Mr. Sayone Thihalolipavan, Interim EMS Administrator
Public Health Services
County of San Diego Health & Human Services Agency
6255 Mission Gorge Road
San Diego, CA 92120

Dear Mr. Thihalolipavan:

This letter is in response to San Diego County's 2012 and 2013 EMS Plan Update submissions to the EMS Authority on December 30, 2015.

I. Introduction and Summary:

The EMS Authority has concluded its review of San Diego County's 2012 and 2013 EMS Plan Updates and is approving the plans as submitted.

II. History and Background:

San Diego County received its last full plan approval for its 2005 plan submission, and its last annual plan update for its 2011 plan submission.

Historically, we have received EMS Plan submissions from San Diego County for the following years:

- 1997-1999
- 2002
- 2004
- 2005
- 2007
- 2009
- 2011

Health and Safety Code (HSC) § 1797.254 states:

*"Local EMS agencies shall **annually** (emphasis added) submit an emergency medical services plan for the EMS area to the authority, according to EMS Systems, Standards, and Guidelines established by the authority".*

The EMS Authority is responsible for the review of EMS Plans and for making a determination on the approval or disapproval of the plan, based on compliance with statute and the standards and guidelines established by the EMS Authority consistent with HSC § 1797.105(b).

III. Analysis of EMS System Components:

Following are comments related to San Diego County's 2012 and 2013 EMS Plan Updates. Areas that indicate the plan submitted is concordant and consistent with applicable guidelines or regulations, HSC § 1797.254, and the EMS system components identified in HSC § 1797.103, are indicated below:

- Using information submitted by the Local EMS Agency (LEMSA), the EMS Authority shall assess each EMS area or the system's service area to determine the effectiveness of emergency medical services (HSC § 1797.102) as it relates to data collection and evaluation (HSC § 1797.103).

Statewide, there are 21 LEMSAs submitting EMS data. Our records indicate San Diego County is not submitting EMS data

at this time. In order for the EMS Authority to meet statutory requirements, please begin submission of EMS data into CEMSIS.

IV. Conclusion:

Based on the information identified, San Diego County's 2012 and 2013 EMS Plan Updates are approved.

Pursuant to HSC § 1797.105(b):

"After the applicable guidelines or regulations are established by the Authority, a local EMS agency may implement a local plan...unless the Authority determines that the plan does not effectively meet the needs of the persons served and is not consistent with the coordinating activities in the geographical area served, or that the plan is not concordant and consistent with applicable guidelines or regulations, or both the guidelines and regulations established by the Authority."

V. Next Steps:

San Diego County's next annual EMS Plan Update will be due on or before December 30, 2017. If you have any questions regarding the plan review, please contact Ms. Lisa Galindo, EMS Plans Coordinator, at (916) 431-3688.

COUNTY OF SAN DIEGO EMERGENCY MEDICAL SERVICES PLANS AND TRAUMA SYSTEM UPDATE

Dear Dr. Backer:

In accordance with California Health and Safety Code section 1797.254 and section 1797.258, the County of San Diego Emergency Medical Services (EMS) Agency submits the 2012/2013 and 2013/2014 EMS Plans, and the 2014 San Diego Trauma System Updates for the EMS Authority's review.

San Diego's EMS system is well established with a goal to ensure that all residents of and visitors to San Diego County receive timely and high quality emergency medical services, specialty care, prevention, disaster preparedness and response.

Thank you for your continuing support on the many challenges and opportunities facing local EMS agencies. Should you or your staff have any questions regarding the attached EMS Plans, please contact me at (619) 285-6539.

Sincerely,

MARCY METZ

**COUNTY OF SAN DIEGO
EMERGENCY MEDICAL SERVICES (EMS) PLANS
EXECUTIVE SUMMARY**

The San Diego County Local EMS (LEMSA) System serves a diverse population of approximately 3.2 million people, and has a variety of special populations living in urban, rural, mountain and desert areas. San Diego also shares a sixty mile-long border with Mexico. The LEMSAs currently has 26 designated ground advanced life support (ALS) jurisdictions/areas, which include ALS first responder agencies and two Air Ambulance services to provide ALS services within San Diego County. These jurisdictions include cities, fire districts, a water district, five Indian tribes and two County Service Areas. Seven base hospitals provide medical direction to the field responders. This update to the EMS Plan reflects program and fiscal data covering two fiscal years: 2012-13 and 2013-14. Pertinent information, enhancements and challenges are summarized below.

Due to the existence of a very large, mature system, most of San Diego's current efforts are directed toward sustaining and enhancing existing services. For example, during this timeframe, a new agreement was entered into for paramedic ambulance services in County Service Area (CSA) 17 (northern coastal area). To ensure that these services are provided in the most efficient and economical manner, the new provider was selected through a competitive procurement Request for Proposals (RFPs) process. Similarly, a competitive procurement was completed, resulting in a new paramedic ambulance services agreement for the Julian Service Area. Additionally, a RFP process resulted in a new agreement for billing services covering both County Service Areas. Noted in this report as a subsequent event, the LEMSAs also competitively procured a new paramedic ambulance service provider for Zone 2. Zone 2 is a very large geographical area covering southern and eastern portions of the County (Otay Mesa and rural back country).

The Ambulance Zone Summary Forms demonstrate that included within San Diego's mature EMS system are several ambulance zones that are "grandfathered" in accordance with the California Health and Safety Code Section 1797.201. These grandfathered ambulance zones remain under the medical control of the LEMSAs's medical director (California Health and Safety Code Section 1798).

Live Well San Diego

The health, safety and well-being of residents are of primary concern to the County of San Diego, for which Emergency Medical Services plays an important role. On July 13, 2010, the San Diego County Board of Supervisors adopted the *Live Well San Diego* (LWSD) mission. This was to achieve the County's vision of safe, healthy and thriving communities.

The *Live Well San Diego* vision is about uniting all sectors—business, schools, military and veterans organizations, community- and faith-based organizations, and all levels of government in order to bring about positive, collective change to support health and wellness for employees and persons served. County EMS directly supports the *Live Well San Diego* mission through providing emergency services and planning emergency preparedness for the San Diego community. The Mission Statement for County EMS is:

To ensure that all residents of and visitors to San Diego County receive timely and high quality emergency medical services, specialty care, prevention services, disaster preparedness and response.

The *Live Well San Diego* initiative will remain the focus of San Diego EMS' Strategic Planning over the next five years and beyond.

Major Needs and Solutions

Similar to other large population EMS systems, a primary San Diego need is the timely collection, organization and dissemination of data. This is particularly important in San Diego because the *Live Well San Diego* strategy requires data-centric outcome measures. San Diego EMS engages in continuous quality improvement for its Quality Assurance Network Collector System (QCS), which is the system San Diego utilizes to capture pre-hospital and hospital patient data on a system-wide basis. During this reporting period and beyond, the LEMSA implemented the iQCS project which moves the system to the internet to allow greater access and reliability. While implementing the iQCS project, San Diego EMS recently completed an in-depth, comprehensive needs assessment of its data system as a first step in exploring other technologies that may be available to meet current and future pre-hospital, specialty care and hospital data needs. The LEMSA will be providing EMSA with annual updates on this exciting opportunity to greatly enhance its data collection system.

Another project recently completed is the LEMSA's equipment inventory system known as IRMS (Integrated Resource Management Solutions). IRMS enables San Diego EMS to manage and control emergency preparedness supplies and equipment. The County's experience in managing the H1N1 Influenza Pandemic necessitated the implementation an automated resource management system with expanded capacity and functionality. In addition to daily needs, the implementation of IRMS significantly upgrades the County's ability to manage any emergency situation that would require a large scale deployment of resources.

The LEMSA is relieved to report that Federal funding for disaster programs (Public Health Emergency Preparedness (PHEP) and the Hospital Preparedness Program (HPP)) has stabilized in recent years (albeit at much lower funding levels). These programs are vital toward maintaining local capabilities for disaster preparedness, community resiliency and response. Currently, with the support of all levels of County government and the full engagement of the County Public Health Officer, the LEMSA is maintaining its on-going preparedness activities such as training; exercises; staff retention; laboratory and epidemiology surveillance; re-supply and maintenance of necessary equipment, supplies, medications; support for the community's healthcare organizations and warehouse management.

Conclusion

The EMS system in San Diego County is extremely effective in providing for rapid, safe, and effective emergency medical care. A substantial body of public policy has been developed with respect to emergency medical care and prevention. In San Diego, an ongoing collaborative process is in place that allows the system to evolve using public input and sound policy. Community partners include not only the private and fire based prehospital agencies and

hospitals but also Skilled Nursing Facilities, the Hospital Association of San Diego and Imperial Counties, the Healthcare Disaster Council, the San Diego Medical Society's Emergency Medical Oversight Committee, CSA Citizen Advisory Committees, law enforcement, military, other governmental jurisdictions, numerous healthcare stakeholders and tribal entities. Working together, the LEMSA is able to successfully fulfill its ambitious Mission Statement and further the County's *Live Well San Diego* vision.

Included in this report are EMS Plans for 2012-13 and 2013-14 that include Tables 1-11 and Ambulance Zone Summary Forms. San Diego's Trauma Plan is being submitted concurrent with the EMS Plans. San Diego submitted an updated Quality Improvement Plan on June 30, 2015, with no additional updates at this time. In Table 1, the LEMSA has determined that the system meets EMSA Standards and Guidelines, and has not made any changes necessitating submittal of the System Assessment Forms and Progress/Objectives form.
