CERTIFICATION ELIGIBILITY

- 1) Currently licensed or certified California physician assistants, registered nurses, nurse practitioners, nurse midwives, clinical nurse specialists, nurse anesthetists, mobile intensive care nurse, paramedics and advanced emergency medical technicians (AEMTs) are deemed to have met the requirement for training and are eligible to apply for certification.
- 2) California emergency medical technicians (EMTs), lifeguards, firefighters and peace officers who have successfully completed training in the administration of epinephrine by auto-injector, **approved by a local EMS agency or the EMS Authority, are eligible to apply for certification.**
- 3) Individuals who have a course completion document from an EMSA approved epinephrine auto-injector training program signed by the class instructor are eligible to apply for certification.

Certification authorizes the general public, or Lay Rescuer, and **off-duty** EMS personnel to administer auto-injector epinephrine within California. Certification does not replace any training or policy/protocols required by the local EMS Agencies (LEMSA) related to the use of auto-injectors within their jurisdictions for EMS Personnel who are on duty.
