Updated System Assessment Forms

UPDATED SYSTEM ASSESSMENT FORMS

System Organization and Management

1.24 ALS SYSTEMS

MINIMUM STANDARDS:

Advanced life support services shall be provided only as an approved part of a local EMS system and all ALS providers shall have written agreements with the local EMS agency.

RECOMMENDED GUIDELINES:

Each local EMS agency, based on state approval, should, when appropriate, develop exclusive operating areas for ALS providers.

CURRENT STATUS: Per EMSA, does not meet minimum standard.

NEED(S):

All ALS providers adhere to OCEMS medical control policies and procedures. There is a need to clarify the need to establish ALS agreements for provider agencies that performed ALS prior to the enactment of the EMS Act.

OBJECTIVE:

1.24.1 Propose written agreements with transport providers, public and private to promote compliance to system standards, medical control directives and EOA procedures.

August 2015 Update: IN PROGRESS: The authority to propose written agreements resides within Health & Safety Code, Title XXII and local Ambulance Ordinance No. 3517 & OCEMS Policy & Procedures. The ability to initiate written agreements is dependent upon Board action of proposed Ordinance amendments. OCEMS continues to work with HCA Administration to re-agenize Ordinance revision.

October 2018 Update: IN PROGRESS: The authority to propose written agreements resides within Health & Safety Code, Title XXII and local Ambulance Ordinance No. 3517 & OCEMS Policy & Procedures. The ability to initiate written agreements is dependent upon Board action of proposed Ordinance amendments. OCEMS continues to work with HCA Administration to re-agenize Ordinance revision. A law enforcement agency was approved as an OCEMS ALS Provider and completed an Agreement to Provide Services as an ALS provider (see Table 8: OCSD).

October 2019 Update: COMPLETED: The Orange County ambulance ordinance has been amended but has not received final endorsement by the Board of Supervisors. ALS agreements are unnecessary as all non-county ALS providers (Cities) employed mobile intensive care paramedics under the “Wedsworth-Townsend Act.” Further, the local EMS plan (after 1980) acknowledged that all paramedic services were provided by public agencies.

August 2023 Update: IN PROGRESS: On 2/2/23, provided additional historical documentation of public ALS providers in service prior to 1980 (1978 EMS Plan). Awaiting EMSA response.

August 2024 Update COMPLETED: Historical documentation of public ALS providers in service prior to 1980 within 1978 EMS Plan (See page 12). All Orange County ALS public/fire providers are authorized as a provider within the organized EMS system, follow local EMS medical control directives & participate in QI activities.

UPDATED SYSTEM ASSESSMENT FORMS

Staffing/Training

2.01 ASSESSMENT OF NEEDS

MINIMUM STANDARDS:

The local EMS agency shall routinely assess personnel and training needs.

RECOMMENDED GUIDELINES: None.

CURRENT STATUS: Meets minimum standard.

NEED(S):

Standard is met. Objectives developed to enhance provider-level educational programs.

OBJECTIVE:

2.01.1 : Development of educational programs that include patient outcome data will strengthen the overall curriculum for all EMS providers. The integration of hospital patient outcome data into OC-MEDS will provide the final variable for determining ongoing curriculum needs.

August 2015 Update: IN PROGRESS: Completed two educational presentations at "No Fear" conferences which discussed outcome data. Continuing to test Patient Registry in the Alternate Destination project and preparing to implement Base Hospital test Patient Registry data entry.

August 2016 Update: IN PROGRESS: While the use of the OC-MEDS Patient Registry is proving the value of outcome information for determining the efficacy of prehospital patient care, OCEMS is committed to the development of Health Information Exchange (HIE) networks to obtain and share relevant patient care information more efficiently. OCEMS has partnered with our regional Health Information Organization (HIO) to facilitate the bi-directional data exchange which will result in the routine availability of patient outcome data.

August 2017 Update: IN PROGRESS: While significant progress has been made with the development of bi-directional Health Information Exchange (HIE) between EMS providers & receiving hospitals (including receipt of outcome data), more EMS providers need to be added to the HIE & much work needs to be done to improve outcome data quality. OCEMS is working with our Regional HIE (OCPRHIO) & our software vendor to onboard additional EMS providers and implement technical improvements to ensure for the availability of current & relevant patient outcome data.

October 2018 Update: IN PROGRESS: OCEMS is continuing to work with system stakeholders to implement bi-directional Health Information Exchange (HIE) throughout the county & has provided several educational opportunities during the year to inform system stakeholders about the HIE project.

October 2019 Update: IN PROGRESS: No change

October 2020 Update: Submitted proposal utilizing Epidemiology & Laboratory Capacity (ELC) funding for an EMS Bi-Directional Data Exchange Project to create technical linkages between EMS providers & designated emergency receiving centers (ERCs). OCPRHIO no longer involved.

November 2021 Update: Implemented Bi-Directional Data Exchange Project to enable more real time hospital data. ADT Software/EMS Health Information Hub will establish direct bi-directional data exchange between EMS providers & each designated emergency receiving center (ERC).

August 2022 Update: Enhancements to existing EMS data system modules (Health Information Hub) & EMS reporting & analytics software to allow aggregated patient outcome dashboards completed. Continue to engage with ERCs to coordinate agreements, security assessments, VPN connections & configuration/testing.

August 2023 Update: Initial beta testing completed with one provider and one ERC & starting to expand to others. All ERCs onboard with varying levels of progress.

August 2024 Update: COMPLETED Bi-Directional Data Exchange project successfully implemented with 21 out of 24 local ERCs participating and submitting outcome data in near real time. More information about the project can be found on the OCEMS website at: <https://www.ochealthinfo.com/ems/OC-MEDS/HHI>

TIME FRAME FOR MEETING OBJECTIVE:

- Short-Range Plan (one year or less)
- Long-Range Plan (more than one year)

Response/Transportation

4.21 EOA COMPLIANCE

MINIMUM STANDARDS:

The local EMS agency shall have a mechanism to ensure that EMS transportation and/or advanced life support agencies to whom exclusive operating permits have been granted, pursuant to Section 1797.224, H&SC, comply with applicable policies and procedures regarding system operations and patient care.

RECOMMENDED GUIDELINES: None.

CURRENT STATUS: Meets minimum standard.

NEED(S):

Written agreements with all EMS system providers, public and private, are needed to optimize coordination of transported medical patients and standardize performance criteria systemwide.

OBJECTIVE:

4.21.1: By year end 2015, propose written agreements with transport providers, public and private to promote compliance to system standards, medical control directives and EOA procedures.

August 2015 Update: IN PROGRESS: The authority to propose written agreements resides within Health & Safety Code, Title XXII and local Ambulance Ordinance No. 3517 & OCEMS Policy & Procedures. Ability to initiate written agreements dependent upon Board action of proposed Ordinance amendments. Continuing to work with HCA Administration to re-agenize Ordinance revision.

September 2016 Update: IN PROGRESS: The authority to propose written agreements resides within Health & Safety Code, Title XXII and local Ambulance Ordinance No. 3517 & OCEMS Policy & Procedures. Ability to initiate written agreements is dependent upon Board action of proposed Ordinance amendments. Continuing to work with HCA Administration to re-agenize Ordinance revision. A law enforcement agency was approved as an OCEMS ALS Provider and completed an Agreement to Provide Services as an ALS provider (see Table 8: OCSD).

October 2018 Update: IN PROGRESS: The authority to propose written agreements resides within Health & Safety Code, Title XXII and local Ambulance Ordinance No. 3517 & OCEMS Policy & Procedures. Ability to initiate written agreements is dependent upon Board action of proposed Ordinance amendments. Continuing to work with HCA Administration to re-agenize Ordinance revision. A law enforcement agency was approved as an OCEMS ALS Provider and completed an Agreement to Provide Services as an ALS provider (see Table 8: OCSD).

2020 - August 2023 Update: IN PROGRESS: On 2/2/23, provided additional historical documentation of public ALS providers in service prior to 1980 (1978 EMS Plan). Awaiting EMSA response.

August 2024 Update COMPLETED: Historical documentation of public ALS providers in service prior to 1980 within 1978 EMS Plan (See page 12). All Orange County ALS public/fire providers are authorized as a provider within the organized EMS system, follow local EMS medical control directives & participate in QI activities.

UPDATED SYSTEM ASSESSMENT FORMS

Data Collection/System Evaluation

6.05 DATA MANAGEMENT SYSTEM

MINIMUM STANDARDS:

The local EMS agency shall establish a data management system that supports its system-wide planning and evaluation (including identification of high-risk patient groups) and the QA/QI audit of the care provided to specific patients. It shall be based on state standards.

RECOMMENDED GUIDELINES:

The local EMS agency should establish an integrated data management system which includes system response and clinical (both pre-hospital and hospital) data.

The local EMS agency should use patient registries, tracer studies, and other monitoring systems to evaluate patient care at all stages of the system.

CURRENT STATUS: Meets minimum standard.

COORDINATION WITH OTHER EMS AGENCIES:

NEEDS:

Standard is met. Objective developed to enhance data capture of specialty patients.

OBJECTIVE:

6.05.2: By year end 2014, implement the OC-MEDS patient registry module to begin capturing specialty patient data.

August 2015 Update: IN PROGRESS: STEMI and Stroke data collection forms and permission levels have been developed. Continue to refine processes and data elements to meet system needs. Currently receiving trauma data in NTDB format from four (4) trauma centers (OCG, MSN, UCI, LBM) via scheduled quarterly imports. CHOC is using the Patient Registry Trauma Incident Form as their Trauma Registry and performing direct data entry.

August 2016 Update: IN PROGRESS: Countywide Stroke Registry has been completed and is in pilot testing. Implementation is expected by early 2017. STEMI policies in development to support refined processes and data elements. STEMI Registry Pilot testing expected to begin by early to mid-2017.

August 2017 Update: IN PROGRESS: As of Q2 2017, the OC Stroke Registry has been fully implemented. OCEMS designated Stroke Centers have been trained how to use the system and are submitting Stroke patient data accordingly. OCEMS plans to implement a STEMI Registry, with projected implementation of Q1 or Q2 2018.

October 2018 Update: IN PROGRESS: All SNRCs are currently submitting stroke patient data through the OC-MEDS Stroke Registry. We continue to refine our processes and discuss with stakeholders which data elements will meet system needs and not create undue burden on the stakeholders' ability to do data abstraction. Plans to implement an OC-MEDS STEMI Registry has been postponed and we will continue to receive the required data by hard copy or email.

October 2019 Update: IN PROGRESS: No Change from prior update.

2020-2023 Update: IN PROGRESS: No Change from prior update.

August 2024 Update: IN PROGRESS: Initiated implementation of Bi-Directional exchange for basic EMS data to collect & share outcome data at all stages of the system. Implementation of STEMI Registry remains pending.

Section 5
Trauma System Status Report
2024

EXECUTIVE SUMMARY

One of the first comprehensive systems of care in the United States, Orange County’s Trauma System is unique and inclusive with the overall delivery of emergency medical services. Evaluation of the injured patient is viewed as an entire community problem, with four designated hospitals that are committed to trauma care. The Orange County Trauma Care System (Title 22 § 100247) is fully implemented with sufficient capacity to care for all designated trauma patients and demonstrates the maturity of a well-established system that addresses all aspects of trauma care.

Orange County EMS (as a local EMS agencies) is responsible for planning, implementing, and managing local trauma care systems, including assessing needs, validating system design, designating Trauma Centers, collecting trauma care data in compliance with state and national standards, and providing a Performance Improvement and Patient Safety Program. Orange County EMS utilizes the American College of Surgeons (ACS) trauma verification process as part of our designation process.

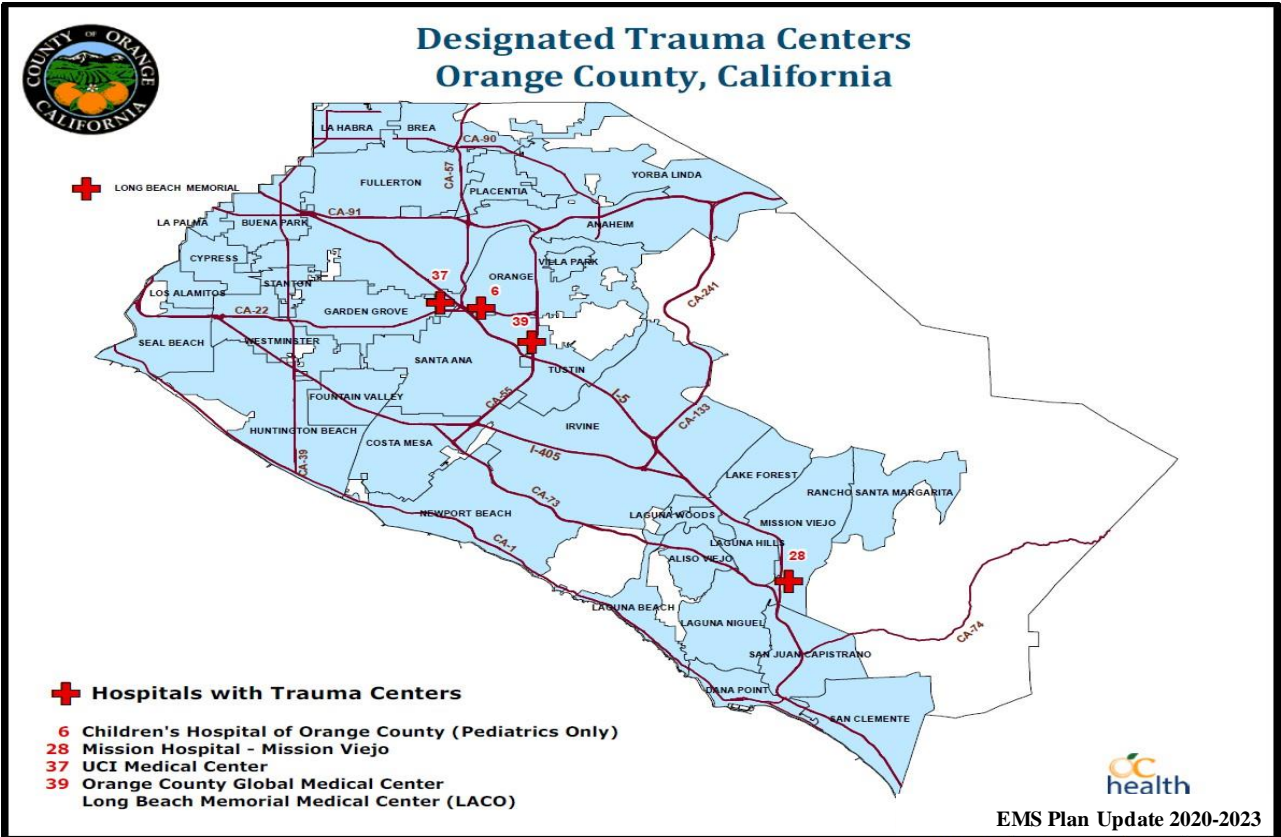

This document serves to provide a system status report for trauma care in Orange County and comply with annual submission requirements (Title 22 § 100253). Since 1980, Orange County (OC) has maintained a trauma system to ensure complete geographical coverage. Orange County Emergency Medical Services (OCEMS) and the trauma centers have a collegial relationship and work collaboratively to provide the highest quality of care for trauma patients.

Trauma centers are a fundamental component of the integrated EMS system and remain a vital public resource. The trauma system ensures the management of severely injured patients at designated trauma centers, with the less severely injured patients cared for in emergency departments. The OC Trauma System has been functioning at a high level for over thirty years as evidenced by a reduction of morbidity and mortality rates due to traumatic injury. Currently, four designated hospitals are committed to providing trauma care:

¹ ACS Verification & LEMSA Designation in progress

UCIMC and OCGMC receive trauma patients from the northern, western and portions of the central/eastern sections of the county. MH receives most of its trauma patients from the southern sections of the county. CHOC receives pediatric trauma patients from all areas within the county and serves as a regional resource for pediatric trauma patients. OCGMC has capability to receive pediatric trauma patients. In addition, OCEMS authorizes the transport of OC trauma patients to Long Beach Memorial Medical Center (LBMCC), a Los Angeles County designated trauma center, to ensure complete county coverage. See Map on next page.

The following table outlines the total number of trauma patient transports in the system for CYs 2012-2023.

**AMERICAN COLLEGE OF SURGEONS (ACS)
TRAUMA SYSTEM CONSULTATION PREPARATION, LOCAL ASSESSMENT & REPORT**

January – October 2018

In 2018, OCEMS began the process of contracting with American College of Surgeons (ACS) to conduct a system evaluation of our current Trauma System & to specifically address the underlying structure of the OC trauma system design and determine the adequacy of current trauma services or necessity for additional trauma centers. The OCEMS Trauma Advisory Committee, Emergency Medical Care Committee (EMCC) & HCA leadership supported this recommendation.

The OC trauma system had not been objectively reviewed by an external entity nor been updated to reflect more current public-health based models intended to address the broader spectrum of injury. During 2018, OCEMS received inquiries from multiple hospital systems requesting information on trauma volume and how to apply as a trauma center. In addition, one hospital submitted a formal letter of intent to apply as a trauma center.

The American College of Surgeons (ACS) assembled and provided a team of national trauma system experts to perform an on-site trauma system evaluation in the State. ACS assesses key areas including but not limited to the following:

<ul style="list-style-type: none"> • Emergency medical services • Definitive care facilities • System coordination and patient flow • Rehabilitation • Disaster preparedness • System-wide evaluation and quality assurance • Trauma management information systems • Prevention and outreach • Research 	<ul style="list-style-type: none"> • Statutory authority & administrative rules • System leadership • Coalition building & community support • Lead agency & human resources within the lead agency • Trauma system plan • System integration • Financing • Injury epidemiology, indicators as a tool for system assessment
---	---

Summary of ACS/OCEMS Responsibilities

- ACS: Examine the integration of trauma system components for county-level system of care and accept report of recommendations for system improvement and enhancement.
- ACS; Provided an eight-member team consisting of: two trauma/general surgeons (one is team leader), one emergency physician, a state EMS director, a trauma program manager, a technical consultant and two trauma system consultation program staff members.
- ACS: Perform an onsite trauma system evaluation in the County July 15-19, 2019.
- OCEMS: Submitted a preview questionnaire (PRQ) prior to the ACS visit, by using the TSC Guide.
- ACS/OCEMS: Coordinate & consolidate the Review Team’s recommendations into final report.

Timeline of ACS/OCEMS Site Visit to Final Report

The ACS Trauma System Consultation was conducted by a multi-disciplinary review team of Trauma Surgeons, Emergency Physicians, Trauma Program Manager and Technical Advisors in July 2019. A final report was received a few months later with a comprehensive analysis of the current Orange County

Trauma system, recommendations for system improvements & priority recommendations requiring focused attention.

Trauma System Configuration

During the consultation, Orange County Emergency Medical Services (OCEMS) asked a set of questions concerning our local EMS and Trauma System. Specifically, OCEMS asked ACS to **“Describe the impact of changes to trauma center configuration on various system components such as access, volume and transport times.”** In sum, the report indicated the following:

- Geographic and population coverage of the county is excellent.
- The distribution of trauma centers is well matched to the population density.
- Simple geospatial (GIS-based) analysis suggests that over 99% of the county’s injured population is within 30 minutes from point of injury to a Level or Level II center by ground & over 50% are within 15 minutes.
- The current Orange County Trauma System has worked well over many years.
- The decision to continue the current model or to reconfigure the system must be made locally and potential financial or verification impacts to existing centers should be considered.

Orange County Emergency Medical Services (OCEMS) received and reviewed the report, identified key findings, and shared these with the Health Care Agency leadership. Based on the analysis within the ACS Final Report, current resource capabilities and exquisite knowledge of our local EMS & Trauma System, OCEMS finds it unnecessary to increase the number of trauma centers. The Trauma System Plan will be updated annually as well as a re-evaluation of the system every 3-5 years to validate appropriate trauma care access.

High Priority Recommendations & Objectives

As a result of their in-depth, independent analysis, the ACS Final Report contained over fifty recommendations that were organized into three sections and seventeen subsections: Trauma System Assessment, Trauma System Policy Development & Trauma System Assurance. OCEMS focused on several high priority recommendations (goals) & established objectives to achieve those goals in the next few years.

GOALS & OBJECTIVES

Goal	Date to Achieve	STATUS

PERFORMANCE IMPROVEMENT

OCEMS maintains a system-wide continuous quality improvement program to monitor, review, evaluate and improve the delivery of prehospital and trauma care services. Region-wide efforts are ongoing to define the system through data collection, committee-based reviews & system evaluation expectations. Performance improvement processes allow for ongoing standardized medical review of trauma care and include:

- High risk, high volume, problem-oriented runs & calls requested to be reviewed by OCEMS
- Specific audit topics established through the Regional Trauma Operations Committee.
- Medical care delivered by prehospital care providers based on protocol availability
- Trends in the quality of medical control delivered by the base hospital MICNs and BHPs
- Trends in the quality of field care delivered by EMTs and Paramedics

CONCLUSION

The Orange County Trauma System has been an integral component of the Orange County Emergency Medical Services Plan since its inception. Orange County Emergency Medical Services in collaboration with needs designated trauma centers and other partners monitor factors influencing the trauma system and make accommodations to meet current system standards and needs.

STEMI Plan
2024

EXECUTIVE SUMMARY

California Health and Safety Code Sections 1797.107 and 1798.150 and corresponding California Code of Regulations Section 100270.121, requires the Local Emergency Medical Services Agency to submit a STEMI Critical Care System Plan to the State Emergency Medical Services Authority (EMSA) and provide annual updates. This section serves as a 2024 update of the STEMI Critical Care System Plan for Orange County Emergency Medical Services. Since 2005, a comprehensive Cardiovascular Receiving Center (CVRC) program has been in place and was the first EMS system in the nation to integrate rapid field assessment and transport of patients with a known or suspected ST-Segment Elevation Myocardial Infarction (STEMI) to OCEMS designated Cardiovascular Receiving Centers.

Currently, thirteen OC hospitals with 24/7 cardiac catheterization capability have systematically demonstrated a 69-minute door to device which is well within the 90-minute national standard. There has been no change in the CVRC program since the last update is having one less hospital designated as a CVRC. There have been no significant impacts as a result.

The following table contains data obtained from our OC-MEDS Database (Elite) and our STEMI patient registry. Elite Database is the patient registry used by EMS provider agencies and represents the number of field designated stroke transported patients.

Stroke Plan Update
2024

EXECUTIVE SUMMARY

California Health and Safety Code Sections 1797.107 and 1798.150 and corresponding California Code of Regulations Section 100270.200, requires the Local Emergency Medical Services Agency to submit a Stroke Critical Care System Plan to the State Emergency Medical Services Authority (EMSA) and provide annual updates. This section serves as a 2024 update of the Stroke Critical Care System Plan for Orange County Emergency Medical Services.

Since 2009, a comprehensive Stroke-Neurology Receiving Center (SNRC) program has been in place by defining SNRCs as part of a “spoke and hub” system, with primary 911 ambulance transports to centers with endovascular treatment (EVT) capabilities as a “hub”. Prior to 2014, patients who present to “spokes” with acute ischemic strokes and suspected large vessel occlusions were transferred by EMS to “hubs” for EVT. After 2014, all 9 SNRC hubs in this system became EVT-ready and in April of 2015, the OC EMS officially changed the SNRC criteria to require 24/7 neuro-interventional capabilities for all hub centers.

The following table contains CY data obtained from our OC-MEDS Databases (Elite and Stroke Patient Registry). Elite Database is the patient registry used by EMS provider agencies and represents the number of field designated stroke transported patients. The Stroke Patient Registry is the SNRC database and represents the number of patients (arriving via 911 and walk-in) with a stroke related final diagnosis as reported by the receiving specialty center.
