S):

Standard met.

OBJECTIVE:

No further objective needed to meet standard.

TIMEFRAME FOR OBJECTIVE:

Short-range Plan (one year or less)

Long-range Plan (more than one year)

SYSTEM ASSESSMENT -- PUBLIC INFORMATION AND EDUCATION

Universal Level

7.02 Injury Control

STANDARD:

7.02 The local EMS agency, in conjunction with other local health education programs, shall work to promote injury control and preventive medicine.

The local EMS agency should promote the development of special EMS educational programs for targeted groups at high risk of injury or illness.

CURRENT STATUS:

The LEMSA, in conjunction with the Public Health Programs and Services Division of the Department of Health Services, promotes injury control through participation in the Violence Prevention Coalition and the American Trauma Society/Southern California Division (ATS/SCD). Reference No. 908, Trauma Prevention and Public Education, describes the collaborative relationship between each trauma hospital and the LEMSA in providing public information and injury prevention activities.

COORDINATION WITH OTHER EMS AGENCIES:

Representatives from EMS Agencies in the Southern California area (San Luis Obispo County south to the Mexican boarder) are Board members of the ATS/SCD.

NEED(S):

Standard met.

OBJECTIVE:

No further objective needed to meet standard.

TIMEFRAME FOR OBJECTIVE:

- Short-range Plan (one year or less)
- Long-range Plan (more than one year)

SYSTEM ASSESSMENT -- PUBLIC INFORMATION AND EDUCATION

Universal Level

7.01 Public Information Materials

STANDARD:

7.01 The local EMS agency shall promote the development and dissemination of information materials for the public which addresses:

- a) understanding of EMS system design and operation,
- b) proper access to the system,
- c) self help (e.g., CPR, first aid, etc.),
- d) patient and consumer rights as they relate to the EMS system,
- e) health and safety habits as they relate to the prevention and reduction of health risks in target areas, and
- f) appropriate utilization of emergency departments.

The local EMS agency should promote targeted community education programs on the use of emergency medical services in its service area.

CURRENT STATUS:

The LEMSA supports all efforts countywide to develop and disseminate informational materials for the public on the EMS system and proper use of the 9-1-1 system. While the LEMSA and the Public Health Programs and Services Division of the Department of Health Services promote these activities, there is no centralized clearing house for the development, distribution, or provision of public information and education materials and/or training programs related to the EMS system. Many of the County's fire departments sponsor safety programs and information on EMS system access. In addition, Reference No. 908, Trauma Prevention and Public Education, describes the collaborative relationship between each trauma hospital and the LEMSA in providing public information and injury prevention activities.

The LEMSA has developed an informational brochure on 9-1-1 and EMS services and is currently updating the information in preparation for a countywide distribution.

COORDINATION WITH OTHER EMS AGENCIES:

Not applicable for this standard.

NEED(S):

Standard met.

OBJECTIVE:

No further objective needed to meet standard.

TIMEFRAME FOR OBJECTIVE:

- Short-range Plan (one year or less)
- Long-range Plan (more than one year)

SYSTEM ASSESSMENT -- DATA COLLECTION/SYSTEM EVALUATION

Enhanced Level: Trauma Care System

6.11 Trauma Center Data

STANDARD:

6.11 The local EMS agency shall ensure that designated trauma centers provide required data to the EMS agency, including patient specific information which is required for quality assurance/quality improvement and system evaluation.

The local EMS agency should seek data on trauma patients who are treated at non-trauma center hospitals and shall include this information in their quality assurance/quality improvement and system evaluation program.

CURRENT STATUS:

The LEMSA has developed a comprehensive trauma hospital data collection system providing demographic and clinical data on the trauma patient (identified in the Trauma Service Hospital Agreement) from time of 9-1-1 dispatch to discharge from hospital. Required data elements provide the LEMSA with the necessary data for quality improvement and system evaluation activities. In addition to the required elements, hospitals also have the ability to enter additional hospital specific data for internal studies and program evaluation.

The EMS Agency and the California Health Care Association are currently working together to develop a mechanism to capture existing outcome data (as required by OSHPD) from each receiving hospitals' data system. This will expand TEMIS to include both emergency department and in-patient discharge data. Contract renewal language will provide for technical support of this project.

Effective July 1, 1997, each base hospital is now required to provide Emergency Department outcome data on all patients where they provide medical direction and are the receiving hospital. Compliance is monitored routinely.

The EMS Agency and the Coroner's office have met to discuss the goals of the system and plan to establish a mechanism to provide select Coroner data to the EMS Agency to be integrated into TEMIS.

COORDINATION WITH OTHER EMS AGENCIES:

Not applicable for this standard.

NEED(S):

To expand the data system to capture outcome data on trauma patients transported to non-trauma hospitals. In addition, develop a link with the Coroner's data system to incorporate data on deaths at the scene that are not transported to a hospital.

OBJECTIVE:

The LEMSA shall capture and integrate non-trauma hospital and Coroner data into the trauma hospital data collection system.

TIMEFRAME FOR OBJECTIVE:

Short-range Plan (one year or less)

Long-range Plan (more than one year)

SYSTEM ASSESSMENT -- DATA COLLECTION/SYSTEM EVALUATION

Enhanced Level: Trauma Care System **6.10 Trauma System Evaluation**

STANDARD:

6.10 The local EMS agency, with participation of acute care providers, shall develop a trauma system evaluation and data collection program, including:

- a) a trauma registry,
- b) a mechanism to identify patients whose care fell outside of established criteria, and
- c) a process of identifying potential improvements to the system design and operation.

CURRENT STATUS:

The LEMSA has a comprehensive trauma registry which includes demographic and clinical data on the trauma patient (identified in the Trauma Service Hospital Agreement) from time of 9-1-1 dispatch to discharge from the hospital. Reference No. 616, Trauma Hospital System Regional Quality Assurance Program, provides the LEMSA and the thirteen Los Angeles County designated trauma hospitals a forum to conduct a systematic evaluation of a trauma hospital's compliance with optimum trauma care standards. In addition, the LEMSA utilizes the trauma data system to continuously evaluate system design and operations.

COORDINATION WITH OTHER EMS AGENCIES:

Not applicable to this standard.

NEED(S):

Standard met.

OBJECTIVE:

No further objective needed to meet standard.

TIMEFRAME FOR OBJECTIVE:

- Short-range Plan (one year or less)
- Long-range Plan (more than one year)

SYSTEM ASSESSMENT -- DATA COLLECTION/SYSTEM EVALUATION

Enhanced Level: Advanced Life Support

6.09 ALS Audit

STANDARD:

6.09 The process used to audit treatment provided by advanced life support providers shall evaluate both base hospital (or alternative base station) and prehospital activities.

The local EMS agency's integrated data management system should include prehospital, base hospital, and receiving hospital data.

CURRENT STATUS:

The Los Angeles County Trauma Emergency Medical Information System (TEMIS) includes data on both basic and advanced prehospital care collected from the EMS and base hospital records. Additional in-house data is collected on trauma patients transported to a trauma hospital. A data package for receiving hospitals has been developed but is currently not in use.

The EMS Agency and the California Health Care Association are currently working together to develop a mechanism to capture existing outcome data (as required by OSHPD) from each receiving hospitals' data system. This will expand TEMIS to include both emergency department and in-patient discharge data. Contract renewal language will provide for technical support of this project.

Effective July 1, 1997, each base hospital is now required to provide Emergency Department outcome data on all patients where they provide medical direction and are the receiving hospital. Compliance is monitored routinely.

A selected audit process can utilize EMS, base hospital and trauma hospital data as needed. Individual cases can be tracked throughout the entire data base by a unique identifier (Sequence Number) which is initiated with the EMS record.

COORDINATION WITH OTHER EMS AGENCIES:

Not applicable for this standard.

NEED(S):

To expand the data system to capture outcome data on EMS patients transported to each paramedic receiving hospital in the system.

OBJECTIVE:

The LEMSA shall capture and integrate receiving hospital data into TEMIS.

TIMEFRAME FOR OBJECTIVE:

Short-range Plan (one year or less)

Long-range Plan (more than one year)

SYSTEM ASSESSMENT -- DATA COLLECTION/SYSTEM EVALUATION

Universal Level

6.08 Reporting

STANDARD:

6.08 The local EMS agency shall, at least annually report on the results of its evaluation of EMS system design and operations to the Board(s) of Supervisors, provider agencies, and Emergency Medical Care Committee(s).

CURRENT STATUS:

The LEMSA, through the Emergency Medical Services Commission (EMSC), reports all Commission activities to the Board of Supervisors at least every 12 months. This report includes a summary of subcommittee activities for the year.

A full system report is provided by means of EMS Commission and Board approval of the EMS Plan.

COORDINATION WITH OTHER EMS AGENCIES:

Not applicable to this standard.

NEED(S):

To provide a formal comprehensive annual report on system design and operations to the Board of Supervisors, EMS Commission and EMS constituents.

OBJECTIVE:

The LEMSA shall provide a formal comprehensive annual report on system design and operations to the Board of Supervisors, EMSC and EMS constituents.

TIMEFRAME FOR OBJECTIVE:

Short-range Plan (one year or less)

Long-range Plan (more than one year)

SYSTEM ASSESSMENT -- DATA COLLECTION/SYSTEM EVALUATION

Universal Level
6.07 Provider Participation

STANDARD:

6.07 The local EMS agency shall have the resources and authority to require provider participation in the systemwide evaluation program.

CURRENT STATUS:

Reference No. 620, EMS Quality Improvement Program, establishes a systemwide Quality Improvement (QI) program for evaluating the Emergency Medical System of Los Angeles County. Each base hospital and provider agency is required to submit their QI program to the LEMSA. All paramedic base hospitals and provider agencies have implemented an approved Quality Improvement Program that includes monition and reporting of systemwide indicators as well as specific hospital/provider agency indicators.

COORDINATION WITH OTHER EMS AGENCIES:

Not applicable for this standard.

NEED(S):

Standard met.

OBJECTIVE:

No further standard needed to meet objective.

TIMEFRAME FOR OBJECTIVE:

- Short-range Plan (one year or less)
- Long-range Plan (more than one year)

SYSTEM ASSESSMENT -- DATA COLLECTION/SYSTEM EVALUATION

Universal Level

6.06 System Design Evaluation

STANDARD:

6.06 The local EMS agency shall establish an evaluation program to evaluate EMS system design and operations, including system effectiveness at meeting community needs, appropriateness of guidelines and standards, prevention strategies that are tailored to community needs, and assessment of resources needed to adequately support the system. This shall include structure, process, and outcome evaluations, utilizing state standards and guidelines.

CURRENT STATUS:

The Emergency Medical Services Commission (EMSC) and its subcommittees provide an ongoing mechanism to evaluate EMS system design and operations through written reports from the LEMSA (Reference No. 206, Emergency Medical Services Commission Ordinance). The EMSC acts in an advisory capacity to the Board of Supervisors and the Director of Health Services regarding county policies, programs and standards for emergency services throughout the County. Information is acquired and analyzed measuring the impact and the quality of emergency medical care services. In cooperation with the Public Health Programs and Services Division of the Department of Health Services, the LEMSA participates in prevention programs (Violence Prevention Coalition, American Trauma Society/Southern California Division) developed to meet the needs of the community.

COORDINATION WITH OTHER EMS AGENCIES:

Not applicable for this standard.

NEED(S):

Standard met.

OBJECTIVE:

No further objective needed to meet standard.

TIMEFRAME FOR OBJECTIVE:

Short-range Plan (one year or less)

Long-range Plan (more than one year)

SYSTEM ASSESSMENT -- DATA COLLECTION/SYSTEM EVALUATION

Universal Level

6.05 Data Management System*

STANDARD:

6.05 The local EMS agency shall establish a data management system which supports its systemwide planning and evaluation (including identification of high risk patient groups) and the QA/QI audit of the care provided to specific patients. It shall be based on state standards.

The local EMS agency should establish an integrated data management system which includes system response and clinical (both prehospital and hospital) data.

The local EMS agency should use patient registries, tracer studies, and other monitoring systems to evaluate patient care at all stages of the system.

CURRENT STATUS:

The LEMSA's data management responsibilities are managed through the Trauma and Emergency Medicine Information System (TEMIS). TEMIS captures EMS data from EMS provider agencies, and base and trauma hospitals. Through the use of a unique identifier for every patient, the care of trauma victim can be tracked from the time of 9-1-1 dispatch to discharge from the trauma hospital. TEMIS assists the LEMSA in monitoring, evaluating and coordinating all EMS components of the system. As an integrated data management system, prehospital data elements capture system and clinical data. Trauma hospital data reflects demographic and clinical data. TEMIS is used to monitor patient care, as part of the LEMSA's quality improvement program, at all stages of the system.

The EMS Agency and the California Health Care Association are currently working together to develop a mechanism to capture existing outcome data (as required by OSHPD) from each receiving hospitals' data system. This will expand TEMIS to include both emergency department and in-patient discharge data. Contract renewal language will provide for technical support of this project.

Effective July 1, 1997, each base hospital is now required to provide Emergency Department outcome data on all patients where they provide medical direction and are the receiving hospital. Compliance is monitored routinely.

COORDINATION WITH OTHER EMS AGENCIES:

The LEMSA networks with local EMS agencies throughout the State on data issues.

NEED(S):

To expand the data system to capture outcome data on EMS patients transported to each paramedic receiving hospital in the system.

OBJECTIVES:

The LEMSA shall capture and integrate receiving hospital data into TEMIS and enter into Agreements with all paramedic receiving hospitals to participate in the TEMIS data system.

TIMEFRAME FOR OBJECTIVES:

Short-range Plan (one year or less)

Long-range Plan (more than one year)

SYSTEM ASSESSMENT -- DATA COLLECTION/SYSTEM EVALUATION

Universal Level

6.04 Medical Dispatch

STANDARD:

6.04 The local EMS agency shall have a mechanism to review medical dispatching to ensure that the appropriate level of medical response is sent to each emergency and to monitor the appropriateness of prearrival/post dispatch directions.

CURRENT STATUS:

There are 28 EMS dispatch centers in Los Angeles County coordinated by individual or multiple provider agencies. The LEMSA receives copies of EMS records for all 9-1-1 responses. Dispatch/response times and the level of response (BLS vs. ALS) are entered into the Trauma Emergency Medical Information System (TEMIS). Current monitoring activities are by exception only.

COORDINATION WITH OTHER EMS AGENCIES:

Not applicable for this standard.

NEED(S):

In cooperation with provider agencies, to develop a mechanism to ensure the review of medical dispatching for appropriate level of response and appropriateness of prearrival/post arrival dispatch directions. The Provider Agency Agreement should identify responsibilities and accountability for this process.

OBJECTIVE:

With system wide participation, the LEMSA shall establish a mechanism to ensure the review of medical dispatching for appropriate level of response and appropriateness of prearrival/post arrival dispatch directions.

TIMEFRAME FOR OBJECTIVE:

Short-range Plan (one year or less)

Long-range Plan (more than one year)

SYSTEM ASSESSMENT -- DATA COLLECTION/SYSTEM EVALUATION

Universal Level

6.03 Prehospital Care Audits

STANDARD:

6.03 Audits of prehospital care, including both system response and clinical aspects, shall be conducted.

The local EMS agency should have a mechanism to link prehospital records with dispatch, emergency department, in-patient and discharge records.

CURRENT STATUS:

The LEMSA provides continuous monitoring of prehospital care from both a system response and clinical perspective. Monitoring activities are coordinated with all system participants and utilizes data from the Trauma Emergency Medical Information System (TEMIS). Individual cases can be tracked throughout the data base by a unique identifier (Sequence Number) which is initiated with the EMS record. TEMIS links prehospital records with base hospital records. In-patient records are linked with prehospital and base hospital records for trauma hospital cases only.

The EMS Agency and the California Health Care Association are currently working together to develop a mechanism to capture existing outcome data (as required by OSHPD) from each receiving hospitals' data system. This will expand TEMIS to include both emergency department and in-patient discharge data. Contract renewal language will provide for technical support of this project.

Effective July 1, 1997, each base hospital is now required to provide Emergency Department outcome data on all patients where they provide medical direction and are the receiving hospital. Compliance is monitored routinely.

COORDINATION WITH OTHER EMS AGENCIES:

Not applicable for this standard.

NEED(S):

To expand the data system to capture outcome data on EMS patients transported to each paramedic receiving hospital in the system.

OBJECTIVE:

The LEMSA shall capture and integrate receiving hospital data into TEMIS.

TIMEFRAME FOR OBJECTIVE:

- Short-range Plan (one year or less)
- Long-range Plan (more than one year)

SYSTEM ASSESSMENT -- DATA COLLECTION/SYSTEM EVALUATION

Universal Level

6.02 Prehospital Records

STANDARD:

6.02 Prehospital records for all patient responses shall be completed and forwarded to appropriate agencies as defined by the local EMS agency.

CURRENT STATUS:

Department of Health Services policy requires that a prehospital record shall be completed for each patient response including all 9-1-1 calls (including false alarms) and all advanced life support interfacility transfers. Base hospitals complete a record when medical direction is provided. Trauma hospitals complete a record for all injured patients seen in the emergency department that meet Los Angeles County's record completion criteria. All prehospital, base and trauma records have a unique identifier allowing the data system to track trauma patients from time of dispatch to discharge from the hospital.

Effective March 1999, a revised EMS Report Form will be implemented with training going on from March 1 through May 30. All providers must convert to the new form or implement all required data elements onto any other LEMSA approved form. This development of the form has been a three year undertaking of the Data Advisory Committee through a Form Task Force.

In addition, policy describes the procedure for disposition of all copies of each record and the requirements for record retention.

COORDINATION WITH OTHER EMS AGENCIES:

Not applicable for this standard.

NEED(S):

Standard met.

OBJECTIVE:

No further objective needed to meet standard.

TIMEFRAME FOR OBJECTIVE:

- Short-range Plan (one year or less)
- Long-range Plan (more than one year)

SYSTEM ASSESSMENT -- DATA COLLECTION/SYSTEM EVALUATION

Universal Level
6.01 QA/QI Programs

STANDARD:

6.01 The local EMS agency shall establish an EMS quality assurance/quality improvement (QA/QI) program to evaluate the response to emergency medical incidents and the care provided to specific patients. The programs shall address the total EMS system, including all prehospital provider agencies, base hospitals, and receiving hospitals. It shall address compliance with policies, procedures, and protocols and identification of preventable morbidity and mortality and shall utilize state standards and guidelines. The program shall use provider based QA/QI programs and shall coordinate them with other providers.

The local EMS agency should have the resources to evaluate the response to, and the care provided to, specific patients.

CURRENT STATUS:

The LEMSA has developed two policies establishing a system wide Quality Improvement Program; Reference No. 620, EMS Quality Improvement Program, and Reference No. 620.1, EMS Quality Improvement Program Guidelines. Policies address the total EMS system, including all paramedic provider agencies, base hospitals, trauma hospitals and receiving hospitals. Each paramedic provider agency and base hospital is required to submit to the LEMSA a Quality Improvement Program for approval.

The LEMSA has implemented the EMS System Quality Improvement Program, to include at a minimum, compliance with policies, procedures, and protocols and identification of preventable morbidity and mortality utilizing State standards and guidelines.

COORDINATION WITH OTHER EMS AGENCIES:

Not applicable for this standard.

NEED(S):

Standard met.

OBJECTIVE:

No further objective needed to meet standard.

TIMEFRAME FOR OBJECTIVE:

Short-range Plan (one year or less)

Long-range Plan (more than one year)

SYSTEM ASSESSMENT -- FACILITIES/CRITICAL CARE

Enhanced Level: Other Speciality Care System

5.14 Public Input

STANDARD:

5.14 In planning other speciality care systems, the local EMS agency shall ensure input from both prehospital and hospital providers and consumers.

CURRENT STATUS:

The LEMSA ensures ongoing input in planning other speciality care systems from both prehospital and hospital providers, physicians, and consumers. This is accomplished by reviewing policies and procedures related to speciality care centers with the Provider Agency Advisory and Base Hospital Advisory Committees. System changes are further reviewed by the Medical Council, Data Coordination Advisory Committee and/or the Committees and ultimately approved by the EMS Commission. The LEMSA further seeks input as needed from other concerned groups, including the Healthcare Association of Southern California and the Los Angeles County Medical Association, which may be affected by policy and/or system additions or changes.

COORDINATION WITH OTHER EMS AGENCIES:

Not applicable for this standard.

NEED(S):

Standard met.

OBJECTIVE:

No further objective needed to meet standard.

TIMEFRAME FOR OBJECTIVE:

Short-range Plan (one year or less)

Long-range Plan (more than one year)

SYSTEM ASSESSMENT -- FACILITIES/CRITICAL CARE

Enhanced Level: Other Speciality Care System

5.13 Speciality System Design

(continued)

Cardiopulmonary and poisoning emergencies are managed by all 82 basic receiving centers in the County. The LEMSA, evaluated the feasibility of designating acute psychiatric receiving facilities, in conjunction with local law enforcement and the Healthcare Association of Southern California.

COORDINATION WITH OTHER EMS AGENCIES:

Not applicable for this standard.

NEED(S):

To secure funding for the establishment of neurosurgical receiving centers in Los Angeles County.

OBJECTIVE:

The LEMSA shall establish neurosurgical receiving centers based on the criteria which has been developed and was subsequently approved by the EMSC.

TIMEFRAME FOR OBJECTIVE:

Short-range Plan (one year or less)

Long-range Plan (more than one year)

SYSTEM ASSESSMENT -- FACILITIES/CRITICAL CARE

Enhanced Level: Other Speciality Care System

5.13 Speciality System Design

STANDARD:

5.13 Local EMS agencies developing speciality care plans for EMS-targeted clinical conditions shall determine the optimal system for the specific condition involved including:

- a) the number and role of system participants,
- b) the design of catchment areas (including inter-county transport, as appropriate) with consideration of workload and patient mix,
- c) identification of patients who should be triaged or transferred to a designated center,
- d) the role of non-designated hospitals including those which are outside of the primary triage area, and
- e) a plan for monitoring and evaluation of the system.

CURRENT STATUS:

The LEMSA has established a procedure for determining appropriate destination of burn patients as outlined in Reference No. 512, Burn Patient Destination. Due to the limited number of burn centers in the County, all basic receiving centers are equipped to provide initial stabilization of burn patients. Secondary transfer of these patients, to an appropriate burn facility, is coordinated with the County's Medical Alert Center (MAC). This may include transfer to a facility outside of the County.

Reference No. 511, Perinatal Patient Destination, provides guidelines for transporting perinatal patients to the most accessible medical facility appropriate to their needs. The designated facilities listed in Reference No. 501, Hospital Directory, are those hospitals in the County which have both a basic emergency department permit and an obstetrical service.

The LEMSA has identified a lack of neurosurgical services in the County. Reference No. 503, Guidelines for Hospitals Requesting Diversion of ALS Units, provides guidelines which allow facilities to divert patients with potential neurosurgical injuries to facilities that can appropriately manage the care of these patients. Criteria for neuro receiving centers was developed and approved by the EMSC; however, a lack of funding has prohibited implementation.

Reference No. 518, Decompression Emergencies/Patient Destination, outlines the procedure for transporting patients with potential decompression emergencies. This policy provides a mechanism for field personnel to transport these patients directly to a hyperbaric chamber when appropriate.

SYSTEM ASSESSMENT -- FACILITIES/CRITICAL CARE

Enhanced Level: Pediatric Emergency Medical and Critical Care System

5.12 Public Input

STANDARD:

5.12 In planning its pediatric emergency medical and critical care system, the local EMS agency shall ensure input from both prehospital and hospital providers and consumers.

CURRENT STATUS:

The LEMSAs pediatric emergency medical and critical care system plan was implemented in the early 1980s. The plan was the result of input from the Academy of Pediatrics, California Chapter 2, the Los Angeles Pediatric Society, the Healthcare Association of Southern California, the Los Angeles County Medical Association, and the Los Angeles County Department of Health Services. These standards have been updated and assimilated with the EMS Authority's Administration, Personnel and Policy Guidelines for the Care of Pediatric Patients in the Emergency Department.

COORDINATION WITH OTHER EMS AGENCIES:

Not applicable for this standard.

NEED(S):

Standard met.

OBJECTIVE:

No further objective needed to meet standard.

TIMEFRAME FOR OBJECTIVE:

- Short-range Plan (one year or less)
- Long-range Plan (more than one year)

SYSTEM ASSESSMENT -- FACILITIES/CRITICAL CARE

Enhanced Level: Pediatric Emergency Medical and Critical Care System

5.11 Emergency Departments

(continued)

OBJECTIVE:

No further objective needed to meet standard.

TIMEFRAME FOR OBJECTIVE:

Short-range Plan (one year or less)

Long-range Plan (more than one year)

SYSTEM ASSESSMENT -- FACILITIES/CRITICAL CARE

Enhanced Level: Pediatric Emergency Medical and Critical Care System

5.11 Emergency Departments

STANDARD:

5.11 Local EMS agencies shall identify minimum standards for pediatric capability of emergency departments including:

- a) staffing,
- b) training,
- c) equipment,
- d) identification of patients for whom consultation with a pediatric critical care center is appropriate,
- e) quality assurance/quality improvement, and
- f) data reporting to the local EMS agency.

Local EMS agencies should develop methods of identifying emergency departments which meet standards for pediatric care and for pediatric critical care centers and pediatric trauma centers.

CURRENT STATUS:

The development of guidelines for emergency departments that care for pediatric patients began in Los Angeles County in the early 1980's. These guidelines have become the minimum standards for emergency departments in the County which are designated to receive pediatric patients. The present standards address professional staff requirements and equipment only. Revisions of the standards are currently in progress and include the addition of specific requirements for administration, pediatric policies and procedures, staff education, quality improvement and availability of appropriately sized equipment for the pediatric patient.

Reference No. 510, Pediatric Patient Destination, specifies the guidelines for identifying the critically ill or injured pediatric patient and the criteria for determining the most appropriate facility. Pediatric receiving centers are designated as Emergency Department Approved for Pediatrics (EDAPs) or Pediatric Critical Care Centers (PCCCs) depending on their ability to continually meet the established standards. These facilities are listed in Reference No. 508, EDAP/PCCC Roster, and include 59 EDAPs (two of which are out-of-county) and 9 PCCCs, all of which are also trauma centers.

Since 1997, the EDAP Standards have been revised and all of the EDAPs have been resurveyed. The LEMSA is currently working closely with coordinating groups specified in Standard 5.10 to revise the PCCC Standards.

The LEMSA has a data management system in place which collects prehospital, base hospital and trauma hospital data elements on all 9-1-1 patients.

COORDINATION WITH OTHER EMS AGENCIES:

Not applicable for this standard.

NEED(S):

Standard met.

SYSTEM ASSESSMENT -- FACILITIES/CRITICAL CARE

Enhanced Level: Pediatric Emergency Medical and Critical Care System

5.11 Emergency Departments

STANDARD:

5.11 Local EMS agencies shall identify minimum standards for pediatric capability of emergency departments including:

- a) staffing,
- b) training,
- c) equipment,
- d) identification of patients for whom consultation with a pediatric critical care center is appropriate,
- e) quality assurance/quality improvement, and
- f) data reporting to the local EMS agency.

Local EMS agencies should develop methods of identifying emergency departments which meet standards for pediatric care and for pediatric critical care centers and pediatric trauma centers.

CURRENT STATUS:

The development of guidelines for emergency departments that care for pediatric patients began in Los Angeles County in the early 1980's. These guidelines have become the minimum standards for emergency departments in the County which are designated to receive pediatric patients. The present standards address professional staff requirements and equipment only. Revisions of the standards are currently in progress and include the addition of specific requirements for administration, pediatric policies and procedures, staff education, quality improvement and availability of appropriately sized equipment for the pediatric patient.

Reference No. 510, Pediatric Patient Destination, specifies the guidelines for identifying the critically ill or injured pediatric patient and the criteria for determining the most appropriate facility. Pediatric receiving centers are designated as Emergency Department Approved for Pediatrics (EDAPs) or Pediatric Critical Care Centers (PCCCs) depending on their ability to continually meet the established standards. These facilities are listed in Reference No. 508, EDAP/PCCC Roster, and include 58 EDAPs and 9 PCCCs, all of which are also trauma centers.

Since 1997, the EDAP Standards have been revised and all of the EDAPs have been resurveyed. The LEMSA is currently working closely with coordinating groups specified in Standard 5.10 to revise the PCCC Standards.

The LEMSA has a data management system in place which collects prehospital, base hospital and trauma hospital data elements on all 9-1-1 patients.

COORDINATION WITH OTHER EMS AGENCIES:

Not applicable for this standard.

NEED(S):

Standard met.

SYSTEM ASSESSMENT -- FACILITIES/CRITICAL CARE

Enhanced Level: Pediatric Emergency Medical and Critical Care System

5.10 Pediatric System Design

(continued)

CURRENT STATUS (continued):

for determining the most appropriate facility for the pediatric patient and guidelines for identifying the critically ill or injured pediatric patient, are specified in Reference No. 510, Pediatric Patient Destination. BLS units transport pediatric patients to the most accessible EDAP and a secondary transport can be arranged to a PCCC.

As stated in Reference No. 510, "In all cases the health and well-being of the child is the overriding consideration in determining hospital destination". Factors which are considered when triaging these patients include, the severity of the child's illness or injury, the current pediatric status of the receiving facility, the need for child abuse consult, and the anticipated travel time.

As part of the LEMSA's ongoing monitoring and evaluation of the system, periodic surveys of EDAPs and PCCCs are conducted to insure that each designated facility is continuing to meet the standards. These standards include specific requirements for administration, pediatric policies and procedures, staff education and the availability of appropriately sized equipment for the pediatric patient.

COORDINATION WITH OTHER EMS AGENCIES:

The LEMSA is currently working with surrounding counties to look at the feasibility of designating EDAP's and/or PCCCs outside of the County. There are times when facilities located in Orange and San Bernardino County are the most accessible hospitals to some of our pediatric patients living near county borders. To date we have approved one hospital each in Orange and Venture counties.

NEED(S):

Standard met.

OBJECTIVE:

No further objective needed to meet standard.

TIMEFRAME FOR OBJECTIVE:

Short-range Plan (one year or less)

Long-range Plan (more than one year)

SYSTEM ASSESSMENT -- FACILITIES/CRITICAL CARE

Enhanced Level: Pediatric Emergency Medical and Critical Care System

5.10 Pediatric System Design

STANDARD:

5.10 Local EMS agencies that develop pediatric emergency medical and critical care systems shall determine the optimal system, including:

- a) the number and role of system participants, particularly of emergency departments,
- b) the design of catchment areas (including areas in other counties, as appropriate), with consideration of workload and patient mix,
- c) identification of patients who should be primarily triaged or secondarily transferred to a designated center, including consideration of patients who should be triaged to other specialty care centers,
- d) identification of providers who are qualified to transport such patients to a designated facility,
- e) identification of tertiary care centers for pediatric critical care and pediatric trauma,
- f) the role of non-pediatric specialty care hospitals including those which are outside of the primary triage area, and
- g) a plan for monitoring and evaluation of the system.

CURRENT STATUS:

The present Los Angeles County pediatric emergency medical and critical care system consists of two levels of facility designation including Emergency Department Approved for Pediatrics (EDAPs) and Pediatric Critical Care Centers (PCCCs). The designation of EDAPs and PCCCs is based on standards which were developed in cooperation with the Academy of Pediatrics, California Chapter 2, the Los Angeles Pediatric Society, the Healthcare Association of Southern California, the Los Angeles County Medical Association, and the Los Angeles County Department of Health Services. There are 58 EDAPs and 9 PCCCs, all of which are also designated trauma centers, throughout the County. Each of these facilities are listed in Reference No. 508, EDAP/PCCC Roster.

In Los Angeles County, ALS personnel transport all pediatric patients who are not critically ill to the most accessible EDAP and critically ill/injured pediatric patients are transported to a PCCC. The criteria

SYSTEM ASSESSMENT -- FACILITIES/CRITICAL CARE

Enhanced Level: Trauma Care System

5.09 Public Input

STANDARD:

5.09 In planning its trauma care system, the local EMS agency shall ensure input from both prehospital and hospital providers and consumers.

CURRENT STATUS:

The plan for implementing the Los Angeles County Trauma Hospital System was developed by the Coordinating Committee of the Emergency Medical Services Commission (EMSC) and was approved by the Board of Supervisors on January 25, 1983. Ongoing system planning continues to receive input from the EMSC and multiple advisory committees and subcommittees including, but not limited to, the Medical Council, Provider Agency Advisory Committee, Facilities Advisory Committee, Data Advisory Committee and the Trauma Hospital Advisory Committee.

COORDINATION WITH OTHER EMS AGENCIES:

Not applicable for this standard.

NEED(S):

Standard met.

OBJECTIVE:

No further objective needed to meet standard.

TIMEFRAME FOR OBJECTIVE:

- Short-range Plan (one year or less)
- Long-range Plan (more than one year)

SYSTEM ASSESSMENT -- FACILITIES/CRITICAL CARE

Enhanced Level: Trauma Care System

5.08 Trauma System Design

(continued)

Monitoring and evaluation of the system is ongoing. Continuous evaluation is primarily accomplished by way of the Trauma Patient Summary Form (TPS) which contains data elements that track the progress of each trauma patient from the field through final disposition. Further, the Trauma Service Hospital Agreement and Memorandum of Understanding require private and County-operated trauma hospitals to conduct internal review of trauma care. The Regional Quality Assurance Committees ensure a systematic evaluation of a trauma center's compliance with optimum trauma care standards. Annual trauma hospital surveys are also performed by the LEMSA and site visits are conducted by the American College of Surgeons every three (3) years.

COORDINATION WITH OTHER EMS AGENCIES:

Policies governing trauma care coordination and mutual aid between jurisdictions are found in Paramedic Intercounty Agreements in place between Los Angeles County and the following jurisdictions:

- Orange County
- Riverside County
- San Bernardino county
- Kern County
- Ventura County
- Santa Barbara County

NEED(S):

Standard met.

OBJECTIVE:

No further objective needed to meet standard.

TIMEFRAME FOR OBJECTIVE:

Short-range Plan (one year or less)

Long-range Plan (more than one year)

SYSTEM ASSESSMENT -- FACILITIES/CRITICAL CARE

Enhanced Level: Trauma Care System

5.08 Trauma System Design

STANDARD:

5.08 Local EMS agencies that develop trauma care systems shall determine the optimal system (based on community need and available resources) including, but not limited to:

- a) the number and level of trauma centers (including the use of trauma centers in other counties),
- b) the design of catchment areas (including areas in other counties, as appropriate), with consideration of workload and patient mix,
- c) identification of patients who should be triaged or transferred to a designated center, including consideration of patients who should be triaged to other specialty care centers,
- d) the role of non-trauma center hospitals, including those that are outside of the primary triage area of the trauma center, and
- e) a plan for monitoring and evaluation of the system.

CURRENT STATUS:

Formal planning for the Los Angeles County trauma care system began in September, 1979 and continued through 1983 while a number of difficult issues were resolved. The Emergency Medical Services Commission (EMSC) assisted in creating the trauma system through a Coordinating Committee which studied the entire issue including, but not limited to, the number of trauma hospitals, the appropriate maximum transportation time, criteria for trauma hospitals, and the designation process.

Catchment areas, which meet the criteria outlined in Title 22, have been established for the thirteen (13) trauma hospitals in the system. Catchment areas are affected by a 20-minute maximum transport time (based on input from the Los Angeles County Chapter of the California Fire Chief's Association) which is in place and remains in effect for transport from Los Angeles County into adjoining counties. Since approximately 25% of the County does not have designated trauma hospitals, an Air Ambulance Trauma Transport Program has also been established to ensure access to a trauma hospital from these undesignated areas. Extension of the transport time is currently under consideration by committees.

Criteria and standards which ensure that patients are appropriately triaged and transported to trauma hospitals, are outlined and defined in Reference No. 506, Trauma Triage. The role of non-trauma center hospitals is also addressed in Reference No. 506 as well as Reference No. 502, Patient Destination, which integrates the EMS system overall.

SYSTEM ASSESSMENT -- FACILITIES/CRITICAL CARE

Enhanced Level: Advanced Life Support **5.07 Base Hospital Designation***

STANDARD:

5.07 The local EMS agency shall, using a process which allows all eligible facilities to apply, designate base hospitals or alternative base stations as it determines necessary to provide medical direction of prehospital personnel.

CURRENT STATUS:

The LEMSA has an organized base hospital system which currently includes 23 facilities distributed throughout the County. Reference No. 302, Base Hospital Roster, lists each of the designated base hospitals. The process for designation has been based on hospital application and ability to perform specified EMS functions as defined in Section 1797.67 of the California Health & Safety Code. There are also Hospital and Medical Care Agreements in place for each of the designated facilities. Reference 304, Role of the Base Hospital, defines the role of the base hospitals in the Los Angeles County ALS system. The LEMSA has evaluated the present configuration to determine its system effectiveness through a Base Hospital Reconfiguration Task Force. The existing system is effective however, under the current economic climate, it would not be surprising for additional base hospitals to pull out of the system due to mergers, closures, etc.

COORDINATION WITH OTHER EMS AGENCIES:

Policies governing mutual aid between jurisdictions are found in Paramedic Intercounty Agreements in place between Los Angeles County and the following jurisdictions:

Orange County
Riverside County
San Bernardino county
Kern County
Ventura County
Santa Barbara County

The Los Angeles County Prehospital Care Manual and all change notices are provided to each surrounding county on a timely basis.

NEED(S):

Standard met.

OBJECTIVE:

No further objective needed to meet standard.

TIMEFRAME FOR OBJECTIVE:

- Short-range Plan (one year or less)
- Long-range Plan (more than one year)

SYSTEM ASSESSMENT -- FACILITIES/CRITICAL CARE

Universal Level

5.06 Hospital Evacuation*

STANDARD:

5.06 The local EMS agency shall have a plan for hospital evacuation, including its impact on other EMS system providers.

CURRENT STATUS:

The LEMSA, through its Medical Alert Center (MAC), is able to rapidly assess bed availability throughout Los Angeles County. If a hospital needs either full or partial evacuation, the MAC arranges for the transfer and transport of evacuated patients to other receiving facilities.

COORDINATION WITH OTHER EMS AGENCIES:

If a hospital within Los Angeles County needs evacuation, the LEMSA will attempt to place patients in hospitals within Los Angeles County first. If additional beds are necessary, the LEMSA will contact the EMS agencies in the surrounding counties to provide resources. In a disaster situation, the Regional Disaster Medical/Health Coordinator would be contacted to assist with transferring patients to other counties.

NEED(S):

Standard met.

OBJECTIVE:

No further objective needed to meet standard.

TIMEFRAME FOR OBJECTIVE:

- Short-range Plan (one year or less)
- Long-range Plan (more than one year)

SYSTEM ASSESSMENT -- FACILITIES/CRITICAL CARE

Universal Level

5.05 Mass Casualty Management

STANDARD:

5.05 The local EMS agency shall encourage hospitals to prepare for mass casualty management.

The local EMS agency should assist hospitals with preparation for mass casualty management, including procedures for coordinating hospital communications and patient flow.

CURRENT STATUS:

All 9-1-1 receiving hospitals in Los Angeles County have a direct communication link with the LEMSA through the Medical Alert Center's HEAR radio. When a mass casualty incident occurs, the Medical Alert Center is apprized of the incident by the primary provider agencies. The Medical Alert Center immediately collects bed availability information from hospitals and provides this information to field personnel. The Medical Alert Center informs hospitals of the patients being transported to each facility. The objective of this system is to avoid overloading any particular health facility when others could handle an additional patient volume.

The Incident Command System has been adopted by all public provider agencies and some private providers in Los Angeles County to ensure organized, efficient care of victims of mass casualty incidents. The Standardized Emergency Management System (SEMS) has been implemented with all medical facilities. Reference No. 519, Management of Multiple Casualty Incidents, defines the role of the provider agency, base hospital, receiving facilities, and the County's Medical Alert Center during multiple casualty incidents. Basic 24-hour receiving facilities and specialty care facilities (where appropriate) are listed in the Prehospital Care Policy Manual and are regularly updated.

The LEMSA, as the DHS Disaster Coordination Section, works closely with all hospitals and medical facilities to prepare for mass casualty situations. A disaster drill is conducted yearly to allow all facilities and field providers to test their systems and plans. The focus of the drill varies each year. Some of the scenarios have included earthquakes, floods, nuclear/biological/chemical warfare situations, etc.

COORDINATION WITH OTHER EMS AGENCIES:

Not applicable for this standard.

NEED(S):

Standard met.

OBJECTIVE:

No further objective needed to meet this standard.

TIMEFRAME FOR OBJECTIVE:

Short-range Plan (one year or less)

Long-range Plan (more than one year)

SYSTEM ASSESSMENT -- FACILITIES/CRITICAL CARE

Universal Level

5.04 Speciality Care Facilities*

STANDARD:

5.04 The local EMS agency shall designate and monitor receiving hospitals and, when appropriate, specialty care facilities for specified groups of emergency patients.

CURRENT STATUS:

Hospitals with either a Basic or Comprehensive Emergency Department permit are automatically identified as a 9-1-1 receiving hospital. The Licensing & Certification Division of the Department of Health Services has the authority to investigate acute care facilities in the delivery of emergency care, as required in either permit. The LEMSA works closely with DHS Health Facilities Division, Acute Ancillary Section on these investigations. Monitoring is conducted primarily by exception. As described in Standard 5.01, Assessment of Capabilities, the LEMSA recognizes the need to develop and implement enforceable written agreements with receiving hospitals.

As described in detail in Standards 5.08, Trauma System Design, 5.10, Pediatric System Design, and 5.13, Speciality System Design, the LEMSA designates specialty care facilities for specific groups of patients and monitors these either by agreements or by exception.

COORDINATION WITH OTHER EMS AGENCIES:

Policies governing mutual aid between jurisdictions are found in Paramedic Intercounty Agreements in place between Los Angeles County and the following jurisdictions:

- Orange County
- Riverside County
- San Bernardino County
- Kern County
- Ventura County
- Santa Barbara County

NEED(S):

Standard met.

OBJECTIVE:

No further objective needed to meet standard.

TIMEFRAME FOR OBJECTIVE:

- Short-range Plan (one year or less)
- Long-range Plan (more than one year)

SYSTEM ASSESSMENT -- FACILITIES/CRITICAL CARE

Universal Level **5.03 Transfer Guidelines*** (continued)

NEED(S):

1. To establish guidelines to identify specific patient groups who should be considered for transfer to facilities of higher capabilities.
2. To establish facility transfer agreements.

OBJECTIVE:

1. The LEMSA shall establish guidelines to identify specific patient groups who should be considered for transfer to facilities of higher capabilities.
2. The LEMSA shall establish facility transfer agreements.

TIMEFRAME FOR OBJECTIVE:

Short-range Plan (one year or less)

Long-range Plan (more than one year)

SYSTEM ASSESSMENT -- FACILITIES/CRITICAL CARE

Universal Level

5.03 Transfer Guidelines*

STANDARD:

5.03 The local EMS agency, with participation of acute care hospital administrators, physicians, and nurses, shall establish guidelines to identify patients who should be considered for transfer to facilities of higher capability and shall work with acute care hospitals to establish transfer agreements with such facilities.

CURRENT STATUS:

The LEMSA actively develops policies for transporting patients from the field to appropriate paramedic receiving hospitals (e.g. trauma, perinatal, pediatrics, neuro). By doing so, the need for secondary transfers for medical reasons is theoretically eliminated. In reality, it does not eliminate the need for transfers due to financial considerations.

Reference No. 507, Guidelines for Secondary Transfer of Trauma Patients to Trauma Centers, provides guidelines for non-trauma hospitals to transfer critical trauma patients into the trauma system. To facilitate the transfer of stable trauma patients into the county hospital system, trauma hospitals are given "priority I" status providing them priority access to available county beds over non-trauma hospitals.

The LEMSA has recently been approached by the American Heart Association to categorize cardiac receiving hospitals. Preliminary discussions are underway to determine the feasibility of categorization.

Burn patients are not transported directly to burn centers, but are instead transported to the most accessible receiving hospital for airway and fluid stabilization. Upon stabilization and request of a private hospital, the County assists the private hospital in transferring burn patients to burn centers. This is done through the LEMSA's Medical Alert Center.

The Los Angeles County Department of Health Services has a policy to accept patients from the private sector on an emergency basis if urgent care is needed and cannot be provided by the private hospital. Other than transfers between private and County-operated facilities, the LEMSA is not involved in transfer agreements between private health facilities. According to DHS Licensing & Certification Division, this type of an agreement is verified by JCAHO surveys.

COORDINATION WITH OTHER EMS AGENCIES:

The EMS Agency has not established formal transfer agreements with hospitals outside of Los Angeles County. If a specialty bed is needed in another county (usually a burn bed), the Medical Alert Center contacts the hospital and arranges a transfer. This is primarily for the medically indigent patient. Private hospitals desiring to transfer medically insured patients make their own transfer arrangements.

SYSTEM ASSESSMENT -- FACILITIES/CRITICAL CARE

Universal Level

5.02 Triage & Transfer Protocols*

STANDARD:

5.02 The local EMS agency shall establish prehospital triage protocols and shall assist hospitals with the establishment of transfer protocols and agreements.

CURRENT STATUS:

The EMS Agency has established in policy prehospital triage protocols for the following categories:

- Pediatrics (EDAP and PCCC)
- Trauma
- Burn
- Perinatal
- Decompression Emergencies
- Sexual Assault (newly developed in 1997)

The Los Angeles County Department of Health Services has developed patient transfer guidelines to assist private hospitals in transferring patients to County-operated acute care hospitals. The highest priority for patient transfers is given for patients who require care that cannot be provided by the private hospital, but can be provided by a County hospital.

In addition, the LEMSA policies provide for secondary transfer of trauma patients from a non-trauma hospital to a private or County-operated trauma hospital.

Other than transfers between private and County-operated facilities, the LEMSA is not involved in transfer agreements between private health facilities. According to DHS Licensing & Certification Division, this type of an agreement is verified by JCAHO surveys.

COORDINATION WITH OTHER EMS AGENCIES:

No formal triage and transfer policies are established between Los Angeles County and bordering counties. However, 9-1-1 provider agencies routinely transport patients to the most accessible hospital from the incident location. In some instances, the most accessible hospital is in another county.

NEED(S):

Standard met.

OBJECTIVE:

No further objective needed to meet standard.

TIMEFRAME FOR OBJECTIVE:

- Short-range Plan (one year or less)
- Long-range Plan (more than one year)

SYSTEM ASSESSMENT -- FACILITIES/CRITICAL CARE

Universal Level

5.01 Assessment of Capabilities

STANDARD:

5.01 The local EMS agency shall assess and periodically reassess the EMS-related capabilities of acute care facilities in its service area.

The local EMS agency should have written agreements with acute care facilities in its service area.

CURRENT STATUS:

The Los Angeles County EMS Agency assesses and periodically reassesses EMS-related capabilities of acute care facilities in the following categories:

- Emergency Departments Approved for Pediatrics (EDAP)
- Pediatric Critical Care Centers (PCCC)
- Perinatal Centers
- Trauma Hospitals
- Burn Centers
- Cardiac Care Centers

Currently, the LEMSA performs initial and periodic on-sight surveys of EDAPs and PCCCs and periodic paper surveys. Trauma aspects of PCCCs are reviewed when trauma centers are surveyed. Formal contracts exist with designated trauma centers, but no current contracts/agreements are in place with paramedic receiving hospitals.

The Health Facilities Division of the Department of Health Services has the authority to investigate acute care facilities in the delivery of emergency care, as required in the basic emergency department permit. The LEMSA works closely with Health Facilities on these investigations.

COORDINATION WITH OTHER EMS AGENCIES:

Not applicable for this standard.

NEED(S):

To develop and implement written agreements with all acute care facilities.

OBJECTIVE:

1. The LEMSA shall develop agreements with paramedic receiving hospitals which have been given defined service areas.
2. The LEMSA shall develop agreements with all paramedic receiving hospitals.

TIMEFRAME FOR OBJECTIVE:

Short-range Plan (one year or less)

Long-range Plan (more than one year)

SYSTEM ASSESSMENT -- RESPONSE/TRANSPORTATION

Enhanced Level: Exclusive Operating Permits

4.22 Evaluation

STANDARD:

4.22 The local EMS agency shall periodically evaluate the design of exclusive operating areas.

CURRENT STATUS:

The LEMSA implemented an exclusive operating area program on January 1, 1995. The program agreements for the twelve exclusive operating areas are for an initial five-year period. Following evaluation of the efficiency and effectiveness of the exclusive operating areas, the Director of the Department of Health Services has the option to renew the agreements for a maximum of five one-year renewal periods. A new competitive bidding process will be initiated prior to the final expiration date of the agreements.

Agreements with the 33 cities that do not fall within the twelve exclusive operating areas (refer to Standard 1.28) are automatically renewed.

COORDINATION WITH OTHER EMS AGENCIES:

Not applicable for these standards.

NEED(S):

Standards met.

OBJECTIVE:

No further objective needed to meet standard.

TIMEFRAME FOR OBJECTIVE:

- Short-range Plan (one year or less)
- Long-range Plan (more than one year)

SYSTEM ASSESSMENT -- RESPONSE/TRANSPORTATION

Enhanced Level: Exclusive Operating Permits

4.21 Compliance

STANDARD:

4.21 The local EMS agency shall have a mechanism to ensure that EMS transportation and/or advanced life support agencies to whom exclusive operating permits have been granted, pursuant to Section 1797.224, H&SC, comply with applicable policies and procedures regarding system operations and patient care.

CURRENT STATUS:

The LEMSA has developed a monitoring instrument that documents each provider's compliance with the administrative, service and fiscal requirements of its exclusive operating area agreement(s). All 9-1-1 providers are required to provide the EMS Agency with EMS Reports which document their response to, treatment and, if applicable, transport of patients, and are monitored by exception through periodic review of the Reports.

COORDINATION WITH OTHER EMS AGENCIES:

Not applicable to this standard.

NEED(S):

Standards met.

OBJECTIVE:

No further objective needed to meet standard.

TIMEFRAME FOR OBJECTIVE:

- Short-range Plan (one year or less)
- Long-range Plan (more than one year)

SYSTEM ASSESSMENT -- RESPONSE/TRANSPORTATION

Enhanced Level: Exclusive Operating Permits

4.20 "Grandfathering"

STANDARD:

4.20 Any local EMS agency which desires to grant an exclusive operating permit without use of a competitive process shall document in its EMS transportation plan that its existing provider meets all of the requirements for non-competitive selection ("grandfathering") under Section 1797.224, H&SC.

CURRENT STATUS:

The LEMSA developed "grandfather" agreements for those cities that had continued the use of existing providers operating within a local EMS area at the same level of service which had been provided without interruption since January 1, 1981. Los Angeles County has thirty-three cities that met this criteria and have signed City-County or Provider-County Agreements.

COORDINATION WITH OTHER EMS AGENCIES:

Not applicable for this standard.

NEED(S):

Standards met.

OBJECTIVE:

No further objective needed to meet this standard.

TIMEFRAME FOR OBJECTIVE:

- Short-range Plan (one year or less)
- Long-range Plan (more than one year)

SYSTEM ASSESSMENT -- RESPONSE/TRANSPORTATION

Enhanced Level: Exclusive Operating Permits

4.19 Transportation Plan

STANDARD:

4.19 Any local EMS agency which desires to implement exclusive operating areas, pursuant to Section 1797.224, H&SC, shall develop an EMS transportation plan which addresses:

- a) minimum standards for transportation services,
- b) optimal transportation system efficiency and effectiveness, and
- c) use of a competitive process to ensure system optimization.

CURRENT STATUS:

The LEMSA developed an EMS transportation plan which includes minimum standards for basic life support transportation services. Minimum standards include response time parameters; simultaneous dispatch of transport personnel with advanced life support personnel; adequate number of vehicles to meet community needs and standards; response locations and personnel. The plan provides for efficient and effective transportation and uses a competitive bidding process to ensure system optimization.

COORDINATION WITH OTHER EMS AGENCIES:

Not applicable for this standard.

NEED(S):

Standards met.

OBJECTIVE:

No further objective needed to meet standard.

TIMEFRAME FOR OBJECTIVE:

- Short-range Plan (one year or less)
- Long-range Plan (more than one year)

SYSTEM ASSESSMENT -- RESPONSE/TRANSPORTATION

Enhanced Level: Ambulance Regulation

4.18 Compliance

STANDARD:

4.18 The local EMS agency shall have a mechanism (e.g., an ordinance and/or written provider agreements) to ensure that EMS transportation agencies comply with applicable policies and procedures regarding system operations and clinical care.

CURRENT STATUS:

Los Angeles County has an ambulance ordinance which regulates ambulance transportation in the unincorporated parts of the County. Many of the 88 incorporated cities in the County follow the County Ambulance Ordinance. Other incorporated cities have adopted city specific ambulance ordinances. Additionally LEMSA has written agreements with exclusive operating area basic life support providers. Two types of agreements are in place: 1) agreements with cities and unincorporated areas included in 12 ambulance franchise zones, and 2) agreements with certain cities who provided service prior to 1981. Performance standards are included and monitored regularly in the first type of agreement. In the agreements with specific cities, performance standards are less specific but contract compliance is monitorable by the LEMSA.

COORDINATION WITH OTHER EMS AGENCIES:

Not applicable to this standard.

NEED(S):

To negotiate transportation agreements with those cities not included in the County franchise zones which should incorporate applicable policies and procedures regarding system operation and clinical care.

OBJECTIVE:

The LEMSA shall successfully negotiate ambulance provider agreements which shall include a transportation component incorporating applicable policies and procedures regarding system operations and clinical care.

TIMEFRAME FOR OBJECTIVE:

Short-range Plan (one year or less)

Long-range Plan (more than one year)

SYSTEM ASSESSMENT -- RESPONSE/TRANSPORTATION

Enhanced Level: Advanced Life Support

4.17 ALS Equipment

STANDARD:

4.17 All emergency ALS ambulances shall be appropriately equipped for the scope of practice of its level of staffing.

CURRENT STATUS:

Reference 700 series of the Los Angeles County Prehospital Care Manual addresses Equipment/Supplies/Vehicles related to the prehospital care setting. Reference No. 702, MICU Inventory, specifically defines a standardized inventory for all MICUs. Reference No. 703.1, Assessment Unit Inventory, defines the inventory of all Assessment Units and Reference No. 705, MICU Extension Unit Inventory, defines the standardized inventory of all MICU Extension Units. Finally, Reference No. 706, Controlled Drug Inventory, identifies the approved controlled drugs carried on MICUs and appropriate accountability of these drugs.

During the later part of 1997 and early 1998, the entire process of supply and resupply of

All newly approved MICUs are inspected by the LEMSA prior to approval. Base hospitals ensure prehospital care vehicles converted from a hospital based system to a provider agency based system. Reference No. 704, Supply and Resupply of Designated EMS Provider Units/Vehicles was implemented as well as Reference Nol 706, Narcotics Carried on ALS Units. The Medical Director of the EMS Agency authorized the purchase of the majority of medical supplies and drugs, while several agencies utilize their provider agency Medical Director/Advisor or the assigned Base Hospital Medical Director. Narcotics are primarily obtained through County hospitals, cost defrayed by the LEMSA while several agencies utilize their provider agency Medical Director/Advisor or the assigned Base Hospital Medical Director. Accountability for supplies and drugs, including narcotics, is the responsibility of the provider agency and responsible physician. Narcotic inventories are subject to inspection as outlined in Reference 706 and are part of the provider agency QA/QI audits.

COORDINATION WITH OTHER EMS AGENCIES:

Not applicable for this standard.

NEED(S):

Standard met.

OBJECTIVE:

No further objective needed to meet standard.

TIMEFRAME FOR OBJECTIVE:

Short-range Plan (one year or less)

Long-range Plan (more than one year)

SECTION 5:

Plan Development Process

Description of Plan Development Process

To lay the groundwork for the future, in general, and the EMS Plan specifically, the Los Angeles County Emergency Medical Services Agency convened a forum of knowledgeable EMS representatives on October 26 and 27, 1993, to discuss evolving trends in EMS and to recommend strategies for meeting the EMS needs of Los Angeles County's population. The forum was titled "*Moving EMS Into the 21st Century*" and results were compiled into a Final Report dated January, 1994. Invited members of the forum represented all EMS Community entities, both public and private, including hospitals, provider agencies, community groups, fire departments, ambulance companies and professional community groups.

The Forum became the stepping stone to the development of the EMS Plan. Subsequently, the EMS Agency management staff, under the direction of the Director, developed the 1994 written plan from issues and strategies taken from the Forum results as well as research of all aspects of the prehospital care system including county documents, data files, and interviews with selected persons involved in EMS health care delivery. The content and format of the Plan were written pursuant to the June 1994 *EMS Systems Guidelines*, Part III, EMS System Planning Guidelines (EMSA #103), thus fulfilling all State requirements.

The EMS Plan utilizes analyses and planning information from numerous sources including, but not limited to, the following County, DHS, and/or EMS documents, policies, data banks, and registries:

- Los Angeles County Prehospital Care Policy Manual
- DHS Licensing & Certification Division
- Los Angeles County Trauma Plan
- Paramedic Intercounty Agreements
- Prehospital Emergency Personnel System (PEPSI)
- Los Angeles County Base Hospital Treatment Guidelines
- Los Angeles County Request for Proposal for EOAs
- Trauma and Emergency Medical Information System (TEMIS)
- Los Angeles County Code
- DHS Disaster Plan and Multihazard Functional Plan
- Los Angeles County Pediatric Plan

This updated plan is basically an update of the 1994 EMS Plan indicating accomplished objectives and new issues being addressed.

A revised Provider survey was developed to obtain and compile provider information required throughout the document. Results of the survey were tabulated in-house. Although the overall response rate was excellent (98%), some survey design and subsequent response problems did not capture the detail necessary to completely answer some questions in the Tables, particularly Table 8. The revised Provider EMS Plan Survey form used is attached for information (Attachment 1).

Description of Plan Development Process

(continued)

The document was approved by the membership of the Commission (for public comment) prior to final submission to the Board of Supervisors for approval. See Systems Assessment, Standard 1.03 **Public Input**, to demonstrate that interested parties, both provider and consumer, had opportunity to provide input on the plan.

The Director of Health Services submits the Plan to the Board of Supervisors for approval and transmittal to the State EMS Authority.

1. TRAUMA CARE SYSTEM PLAN

Trauma Care System Plan

The Los Angeles County trauma plan was submitted to the EMS Authority and approved on March 10, 1994 (see attached letter). Change from the original plan has been the withdrawal of Westlake Hospital, a Level III approved trauma center, in July of 1994 which has had little effect on the system as a whole, and the implementation of St. Francis Medical Center as a Level II trauma center.

EMERGENCY MEDICAL SERVICES AUTHORITY

1930 9TH STREET, SUITE 100
SACRAMENTO, CA 95814-7043
(916) 322-4336
FAX (916) 324-2875

March 10, 1994

Ms. Virginia Hastings
Los Angeles County EMS Agency
19951 Mariner Avenue, Suite 100
Torrance, CA 90503-1672

Dear Ms. Hastings:

The Emergency Medical Services Authority is pleased to formally approve Los Angeles County's trauma plan.

Thank you for your patience and perseverance in this matter. The quick turn-around time and thorough response when we requested supporting documentation are much appreciated.

If you have any questions regarding this decision, please contact Maureen McNeil at extension 314.

Sincerely,

A handwritten signature in cursive script, appearing to read 'Joseph E. Morales'.

Joseph E. Morales, M.D., MPA
Director

2. AB 3153 COMPLIANCE (EOAs)

Exclusive Operating Areas

The Los Angeles County Request for Proposals (RFP) for exclusive operating areas was submitted to the EMS Authority and approved in March, 1994 (see attached letter). As required, the following is the Exclusive Operating Zones (EOA) Fact Sheet and listing of all current exclusive operative areas.

**EXCLUSIVE OPERATING AREAS
EMS PLAN-ZONE SUMMARY**

Local EMS Agency or County Name:

Los Angeles County Emergency Medical Services Agency

Area or subarea (Zone) Name or Title:

See attached "Los Angeles County Emergency Ambulance Transportation Program"

Name of Current Provider(s):

Include company name(s) and length of operation (uninterrupted) in specified area or subarea.

See attached "Los Angeles County Emergency Ambulance Transportation Program"

Area or subarea (zone) Geographic Description:

See attached "Los Angeles County Emergency Ambulance Transportation Program"

Statement of Exclusivity, Exclusive or Non-Exclusive (HS 1797.85):

On July 21, 1987, the Board of Supervisors approved a new Countywide Emergency Ambulance Transportation Program. The program was developed as a means of satisfying a 1986 ruling by the Court of Appeal which held that the County was obligated to provide emergency ambulance service to all residents of the County, including persons within incorporated areas. It provided for the creation of exclusive operating zones for the provision of emergency ambulance transport throughout the County.

Type of Exclusivity, "Emergency Ambulance", "ALS", or "LALS" (HS 1797.85):

Include type of exclusivity (Emergency Ambulance, ALS, LALS, or Combination) and operational definition of exclusivity (i.e. 9-1-1 calls only, all emergencies, all calls requiring emergency ambulance service, etc.).

Exclusivity applies to emergency ambulance transportation only. Ambulance providers awarded zones respond to all 9-1-1 emergency calls within the zone in conjunction with the Los Angeles County Fire Department. They are permitted to subcontract out specific areas and they may request mutual aid on a limited basis. Thirty-three cities provide emergency ambulance services with their own employees and equipment, or through agreements with private providers. These cities have Exclusive Operating Area Agreements with the County.

Method to achieve Exclusivity, if applicable (HS 1797.224):

If Grandfathered, pertinent facts concerning changes in scope and manner of service. Description of current provider including brief statement of uninterrupted service with no changes to scope and manner of service to zone. Include chronology of all services entering or leaving zone, name of ownership changes, zone area modifications, or other changes to arrangements for service.

If Competitively-determined, method of competition, intervals, and selection process. Attach copy/draft of last competitive process used to select provider or providers.

On November 3, 1998, the Board approved an emergency ambulance transportation plan which called for release of a competitive Request for Proposals during November, 1988, and implementation of contracts in an initial Countywide eleven-zone program. The initial program was implemented on April 1, 1990.

To comply with this legal mandate, DHS developed the Countywide 9-1-1 Emergency Ambulance Transportation Exclusive Operating Area Program (Program), which includes 59 cities directly participating under the County's Program; and the corporate territories of 29 cities which continue to provide emergency ambulance transportation services with their own Fire Departments or under city contracts with private ambulance operators. (To accommodate the cities' desire for autonomy, the County currently has 29 ongoing County/City agreements for emergency ambulance transportation services with city governments.)

The original agreement expired December 31, 1994. A new RFP process was conducted during 1994 which resulted in Area 10 being divided into Area 10A and Area 10B. The original contractors were again awarded the areas served under the original agreement. The new agreement became effective January 1, 1995 and is effective for 5 years with five, on-year, extensions possible.

A copy of the 1994 RFP used for the selection process of emergency ambulance transportation providers is available upon request.

Virginia Hastings
Acting Director
County of Los Angeles
Department of Health Services
Emergency Medical Services Agency
19951 Mariner Avenue, Suite 100
Torrance, CA 90503-1672

Dear Ms. Hastings:

The review of the Los Angeles County Request for Proposals (RFP) for exclusive operating areas dated March 1994 has been completed. As you will recall from previous reviews, the EMS Authority's review is limited to those areas listed in the Competitive Bid Guidelines.

Los Angeles County's RFP appears in substantial compliance with the guidelines.

If I can be of further assistance, please let me know.

Sincerely,

A handwritten signature in cursive script that reads "Daniel R. Smiley".

for Daniel R. Smiley
Chief Deputy Director

3. PEDIATRIC SUBSYSTEM PLAN

Pediatric Subsystem Planning Guidelines

The development and implementation of guidelines for emergency departments that care for pediatric patients began in Los Angeles County in the early 1980s. These guidelines have become the minimum standards for emergency departments in the County which are designed to receiving pediatric patients. The Los Angeles plan has been the basis of both State and Federal pediatric guidelines. Pediatric receiving centers are designated as Emergency Department Approved for Pediatrics (EDAPs) or Pediatric Critical Care Centers (PCCCs) depending on their ability to continually meet the established standards. A listing of the approved facilities are attached including 57 EDAPs and 9 PCCCs. In addition, 2 hospitals in surrounding counties have been EDAP designated by the Los Angeles County EMS Agency.

The present Pediatric System Plan has being revised to comply with the EMS Authority's recently distributed Pediatric Subsystem Planning Guidelines, EMSA #181. EDAP standards have been revised, approved and implemented. Revised PCCC standards have been drafted and will be finalized after promulgation of new Trauma Regulations.

Virginia Hastings
 EMS Administrator
 Los Angeles County EMS Agency
 5555 Ferguson Drive, Suite 220
 Commerce, CA 90022

Dear Ms. Hastings:

We have completed our review of *Los Angeles's Emergency Medical Services Plan Update*, and have found it to be in compliance with the *EMS System Standards and Guidelines* and the *EMS System Planning Guidelines*.

Our reviewers raised some concerns regarding certain sections of the plan. I have listed those sections along with the specific comment below.

SECTION	COMMENT
1.22 Reporting of Abuse	Need a mechanism for reporting suspected SIDS deaths.
1.24 ALS System	All ALS providers need to have written agreements with the local EMS agency.
4.05 Response Time Standards	Need to evaluate the response time performance of primary provider agencies to determine whether the state standards are met.

These comments are for your information and may be addressed in your annual update. If you have any questions regarding the plan review, please call Sandy Salaber at (916) 322-4336, extension 423.

Sincerely,

Richard E. Watson
 Interim Director
