RANCHO CORDOVA, CA 95670
(916) 322-4336 FAX (916) 324-2875

DATE: January 26, 2026

TO: Commission on EMS

FROM: Elizabeth Basnett, Director
Dr. Hernando Garzon, Chief Medical Officer

SUBJECT: Exceedance of Ambulance Patient Offload (APOT) Standards – December 2025 Electronic Notification pursuant to Title 22, Division, 9, Chapter 1.2, § 100007.02.

Background

The Commission on Emergency Medical Services (EMS) is receiving the following report to summarize all activities associated with the implementation of Assembly Bill 40 (Rodriguez, 2023-2024) related to Ambulance Patient Offload Times (APOT). The Emergency Medical Services Authority (EMSA) has included the following background information to summarize the events and activities which demonstrate implementation of AB 40 requirements:

APOT Audit Tool Portal – Enhancements

- *No updates have been applied to the system since the previous report.*

APOT Audit Tool Portal – Utilization Summary

- To date, 209 hospitals have registered for the audit tool, an increase of 8 from last month. EMSA is working with the California Hospital Association to increase registration.

Hospital APOT Reduction Plan Compliance

- EMSA staff continue to track and document all Hospital APOT Reduction Protocols.
- As of January 20, 2026, 163 hospitals have submitted their 2025 annual update, an increase of 1 from last month.
- EMSA is engaging LEMSAs and the California Hospital Association to increase compliance.
- For December 2025 data, there were 220,197 records that met APOT criteria, an increase of roughly 30,000 records from last month. EMSA continually conducts targeted outreach to LEMSAs who's EMS providers were not compliant or documenting the new AB 40 elements correctly.

Summary APOT Data for December 2025

- EMSA calculated 90th percentile offload time for all general acute care hospitals (GACHs) with emergency departments using the specifications outlined in the emergency regulations on January 16th, 2026, for December data. EMSA identified GACHs that exceeded their LEMSA APOT standard. These GACHs will be instructed to implement their hospital APOT reduction protocols. Summary information based on December 2025 APOT data and audits can be found below.
 - 318 of 327 hospitals (97%) had at least one EMS patient transport which met APOT documentation criteria.
 - Of the 318 hospitals, 299 (94%) had more than sixty (60) EMS patient transports to their facility for the month of December.
 - Of the 299 hospitals, 163 (54%) hospitals exceeded their local APOT standard.
 - 112 hospitals submitted APOT audit reports, an increase of 1 from last month.
 - Of these 112 hospitals, 42 (37%) already met their LEMSA APOT standard.
- EMSA is working with our partners to provide additional education surrounding best practices for auditors, specifically focused on targeted auditing by hospitals to gain compliance with local APOT standards.

Approach to Bi-Weekly Meetings

- EMSA is focusing the bi-weekly meetings on the 15 hospitals experiencing the longest offload delays that exceed their local APOT standard. This targeted approach aims to address the needs of the communities served by these hospitals and to directly influence the reduction of offload delays.
- In January, EMSA hosted 17 meetings (initial or follow up) with hospitals. This is an increase of 5 from December. Meeting participants include hospital representatives, EMS providers, and LEMSAs. This does not include daily conversations with hospitals, LEMSAs, and EMS providers associated with AB 40 compliance, utilization of the APOT audit tool, and sharing of best practices. EMSA continues to request the 15 hospitals who most significantly exceed their local APOT standard to meet for discussion, time permitting.

Meetings in November 2025: 21
Meetings in December 2025: 12
Meetings in January 2026 (to date): 17

Exceedance of Ambulance Patient Offload (APOT) Standards – Detail

- The following GACHs were identified as exceeding the local APOT standard established by their LEMSA (*page 6, below*). In accordance with Title 22, Division, 9, Chapter 1.2, § 100007.02 "Exceedance of APOT Standards - Required Actions," EMSA instructed the general acute care hospitals in the table below to implement their APOT reduction protocol no later than five (5) business days after the date of notification (January 23, 2026). All hospitals received the following detailed statistics and data points used to make this determination:
 - Monthly offload count
 - 90th percentile APOT
 - Local APOT standard
 - Exceedance of standard
 - Count of records exceeding standard
 - Percent of records above standard
 - Audit Completed (Yes or No)

Report Note: Hospitals with less than 60 offloads are excluded from our assessment and the table included in this report for the following reasons:

- Not all EMS provider agencies are reporting to the new data standard, resulting in some hospitals with significant numbers of missing records for transport they received. This deficiency of data may bias the APOT calculation.
- This approach aligns with the California Department of Health Care Services' Data De-Identification Guidelines.

Local EMS Agency APOT Standards (December 2025)

Local EMS Agency	APOT Standard (Hours:Minutes:Seconds)
Alameda County EMS Agency	0:30:00
